

X/PG.C.10.2 TEACHING OF CHEMISTRY

Course learning outcomes (CLOs)

On completion of the course, the student teacher's will be able to

1. Understand different pedagogical approaches to teaching of chemistry, nature and scope of chemistry.
2. Study the facilities and materials in chemistry labs for teaching higher secondary school, plan learning designs based on problems situations, inquiry and projects.
3. Familiarise with different types of curricular projects in chemistry and their purpose and themes to modern context.
4. Analyse the instructional materials and textbooks with respect to content, organization, learning experiences.
5. Prepare tools and techniques for assessing learning in chemistry.

(एन सी ई आर टी) / (NCERT)

मैसूर - ५७०००६ / Mysuru - 570006

XII/PG.C.12.1.RESEARCH IN CHEMISTRY EDUCATION

Course learning outcomes (CLOs)

On completion of course, the student teacher's will be able to

1. Understand diversity and areas of research in chemistry
2. Conduct action research in chemistry education
3. Encourage teachers to take up research in chemistry as a professional development
4. Develop the interest among the students to take up the research activities in chemistry in their future.
5. Understand the supporting funding agencies in chemistry education.
6. Utilize the research resources available in chemistry.

B.Ed

B.Ed - PC-5: CREATING AN INCLUSIVE SCHOOL

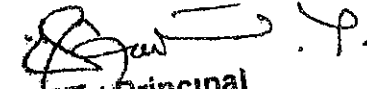

BA.B.Ed - BAE VII. 4: Creating an Inclusive School

BSc.B.Ed- BSE VII.4 :CREATING AN INCLUSIVE SCHOOL

M.Sc.Ed:CREATING AN INCLUSIVE SCHOOL

On completion of the course, prospective teachers will be able to :

1. Analyse the meaning and concept of Special Education, Integration and Inclusion.
2. Appreciate the special needs of Individuals with diverse needs.
3. Realize the importance of inclusive education and inclusive education programmes
4. Examine the role of various agencies towards inclusion.
5. Appreciate the concept of exceptional children.
6. Identify the exceptional learners in a classroom.
7. Explore the nature and needs of different categories of children with special needs.
8. Implement the different considerations and provisions for facilitating inclusion.
9. Exercise various educational intervention programmes for meeting the needs of exceptional learners.
10. Employ the skills of adapting curriculum to meet the need of the students with diverse needs.

मैसूरु - ५७०००६ / Mysuru - 570006

Yoga Education, Self-Understanding and Development

Course Learning Outcome.

On the Completions of the Course, prospective teachers will be able to demonstrate

1. Some Important Asanas and Pranayamas
2. He/She will have a clear Idea about the Concepts like Self-esteem & Self-Concept & its importance.
3. Ability to State the Different types of yoga (Astana Yoga, Hatha Yoga etc.,)
4. The Process of Meditation and Stress management
5. The Process of Personality Development through Yogic Practice.

UNIVERSITY OF MYSORE

REGIONAL INSTITUTE OF EDUCATION
[National Council of Educational Research and Training, New Delhi]

Regulations governing the Programme

1.0 Programme and Duration :

Integrated Programme of Teacher Education titled ‘**Master of Science Education (Chemistry)**’ leading to the post-graduate degree, **M.Sc.Ed. (Chemistry)**. The programme will be of six year duration organized on the semester pattern with 2 semesters in a year. Each semester will consist of 16 weeks of instruction excluding examination.

1.1 Equivalence:

The course content in the subjects, Physics, Chemistry and Mathematics in the first four years are equivalent to course content in the relevant subjects in the B.Sc. (PCM) Programme of the University of Mysore. The course content of the fifth and sixth years are equivalent to the M.Sc. Programme in Chemistry offered by the University of Mysore.

The course content related to Professional education are equivalent to the B.Ed. of University of Mysore and are as per the NCTE Regulations (2014).

In addition, in the last two years of the Programme, Professional Education components required for teaching of Chemistry at senior secondary level are also included. The composite degree, M.Sc.Ed., is thereby equivalent to B.Sc., B.Ed. and M.Sc. degrees of University of Mysore.

2.0 Eligibility for admission to M.Sc.Ed.

2.1 Candidates seeking admission to the programme should have passed CBSE Senior Secondary examination/ Pre-University examination of Karnataka or an equivalent examination of any state or UT of the Republic of India with 45% marks in the aggregate. Relaxation up to 5% of marks is given to the SC/ST candidates.

2.2 Candidates should have passed the qualifying examination with the following combinations of subjects: Physics, Chemistry, Mathematics/Statistics.

2.3 Admission shall be made by selection on the basis of marks in the qualifying examination and performance in a specially designed national level test (Common Entrance Examination) conducted by the NCERT. It shall be governed by the admission policies of NCERT and the guidelines of the University of Mysore.

It will also be governed by the reservation policies of Govt. of India as prevalent at the time of admission.

3.0 Scheme of Instruction :

Details of courses, scheme of study, credit distribution pattern and method of evaluation, etc. are provided in Table 1.

From semesters I to VIII Courses of Study are organized under the following categories:

- a) Core Courses
- b) Ability Enhancement Courses
- c) Discipline Specific Electives
- d) Skill Enhancement Courses
- e) Generic Courses
- f) Professional Education Courses.

From semesters IX to XII, courses of study are classified under the following categories:

- a) Core Courses
- b) Professional Education Courses

3.1 Core Courses:

The Programme offers three majors, Physics, Chemistry and Mathematics in the first six semesters. Each Major comprises of 6 core courses. The titles of courses in each major and their positions are given in Tables 2 & 3.

From semesters IX to XII the core courses comprise of Chemistry Theory and Core Labs of the Masters level.

3.2 Ability Enhancement Courses :

This is mandatory for all students. Comprises of 8 courses offered during I to IV Semesters, four each in a language of student's choice and four in English

- a) Language : Any one of the following: Hindi / Kannada/ Malayalam/ Tamil / Telugu
- b) English

3.3 Discipline Specific Elective:

Total of six advanced courses, two in each Major Subject are offered in the VII and VIII semesters of the Programme.

3.4 Skill Enhancement Course:

Two courses are offered in the third and fourth semesters of the Programme. Students can choose any two courses of their choice, cutting across disciplines, from a pool of courses that are being offered in each subject area.

3.5. Generic Course:

Two courses of inter-disciplinary nature are offered in the first and eighth semesters of the programme.

3.6 Professional Education Courses:

In accordance with the NCTE regulations of 2014, the programme includes 23 courses which are positioned in the first 8 semesters. The requirements of the 20-week internship proposed by the NCTE, are met through five rigorous phases of School

Attachment Programmes. The first three Phases are of 2-week duration each, which will be organized in the Demonstration School and selected schools in and around Mysuru. The fourth phase is of 3 weeks duration, i.e. 1 week exclusively for working with community. The final fifth phase is of longer duration of 11 weeks internship and it will be organized in selected schools of NVS of Hyderabad Region or other schools.

An additional School attachment Programme is organized in the XI semester for a duration of 4 weeks. This will be organized in selected higher secondary schools where the student trainees will have a specialized internship in teaching experience at the higher secondary level.

4.0 Attendance

Each student has to attend a minimum of **75%** classes out of the classes conducted in each course. Failure to meet the minimum requirement renders disqualification from terminal examination and makes him/her ineligible for NCERT scholarship/ free ship. Such a student is deemed to have dropped the course and is not allowed to write the semester end examination (C₃) of that course. He/She has to re-register for the course/s as and when they are offered by the institute.

5.0 Medium of Instruction:

The medium of instruction and examination is English.

6.0 Course Structure

	Professional Education	MSE VIII.5		Knowledge & Curriculum
		MSE VIII.6		Guidance & Counselling in Schools
		MSE VIII.7		Value & Peace Education

Semesters IX to XII:

Semester	Course	Code	Title of the Paper
NINTH	Core Chemistry	MSE(C)-IX.1	Methods of Chemical Analysis
		MSE(C)-IX.2	Concepts and Models Of Inorganic Chemistry
		MSE(C)-IX.3	Stereochemistry and Organic Reaction Mechanism
		MSE(C)-IX.4	Chemical Thermodynamics And Statistical Thermodynamics
		MSE(C)-IX.5	Analytical Practical ó I
		MSE(C)-IX.6	Physical Chemistry Practical ó I
	Professional Education	MSE(C)-IX.7	Foundations of Higher Secondary Education
TENTH	Core Chemistry	MSE(C)-X.1	Spectroscopy I
		MSE(C)-X.2	Advanced Inorganic Chemistry
		MSE(C)-X.3	Synthetic Organic Chemistry and Chemistry Of Natural Products
		MSE(C)-X.4	Quantum , Nuclear and Radiation Chemistry
		MSE(C)-X.5	Organic Practical óI
		MSE(C)-X.6	Inorganic Practical ó I

	Professional Education	MSE(C)-X.7	Teaching of Chemistry
ELEVENTH	Core Chemistry	MSE(C)-XI.1	Solid State Chemistry
		MSE(C)-XI.2	Organometallics, Catalysis & Frontiers in Inorganic Chemistry
		MSE(C)-XI.3	Spectroscopy II
		MSE(C)-XI.4	Electrochemistry and Surface Chemistry
		MSE(C)-XI.5	Organic Practical ó II
		MSE(C)-XI.6	Analytical Practical ó II
	Professional Education	MSE(C)-XI.7	Internship 2 (Senior Secondary Level)
TWELFTH	Core Chemistry	MSE(C)-XII.1	Instrumental Methods of Chemical Analysis
		MSE(C)-XII.2	Bio-inorganic Chemistry
		MSE(C)-XII.3	Heterocyclics, Molecular Rearrangements, Green Chemistry, Synthetic Drugs and Antibiotics
		MSE(C)-XII.4	Chemical Kinetics
		MSE(C)-XII.5	Inorganic Practical ó II
		MSE(C)-XII.6	Physical Chemistry Practical ó II
	Professional Education	MSE(C)-XII.7	Research in Chemistry Education

7.0 Change to another programme

Candidates admitted to M.Sc.Ed.(Chemistry) programme have the option of changing to M.Sc.Ed. Physics or Mathematics programme in the beginning of IX semester, after successful completion of first eight semesters without dropping any course, and subject to conditions laid down by the Academic Committee constituted for the purpose.

8.0 Continuous Assessment, Earning of Credits and Award of Grades

The evaluation of the candidate shall be based on continuous assessment. The structure for evaluation is as follows:

- 8.1 Assessment and evaluation processes happen in a continuous mode. However, for reporting purposes, a semester is divided into 3 discrete components identified as C_1 , C_2 , and C_3 .
- 8.2 The performance of a candidate in a course will be assessed for a maximum of 100 marks as explained below.
 - 8.2.1 The first component (C_1), of assessment is for 25 marks. This will be based on Test/assignment / seminar. During the first half of the semester, the first 50% of the syllabus will be completed. This shall be consolidated during the 8th week of the semester. Beyond 8th week, making changes in C_1 is not permitted.
 - 8.2.2 The second component (C_2), of assessment is for 25 marks. This will be based on test/assignment/ seminar. The continuous assessment and scores of second half of the semester will be consolidated during the 16th week of the semester. During the second half of the semester the remaining units in the course will be completed.
 - 8.2.2.1 The outline for continuous assessment activities for Component-I (C_1) and Component-II (C_2) will be proposed by the teacher(s) concerned before the commencement of the semester and will be discussed and decided in the respective Section/Department. The students should be informed about the modalities well in advance. The evaluated courses/assignments during component I (C_1) and component II (C_2) of assessment are immediately returned to the candidates after obtaining

acknowledgement in the register maintained for this purpose by the concerned teacher.

- 8.2.3 During the 18th-20th week of the semester, a semester-end examination of 2 hours duration shall be conducted for each course. This forms the third/final component of assessment (C₃) and the maximum marks for the final component will be 50.

Setting questions papers and evaluation of answer scripts.

- I. Questions papers in three sets shall be set by the internal examiner for a course. Whenever there are no sufficient internal examiners, the chairman of BoE shall get the questions papers set by external examiners.
- II. The Board of Examiners shall scrutinize and approve the question papers and scheme of valuation. There shall be separate BoE for UG and PG papers.
- III. (i) **For semesters I to VIII, there shall be single valuation for all theory papers by internal examiners. In case, the number of internal examiners falls short, external examiners may be invited.**
(ii) The examination for Practical work/ Field work/Project work will be conducted jointly by two internal examiners. However the BoE on its discretion can also invite external examiners if required.
- IV. **For semesters IX to XII, a separate PG board of Examiners approved by the University will be constituted. All question papers will be set by internal examiners but valuation shall be done by external examiners.**
- V. Each theory paper comprises of 9 questions of 10 marks each. Each unit will have two questions with internal choice. Question 9 will have questions drawn from all the 4 units.
- VI. **Challenge valuation**
A student who desires to apply for challenge valuation shall obtain a Xerox copy of the answer script by paying the prescribed fee within 10 days after the announcement of the results. He / She can challenge the grade awarded to him/her by surrendering the grade card and by submitting an application along with the prescribed fee to the Registrar (Evaluation) within 15 days after the announcement of the results. This challenge valuation is only for C₃ component. The answer scripts for which challenge valuation is sought for shall be sent to another external examiner. The marks awarded will be the higher of the marks obtained in the challenge valuation and in maiden valuation.

- 8.2.4 In case of a course with only practical component a practical examination will be conducted with two examiners (ref: 8.2.3 III (ii)). A candidate will be assessed on the basis of a) knowledge of relevant processes b) Skills and operations involved c) Results / products including calculation and reporting. If external examiner does not turn up then both the examiners will be internal examiners. The duration for semester-end practical examination shall be decided by the departmental council.

- 8.2.5 If X is the marks scored by the candidate out of 50 in C₃ in theory examination, if Y is the marks scored by the candidate out of 50 in C₃ in Practical examination, and if Z is the marks scored by the candidate out of 50 in C₃ for a course of (L=0):T:(P=0) type that is entirely tutorial based course, then the final marks M in C₃ is decided as per the following table.

L.T.P. distribution	Calculation of M in C₃
L:T:P	$\frac{[(L + T) * X] + [(T + P) * Y]}{L + 2T + P}$
L : (T = 0) : P	$\frac{(L * X) + (P * Y)}{L + P}$
L:T : (P=0)	X
L : (T=0) : (P = 0)	X
(L=0) : T : P	Y
(L=0) : (T = 0) : P	Y
(L=0) : T : (P = 0)	Z

8.2.6 The details of continuous assessment are summarized in the following Table.

Component	Syllabus in a Course	Weightage	Period of Continuous Assessment
C ₁	First 50% (2 units of total units)	25%	First half of the semester. To be consolidated by 8 th week.
C ₂	Remaining 50% (Remaining units of the course)	25%	Second half of the semester. To be consolidated by 16 th week.
C ₃	Semester-end examination (All units of the course)	50%	To be completed during 18 th ó 20 th Week
Final Grades to be announced latest by 24th week			

8.2.7 A candidate's performance from all 3 components will be in terms of scores, and the sum of all three scores will be for a maximum of 100 marks (25 + 25 + 50).

8.2.8 Finally, awarding the grades should be completed latest by 24th week of the semester.

8.3 In case a candidate secures less than 30% in C₁ and C₂ put together in a course, the candidate is said to have DROPPED that course, and such a candidate is not allowed to appear for C₃ in that course.

In case a candidate's class attendance in a course is less than 75% or as stipulated by the University, the candidate is said to have DROPPED that course, and such a candidate is not allowed to appear for C₃ in that course.

Teachers offering the courses will place the above details in the Departmental meeting during the last week of the semester, before the commencement of C₃, and subsequently a notification pertaining to the above will be brought out by the Principal before the commencement of C₃ examination. A copy of this notification shall also be sent to the office of the Registrar & Registrar (Evaluation).

8.4 In case a candidate secures less than 30% in C₃, he/she may choose DROP/MAKEUP option.

In case a candidate secures more than or equal to 30% in C₃, but his/her grade (G) = 4, as per section 8.12 below, then he/she may be declared to have been conditionally successful in this course, provided that such a benefit of conditional clearance based on G=4 shall not be availed for more than 24 credits for the entire programme..

In case a candidate secures less than 30% in C₃, he/she may choose DROP/MAKE-UP option.

The candidate has to exercise his/her option to DROP immediately within 10 days

from the date of notification of results.

A MAKE UP examination for odd semester courses will be conducted along with next regular odd semester examinations and for even semester courses along with a next regular even semester examinations. If a candidate is still unsuccessful, he/she may opt for DROP or again take up MAKE UP examination; however, not exceeding double the duration norm in one stretch from the date of joining the course.

- 8.5 A candidate has to re-register for the DROPPED course when the course is offered again by the Institute if it is a hard core course. **The details of any dropped course will not appear in the grade card.**
- 8.6 Each student can go with a normal pace of credits prescribed for each per semester. However, he/she has provision to go with a slow pace of 20 credits per semester or an accelerated pace of +4 credits per semester.
- 8.7 The tuition fee and the examination fee of a semester will be in accordance with the number of credits registered by each student in that semester.
- 8.8 The student may avail a maximum of two blank semesters in one stretch. However, he has to pay a nominal fee for maintaining a semester blank to the institution.
- 8.9 The Institute shall follow the CBCS guidelines of the University and its amendments thereof provided they are beneficial to the system.
- 8.10 The tentative / provisional grade card will be issued by the Registrar (Evaluation) at the end of every semester indicating the courses completed successfully. This statement will not contain the list of DROPPED courses.
- 8.11 Upon successful completion of M.Sc.Ed., a final grade card consisting of grades of all courses successfully completed by the candidate will be issued by the Registrar (Evaluation).
- 8.12 The grade and the grade point earned by the candidate in the subject will be as given below.

Marks	Grade	Grade Point (GP = V x G)
30-39	4	V*4
40-49	5	V*5
50-59	6	V*6
60-64	6.5	V*6.5
65-69	7	V*7
70-74	7.5	V*7.5
75-79	8	V*8
80-84	8.5	V*8.5
85-89	9	V*9
90-94	9.5	V*9.5
95-100	10	V*10

Here, P is the percentage of marks ($P = [(C1+C2)+M]$) secured by a candidate in a course which is rounded to nearest integer. V is the credit value of course. G is the grade and GP is the grade point.

8.13 A candidate can withdraw any course within in ten days from the date of notification of final results. Whenever a candidate withdraws a paper, he/she has to register for the same course in case it is hard core course, the same course or an alternate course if it is soft core/open elective.

A DROPPED course is automatically considered as a course withdrawn.

8.14 Overall cumulative grade point average (CGPA) of a candidate after successful completion the required number of credits (302) is given by $CGPA = GP / \text{Total number of credits}$

$$CGPA = \Sigma GP / \text{Total number of credits}$$

9. Classification of results

The final grade point (FGP) to be awarded to the student is based on CGPA secured by the candidate and is given as follows.

CGPA	FGP	
	Numerical Index	Qualitative Index
$4 \leq CGPA < 5$	5	SECOND CLASS
$5 \leq CGPA < 6$	6	
$6 \leq CGPA < 7$	7	FIRST CLASS
$7 \leq CGPA < 8$	8	
$8 \leq CGPA < 9$	9	DISTINCTION
$9 \leq CGPA \leq 10$	10	

Overall percentage= $10 * CGPA$ or is said to be 50% in case $CGPA < 5$

10.0 Provision for Appeal

A candidate, if dissatisfied with the grades that he/she has got with a feeling that he/she is unnecessarily penalized can approach the grievance cell with the written submission together with all facts and all the assignments, test papers etc. which were evaluated. He/She can do so before the semester-end examination (based on 2 continuous assessment components already completed) or after the semester-end examination. The grievance cell is empowered to review the grades if the case is genuine and is also empowered to penalize the candidate if his/her submission is found to be baseless and unduly motivated. This Cell may recommend to take disciplinary/corrective action on an evaluator if he/she is found guilty. The decision taken by the Grievance Cell is final.

The Registrar (Evaluation) will be the Chairman and Convenor of the Grievance Cell. The composition of the Grievance Cell is as follows:

1. The Principal
2. The Dean of instruction
3. Heads of DESM, DESSH, I/c Sections and an external expert from the

- University of Mysore in the concerned subject.
4. The Registrar (Evaluation) ex-officio Chairman/Convenor.

The appropriate fee as fixed by the University shall be collected from the candidate who goes for an appeal to the Grievance Cell.

11.0 Barring of Simultaneous Study

- 11.1 No student admitted to a degree course in a college under the jurisdiction of this university, shall be permitted to study simultaneously in any other course leading to a degree (regular/ evening/ morning) offered by this/any other university.
- 11.2 If a candidate gets admitted to more than one course leading to a degree, the university shall without giving prior notice, his/her admission will be cancelled to all such courses to which he/she has joined.

12.0 Miscellaneous:

- 12.1 These revised regulations will apply to the candidates admitted for the academic year 2016-17 and onwards for the course mentioned in Regulation No.1.0 above.
- 12.2 Other regulations not specifically mentioned above are as per the Regulations of the University as applicable from time to time.
- 12.3 Any other issue not envisaged above, shall be resolved by the Vice-Chancellor in consultation with the appropriate Bodies of the University, which shall be final and binding.

SYLLABUS

FIRST SEMESTER

Core course 1A: Physics

MSEL1 :MECHANICS

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

- The students will be able to understand Newtonian mechanics and apply its principles to explain natural physical phenomena.
- The teacher will be able to enable the students to identify and modify alternative conceptions in the domains of Newtonian Mechanics.

COURSE CONTENT:

Unit I

Vectors: Vector and scalar products. Scalar triple product and Vector triple product. Differentiation of a vector with respect to scalars (such as time). Gradient, Divergence, Curl-definitions, physical meaning, and operations, Laplacian, Line, Surface, and Volume integrals. Gauss's Stokes, and Greens theorem.

Ordinary Differential Equations: 1st order homogeneous differential equations. 2nd order homogeneous differential equations with constant coefficients.

Unit II

Laws of Motion: Newton's Laws of motion. Frames of reference, inertial and non inertial, pseudo forces, Galilean transformations; Galilean invariance, Dynamics of a system of particles. Centre of Mass.

Momentum and Energy: Principle of conservation of momentum for a system of particle, Work and Kinetic Energy Theorem. Conservative and non-conservative forces. Conservation of energy. Momentum of variable-mass system: motion of rocket.

Unit III

Rotational Motion: Angular velocity and angular momentum of a particle and system of particles. Torque. Principle of conservation of angular momentum.

Gravitation: Newton's Law of Gravitation. Central force and motion of a particle in a central force field (motion is in a plane, angular momentum is conserved, areal velocity is constant). two-body central force problem and reduction to the equivalent one body problem, inverse square law potential and different forms of orbit, Kepler's laws of planetary motion. Satellite in circular orbit and applications. Geosynchronous orbits. Weightlessness.

Unit IV

Oscillations: Simple Harmonic Motion (Basic idea), Differential equation of SHM and its solutions (simple pendulum, compound pendulum, loaded spring), Kinetic and Potential Energy, Total Energy and their time averages. Linearity and Superposition Principle. (1) Oscillations having equal frequencies and (2) Oscillations having different frequencies (Beats), Lissajous figures with equal and unequal frequency and their uses. Damped vibrations. Forced vibrations.

4. K. R. Symon, Mechanics, Addison Wesley, 1971.
5. Basudeb Bhattacharya, Engineering Mechanics, 2nd edn., 2015, Oxford University Press
6. Ronald Lane Reese, University Physics, 2003, Thomson Brooks/Cole
7. Y. R. G. Takwale and P. S. Puranik, Introduction to classical mechanics, Tata McGraw Hill.
8. Charles Kittel et. al., Mechanics Berkeley Physics course, 2007, Tata McGraw-Hill.
9. H C Verma, Concepts of Physics, Bharati Bhawan; Revised Reprint 2015 edition

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments out of the following)

1. Study of the motion of an air bubble.
2. Study of the motion of a freely falling body.
3. Study of the acceleration of a body subjected to different unbalanced forces.
4. Study of accelerations of different masses under a constant unbalanced force.
5. Study of conservation of energy and momentum in head-on-collision between two spheres of equal mass.
6. Study of conservation of momentum and energy of a collision in a plane.
7. Conservation of momentum in a mechanical explosion.
8. To study the relation between length and time period of a simple pendulum.
9. To study the relation between force and extension produced in a stretched spring.
10. Study of the variation of the time period of a bar pendulum with different length and determination of g at the given place.
11. Study of the dependence of the period of oscillation of a spring-mass system on mass

12. The Spiral spring: Determination of the acceleration due to gravity by the graphical method.
13. Determination of moment of Inertia, mass and density of the flywheel.
14. Moment of inertia of a disc supported on strings.
15. The moment of inertia of a wheel and axle.
16. The Bifilar Suspension

Core Course 2A- Chemistry

MSEL.2 : ATOMIC STRUCTURE AND BONDING

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives :

- To understand and appreciate the development of various atomic theories
- To develop an understanding of principles of Atomic structure
- To justify the need for quantum mechanical structure of atoms
- To develop an understanding of the periodic trends, preparation and uses of s- and p-block elements and their compounds in terms of structure and bonding
- To understand the nature of bonding and to predict the shapes of molecules
- To construct MO energy level diagrams and predict the properties of molecules

COURSE CONTENT:

Unit I: Atomic Structure

History of an atom. List the Characteristics of Black-body radiation- Planck's radiation law, photoelectric effect, Compton effect and their explanation using quantum theory. Bohr's model of hydrogen atom and its limitations. Summarise the evidence for the wave nature of matter. State de Broglie hypothesis and Heisenberg uncertainty principle.

Schrodinger wave equation and its importance, physical interpretation of the wave function, significance of ψ and ψ^2 , postulates of quantum mechanics, particle in one dimensional box. Radial wave functions, angular wave functions. Quantum numbers and their importance, atomic orbitals and shapes of s, p, d orbitals, Multi-electron atoms, Aufbau and Pauli exclusion principles and Hund's multiplicity rule- Electronic configurations of the elements(s,p,d blocks), effective nuclear charge. Explanation for the stability of completely filled and half filled shells with examples. Screening effect: Slater's rule, Energy level diagram for multi electron atoms.

Unit II: Periodic Properties and s -and p-Block Elements

Atomic radii, Covalent radii, ionic radii and Vander waal's radii- definition with explanation with examples in a group and period Explanation of observed trends. Comparison of the ionic size of atoms with the corresponding anion and cation. Variation of ionic radii in isoelectronic ions. Additive nature of covalent radii.

Ionization energy: Definition, the factors influencing ionization energy, variation in a group and period. Effect of the size and electronic configuration on successive ionization energies.

Electron affinity : Definition, variation in a group and in a period (observed trends in the values to be accounted for).

Electronegativity: Definition, variation in a group and in a period (observed trends in the values to be accounted for), calculation of electronegativity by Pauling and Mulliken methods.

s- and p-block elements: Comparative study of s-Block Elements, diagonal relationships, an introduction to alkyls and aryls, salient features of hydrides, Action of Liquid Ammonia, Properties of solutions of alkali metals in Liquid Ammonia, Anomalous properties of Lithium and Beryllium.

To appreciate the wide variety in Physical and Chemical characteristics of p-Block elements and their compounds. Comparative study (including diagonal relationships) of groups 13-17 elements, compounds like hydrides, oxides, oxyacids and halides of groups 13-16. tetrasulphur tetranitride, basic properties of halogens, interhalogens and polyhalides.

Unit III: Chemical Bonding - I

Chemical bond as a basis for predicting the properties which should be expected for a given chemical substance. Ionic Solids & Ionic structures, radius ratio effect and coordination number, limitation of radius ratio rule, lattice defects, semiconductors, lattice energy and Born-Haber cycle, solvation energy and solubility of ionic solids, polarizing power and polarisability of ions, Fajan's rule, Metallic bond-free electron, valence bond and band theories. Weak interactions & Hydrogen bonding, van der Waals forces. Covalent Bond & Valence bond theory and its limitations, directional characteristics of covalent bond, various types of hybridization and shapes of simple inorganic molecules and ions. Valence shell electron pair repulsion (VSEPR) theory to NH_3 , H_3O^+ , SF_4 , ClF_3 , ICl_2 , and H_2O .

Unit IV: Molecular Orbital theory, boranes and Xenon compounds

Approaches to understand the properties and stabilities of molecules as viewed by different theories of bonding. Molecular orbital theory, basic ideas & criteria for forming M.O. from A.O., construction of M.O. by LCAO & H_2^+ ion, calculation of energy levels from wave functions, physical picture of bonding and antibonding wave functions, concept of σ , σ^* , π , π^* orbitals and their characteristics. Hybrid orbitals & sp , sp^2 , sp^3 ; calculation of coefficients of A.O.s used in these hybrid orbitals. Introduction to valence bond model of H_2 , comparison of M.O. and V.B. Models.

Discussion about homonuclear (He_2 , N_2 , O_2 , F_2 , C_2) and heteronuclear (CO and NO) diatomic molecules, bond Order and bond energy, percentage ionic character from dipole moment and electronegativity difference.

Hydrides of boron-diborane and higher boranes, borazine, borohydrides, fullerenes, carbides, silicates (structural principle), - Chemistry of xenon: structure and bonding in xenon compounds.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To develop the concept of good lab practices including safety, glasswares handling,
- chemicals handling, chemical/glassware waste management, error analysis, note
- book maintenance
- To strengthen the concepts of mole and stoichiometry
- To develop analytical skills of volumetric technique

COURSE CONTENT :

1. Calibration and handling of balances, pipette, burette, and standard flask. Basic principles underlying the preparation of solutions, knowledge of primary and standard substances, Indicators used in titrations, their working principles range and their uses. Concept of Molarity, Normality, Molality, Equivalent weight and related calculations.
2. Stoichiometry of neutralization reactions of Sulphuric, Hydrochloric and Nitric acid using sodium hydroxide solution.
3. Preparation of standard Sodium Carbonate solution, Standardisation of Hydrochloric acid and estimation of Sodium hydroxide present in the given solution.
4. Estimation of carbonate and hydroxide present in a mixture.

5. Estimation of Carbonate and Bicarbonate in a given mixture by double indicator method.
6. Estimation of ammonium chloride in a given solution by back titration
7. Estimation of oxalic acid present in the given solution using sodium hydroxide solution and pure crystals of potassium hydrogen phthalate.
8. Estimation of Ferrous ammonium sulphate present in the given solution using potassium permanganate solution and pure crystals of oxalic acid.
9. Estimation of iron(II) using Potassium dichromate with internal and external indicators.
10. Estimation of ferrous and ferric ions in a given mixture using potassium dichromate solution.
11. Standardisation of Sodium thiosulphate using potassium dichromate and estimation of copper by Iodometry.
12. Estimation of Copper in the given Copper salt by Iodimetry.
13. Estimation of total hardness of water using EDTA solution and pure crystals of Zinc sulphate.

Core Course 3A Mathematics

MSEL3 : CALCULUS - I AND MATRICES

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

At the end of the course students will be able to understand and to apply the concepts, principles and techniques of calculus and matrix theory in problem solving.

COURSE CONTENT:

Unit I: Differential calculus:

Limits revisited, Continuous functions, Discontinuous functions and types. Differentiation, Linear approximation theorem, Higher derivatives, Leibnitz's theorem. Monotone functions, Maxima and Minima, Concavity, Convexity and Points of inflection. Angle of intersection between two curves.

Differentiability theorems, Rolle's theorem, Mean Value theorems, Taylor's theorem, Maclaurin's theorem, Taylor's and Maclaurin's infinite series, Indeterminate forms.

Unit II: Integral Calculus:

The integral of a function, Techniques of integration, Integration of Rational Functions, Rationalizable Integrals.

Definite Integral, Properties, Definite integral as the limit of a sum, The fundamental theorem of Calculus, Reduction formulae, Area, Volume and Length.

Unit III: Matrices – I

Matrices of order $m \times n$, Algebra of matrices, Symmetric and Skew Symmetric, Hermitian and Skew Hermitian matrices and their standard properties, Determinants, Adjoint of a square matrix, Singular and non-singular matrices, Rank of a matrix, Elementary row / column operations, Invariance of rank under elementary operations, Inverse of a non-singular matrix by elementary operations.

Unit IV : Matrices - II

System of m -linear equations in n -unknowns, Matrices associated with linear equations, Trivial and non-trivial solutions, Criterion for existence of non-trivial solution of homogeneous and non-homogeneous systems and their uniqueness.

Characteristic equation of a square matrix, Eigen values and Eigen vectors, Finding them for a real symmetric matrix, Diagonalization of a real symmetric matrix, Cayley ó Hamilton theorem and its applications.

Ability Enhancement Course 1 A : Language

MSE I.4A : HINDI

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalize grammar rules so as to facilitate fluency in speech and writing.
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction Mode :

Lecture cum discussion, group discussion, panel discussion, seminar group work, library work.

COURSE CONTENT :

Unit I: History of Language and Literature-1

Hindi Bhasha aur Sahitya ka Itihas [Aarmbha se Lekar 1857 Tak]

Unit II: Short Story-1 [Pre-Independence Literature]

Swatantratapurva Hindi Kahani Ka Vikas

1. **Chandradhar Sharma Guleri-** Usne Kaha Tha
2. **Jayshankar Prasad-** Puraskar
3. **Premchand-** Panch Parmeshwar
4. **Jainendra-** Ek Raat

Unit III: Short Story-2 [Post-Independence Literature]

Swatantrayottar Hindi Kahani Ka Vikas

1. **Mohan Rakesh-** Uski Roti
2. **Kamleshwar-** Dilli Mein ek Maut
3. **Phanishwar Nath Renu-** Teesari Kasam
4. **Bhism Sahani-** Cheef ki Dawat

Unit IV: Communication skill:

Group Discussion [Samooch Charcha]

Introduction ó Definition ó Characteristics ó Types of Discussion ó Round table, Symposium, Lecture forum etc. ó Relevance of Group Discussion ó Exercises.

Reference:

1. Hindi Sahitya Ka Itihas: Ramchandra Shukla Rajkamal Prakashan, Delhi
2. Hindi Sahitya Ka Itihas: Dr Nagendra, Mayoor Paperbacks, Delhi
3. Hindi Sahitya Ki Bhoomika: Hajari Prasad Divedi Rajkamal Prakashan, Delhi
4. Hindi Sahitya Ka Adikaal: Hajari Prasad Divedi Rajkamal Prakashan, Delhi
5. Hindi Sahitya Ka Udbhav Aur Vikas: Hajari Prasad Divedi Rajkamal Prakashan, Delhi
6. Hindi Sahitya Ka Ateet: Viswanath Prasad Mishra, Rajkamal Prakashan, Delhi
7. Bhakti Aandolan Aur Bhaktikavya: Shivkumar Mishra, Lokbharti Prakashan, Delhi

20. Kahani Anubhav aur Abhivyakti: Rajendra Yadav, Vani Prakashan, Delhi
21. Kahani- Swaroop aur Samvedana: Rajendra Yadav, Vani Prakashan, Delhi
22. Kahani-Sankramansheel Kala: Khagendra Thakur, Vani Prakashan, Delhi
23. Aadhoonik Hindi Kahani: Laxminarayan Laal, Vani Prakashan, Delhi
24. Hindi Kahani-Vakt Ki Shinakht aur Srijan ka Raag: Rohini Agarwaal, Vani Prakashan, Delhi
25. Kahani Samkaleen Chunauiyan: Dr Sambhoo Gupt, Vani Prakashan, Delhi
26. Effective Group Discussion: Theory and Practice, Gloria J. Galanes, McGraw Hill Company
27. <http://www.hindisamay.com>

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects), tests & assignments.

C1-10 (test) + (seminars, projects, assignments etc) =15

C2-10 (test) + (seminars, projects, assignments etc) =15

Total =50

MSE I.4B KANNADA

Credits 3 (2L+1T)
Contact Hours per week: 4
Exam duration: 2 Hrs

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalize grammar rules so as to facilitate fluency in speech and writing.
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

COURSE CONTENT :

Unit I : Descriptive Grammar

Sandhi (Agama, Adesa, Dwitva, etc) A suitable grammar book on Sandhi will be followed in the classroom.

Reference: Kannada Kaipidi, Prasaraᅡa Publication, University of Mysore.

Unit II: Functional Language

- Group Discussion :** Introduction ó Definition ó characteristics ó types of discussions ó round-table symposium ó panel ó lecture forum etc. ó relevance of Group Discussion ó exercises.
- Conversation :** Definition ó styles of conversation ó formats of conversation ó telephonic conversation, etc. ó Exercises

Reference: Effective Group Discussion ó Theory and Practice by Gloria J.Galanes, McGraw Hill Company (Publishers).

Unit III: Modern Poetry

- Kalki ó Kuvempu
- Sabhyata Devate ó Kuvempu
- Balegaarana Haadu óK S Narashimha Swamy
- Patitha Pavana ó Pu Thi Na
- Nanna avathara ó M Gopalakrishna Adiga
- Hakki Haruthide Nodidraí óDA. RA.Bendre

Selected from Aunika Kannada Kavya Part I, University of Mysore.

Unit IV: Prose : Collection of short stories

Collection of Short Stories

- i. Mochi ó Bharteepriya
- ii. Kallina Kolalu ó Chaturanga
- iii. Radheya Kshame ó Ananda
- iv. Cappaligalu ó Sara Abubakkar

Selected from Sanna Kathegalu, Mysore University, Mysore

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials,(seminars, projects etc.), tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

MSE I.4C MALAYALAM

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Unit I : Descriptive Grammar - Sandhi

Ref : Kerala Panineeyam By A R Rajaraja Varma, NBS, Kottayam

Unit II: Functional Language

Group Discussion- Introduction ó Definition ó characteristics ó types of discussions ó round-table symposium ó panel ó lecture forum etc. ó relevance of Group Discussion ó exercises

Conversation - Definition ó styles of conversation ó formats of conversation ó telephonic conversation, etc. ó Exercises

Reference: Effective Group Discussion ó Theory and Practice by Gloria J.Galanes, McGraw Hill Company (Publishers).

Unit III: Modern Poetry

Lessons from ò Kavya Mala, University of Kerala publications,Kerala

1. Mazhuvinte Katha
2. Sabhalamee yaatra

3. Shanta
4. Kochiyile Vrikshangal
5. Bharatheeyam

Unit IV: Literature

Collection of Short Stories:

From Katha malika, University of Kerala publications

1. Kadal theerathu
2. Shavadaham
3. Ammayum makanum
4. Perumazhayude pittenu
5. Chaya

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc,) tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

ABILITY ENHANCEMENT COURSE - AEC 1 A: LANGUAGE

MSE I. 4D Tamil

Credits 3 (2L+1T+0P)

Contact hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C3:50

Objectives:

- (i) To develop the students to acquire basic skills in functional language
- (ii) To develop independent reading skills and reading for appreciation the literary works
- (iii) To internalize grammar rules so as to facilitate fluency in speech and writing
- (iv) To develop functional and creative skills in language
- (v) To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region

Mode of Interaction:

Theoretical aspects will be discussed through lecture and discussion mode. Activities like enacting a drama scene, etc. will be conducted in the class room as a practice to conversation skills. Students will be given activities to prepare different types of letters (Official, Demy official, personal letters etc.). Group discussion will be conducted in the classroom on various

topics. With the help of newspapers, the NEWS Reporting abilities will be enhanced among the students in class room. Appreciation of literary works will be practiced through group work and seminars.

COURSE CONTENT:

Unit I: Descriptive Grammar:

Sandhi (Ezhuthu Elakkanam) Muthal Ezhuthugal, Sarpezhuthugal, Punarchi

Unit II: Functional Language:

Group Discussion: Introduction-Definition-Characteristics-Types of Discussion-Round Table-Symposium-Panel-Lecture forum etc., - Relevance of Group Discussion - Exercises

Conversation: Definition - Styles of conversations - Formats of conversations - Telephonic conversations, etc., - Exercises

Unit III: Poetry: Modern Poetry:

Ikkala Kavithaikal,
Kannan En Sevagan,
Thiru Arutpa

Unit IV: Prose: Collection of Short Stories:

Naatru - (Collection of Short Stories)

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, seminars, projects, Tests and assignments.

C1-10(Test)+ 15(seminars, projects, assignments etc.) =25

C2-10(Test)+ 15(seminars, projects, assignments etc.) =25,

Total=50.

Students will be given activities to prepare different types of letters (Official, Demy official, personal letters etc.). Group discussion will be conducted in the classroom on various topics. With the help of newspapers, the NEWS Reporting abilities will be enhanced among the students in class room. Appreciation of literary works will be practiced through group work and seminars.

COURSE CONTENT:

Unit I: Functional language:

Letter writing: Characteristics ó Definition ó Types of Letters ó E-mails ó Language of Letters ó Exercises

News Reporting: Characteristics ó Definition ó Language of NEWS Reporting - Models ó Role of Median NEWS Reporting ó Exercises.

Unit II: Communication skills in language:

Group discussion: Introduction ó Definition ó Characteristics ó Types of Discussion ó Round table, Symposium, Lecture forum etc. ó Relevance of Group Discussion ó Exercises.

Interview: Characteristics ó Definition ó Types of Interviews ó Preparation for Interview ó Models ó Exercises.

Unit III: Modern Poetry and Folk literature:

Desha Charitralu ó Sree Sree (From Maha Prasthanam, Visalandhra Publications, Hyderabad).

Folk Songs from -Rayalaseema Raagaluø & -Triveniø Published by Telugu Academy, Hyderabad,

Unit IV: Genre of literature: (Piece of a Drama/Portion of Autobiography)

Selected scenes from drama -**Kanyashulkam**' by Gurazada Apparao (available at Visalandhra Publication, Hyderabad).

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc.), tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc.) =25

C2-10 (test) +15 (seminars, projects, assignments etc.) =25

Ability Enhancement Course 1B : English

MSEL5 : LANGUAGE PROFICIENCY IN ENGLISH

Credits 3 (2L+1T+0P)

Contact Hours per week: 4

Exam duration: 2 Hrs.

Max. Marks: 100

C1+C2:50

C 3: 50

Objectives:

Students develop proficiency in English which equips them to:

- understand the demands of audience, subject, situation and purpose and the use of language for effective communication.
- analyse language in context to gain an understanding of grammar, vocabulary, spelling, punctuation and speech.
- examine authentic literary and non-literary texts and develop insight and appreciation.
- gain an understanding of study and reference skills.
- plan, draft, edit and present a piece of writing.

COURSE CONTENT:**Unit I: Descriptive Grammar**

1. Tenses:

- a) Simple Present: Habitual action, General truths, Future time, Verbs of state, Verbs of perception, Verbs of sensation, Narration, Use of simple present for demonstration and commentaries, Present perfect, present perfect continuous, Present continuous also indicative of future action.
- b) Simple past: Past time reference, Present time reference, Future time reference, Past continuous, Past perfect, past, perfect continuous

Unit II: Skills in Communication

1. Negotiating a point of view ó learning to talk persuasively so as to get across one's perspective.
2. Debating on an issue ó agreeing / disagreeing.

Unit III: Study and Reference Skills

Note making; Note-taking; Summary writing.

Comprehension Skills

Extracts from literary, scientific and educational journals.

Unit IV: Skills of Communication

Advanced Writing Skills, writing advertisement copy; Writing a project proposal and Writing Resume, sending an application.

Listening effectively; Talking about one self (likes, dislikes, interests, beliefs, personality traits, ambitions); Expressing an opinion about personal belief on a current issue. (Ability to speak fluently for 3-4 minutes. Focus would be on organized, logical, sequential presentation of thought through spontaneous speech).

Suggested Activities:

- Politeness competitions- students with partners take turns in using a given number of utterances for negotiation / requests/complaints/small talk.
- Students introduce themselves though using symbols/ metaphors.
- Students collect newspaper/magazine cuttings on topical and/ or cultural issues of interest-write and share their opinion with peers.

GENERIC ELECTIVE 1

MSEI.6 : ENVIRONMENTAL EDUCATION

Credits: 2 (1L+ 1T +0P)

Contact hrs per week: 3

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

The student-teacher will be able to:

- Develop awareness and concern for environmental issues and sustainable development.
- Acquaint with the concept, objectives and importance of Environmental Education (EE).
- Introduce multi-disciplinary approach to environmental problems.

- Acquaint how to design, develop and implement strategies for Environmental Education (EE).
- Acquaint with the different methods and techniques of teaching Environmental Education (EE).
- Undertake practical activities for school cleanliness, neighbourhood cleanliness drive, and healthy personal hygiene in relation to Swachh Bharat and healthy living. (These activities would have been observed and practiced during the 16-week Internship in schools)
- Inculcate environment friendly values through EE.

COURSE CONTENT :

Unit I : Meaning and Concepts

Meaning as evident from Indian literature and contemporary texts, Definition, Objectives, Importance of EE with special reference to Indian view of life and sustainable development Sustainable Development Goals.

Unit II: Basic Environmental Concepts

Ecosystem, Biotic and Abiotic factors, Inter-relationship, Factors affecting environment, population, air, water, soil, noise; Acid rain, Greenhouse effect, Extinction of species, Soil erosion, Energy crisis, Environment and sustainable development; Role of specially designed strategies for cleanliness, Role of mass media and technology in developing awareness about environmental problems and its prevention, Role of NGO and governmental organizations in developing EE.

Unit III: Curriculum, Methods and Techniques of EE

Designing, developing strategies for EE, Evaluation of EE resources materials; Field trips, Role play, Poster presentation, Quiz, Debate, Projects, Swachh Bharat Abhiyan sustainability

Unit IV: Value Development through EE as in Indian View of Life

Practical work in relation to school cleanliness and neighbourhood watch, Text book evaluation for contents on environment and cleanliness, Field trip on environmental degradation, and school and neighbourhood cleanliness, Visit to nature park, industry polluted areas.

Practicum

- Study sustainable development initiative in the country.
- Visits to polluted sites and preparation of report.
- Interviewing people and reporting the inconveniences due to any of the environmental problems.
- To study innovations done by to improve the environment of that area.
- To study the implementation of Environmental Education Programmes in schools/stated country.
- To prepare models and exhibits for general awareness of public regarding environmental hazards.
- To prepare a programme for environmental awareness and school cleanliness, and to

- conduct the same with school children.
- To visit industries and study alternative strategies of Environmental pollution management.
 - To prepare a resource material on any of the environmental problems along with a suitable evaluation strategy. To prepare quizzes and games on environmental issues.
 - Organise Swachh Bharat Abhiyan as sustainable activity.
 - To study the contribution of NGOs in improving the environment of the city. Classroom.
Prepare posters/chart on Sustainable Development Goals.
- * In addition, school and community based activities may be organised.

Evaluation Strategies

1. Assignments/sessional work.
2. Unit tests.
3. Portfolio assessment of exhibits, model of charts prepared by student teachers.
4. Seminar presentations followed by group discussion.

PROFESSIONAL EDUCATION COURSES

MSEI.7 :Language Across Curriculum

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

The student teacher will be able to:

- Understand nature, function and role of different kinds of languages in curriculum transaction
- Acquaint with obstacles in language usage while using the language and ways to overcome them.
- Understand importance and use of first and second language, multilingualism and impact of culture.
- Acquire knowledge about the communication process and verbal and nonverbal communication skills.
- Familiarize the students with of barriers to (Listening, Speaking, Reading, Writing) LSRW skills and activities for developing these skills.

COURSE CONTENT :

Unit I Nature and Functions of Language

Language ó Meaning and Concept, Functions of Language, Role of Language in Curriculum Transaction, Theories of Language Learning, Barriers in Using a Language & Strategies to Overcome them, Verbal and Non-verbal communication

Unit II: Language across Curriculum in the Indian Context

Language as a determinant of Access, Language proficiency and studentsø attitude towards Learning and Schooling/ dropouts, Language/oral proficiency and critical thinking

Unit III: Strategies for Multilingual Classrooms

Role Plays and Discussions as tools for learning, -Questioningø to stimulate thought and to encourage and motivate to respond, Preparing Subject/content based exercises in reading, comprehension and usage, Sensitizing, Reflecting and Facilitating, Understanding the learner and his/her language background, Creating sensitivity to the language diversity, Using oral & written language in the classroom for optimal learning

Unit IV: Developing Receptive Skills and Productive Skills

Barriers to Listening Skills, Activities for Developing Listening Skills, Barriers to Reading Skills, Activities for Developing Reading Skills, Barriers to Writing Skills, Activities for Developing Writing Skills, Need and Importance of Classroom Discourse. Barriers to Speaking Skills, Activities for Developing Speaking Skills

Practicum

1. School Visit to Find out Communication Problem/Apprehension in Students
2. Designing Games and Exercises for Developing Listening, Speaking, Reading and Writing Skills

3. Assignments on Developing Writing Skills- Summary, Letter, Paragraph, Essays, Speech
4. Assignments on Developing Speaking Skills ó Oral Presentations, Debate, Elocution, Discussion, Brain-storming

Assignments on Developing Listening Skills ó Listening to speech, directions

* In addition, school and community based activities may be organized with provisions for visits to innovative centres of pedagogy and learning, innovative schools, educational resource centres, etc. Action research based on teaching learning and school and community could be conducted.

SECOND SEMESTER

Core Course I B Physics

MSEIL.1 :ELASTICITY, WAVES, HEAT, AND THERMODYNAMICS

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

- The students will be able to understand principles of elasticity, waves, heat, thermodynamics and classical statistical mechanics and apply its principles to explain natural physical phenomena.
- The teacher will enable the students to identify and modify alternative conceptions in the domains of elasticity, waves, heat, thermodynamics and classical statistical mechanics.

COURSE CONTENT:

Unit I: Elasticity

Elasticity: Hooke's law - Stress-strain diagram - Elastic moduli- Dependence of Young's modulus on temperature and its applications, Relation between elastic constants - Poisson's Ratio-Expression for Poisson's ratio in terms of elastic constants - Elastic potential Energy, Work done in stretching and work done in twisting a wire - Twisting couple on a cylinder - Determination of Rigidity modulus by static torsion - Torsional pendulum-Determination of rigidity modulus and moment of inertia - q , and by Searle's method.

Unit II: Waves

Review of Mechanical waves, types of waves, travelling waves, the superposition principle, wave speed, power and intensity in wave motion. Transverse waves on a string- travelling and standing waves on a string. Normal Modes of a string. Group velocity, Phase velocity. Plane waves. Spherical waves, interference of waves, standing waves, resonance, Doppler effect. Analysis of complex waves. Fourier Series, Application to square wave, triangular wave.

Unit III: Thermodynamics-I

Zeroth Law of thermodynamics and temperature. First law and internal energy, conversion of heat into work, Various Thermodynamical Processes, Applications of First Law: General Relation between C_p & C_v , Work Done during Isothermal and Adiabatic Processes, Compressibility & Expansion Coefficient. Reversible & irreversible processes, Second law & Entropy, Carnot's cycle & theorem.

Unit IV: Thermodynamics-II

Entropy changes in reversible & irreversible processes, Entropy-temperature diagrams. Third law of thermodynamics, Unattainability of absolute zero. Thermodynamic potentials. Enthalpy, Gibbs, Helmholtz and Internal Energy functions, Maxwell's relations & applications - Joule-Thompson Effect, Clausius-Clapeyron Equation, Expression for $(C_P - C_V)$, C_P/C_V , TdS equations.

10. M. N. Saha and B. N. Srivastava, Treatise on Heat, The Indian Press.
11. A. Kumar and S.P. Taneja, Thermal Physics, R. chand Publications, 2014.

PRACTICALS

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments out of the following).

1. Study of the oscillations of a column of water as a function of its length and study of damped oscillation.
2. To determine the velocity of sound at 0° C and the end correction by setting up a resonance column (first resonance length).
3. Study of torsional oscillations of a loaded wire and determination of the rigidity modulus of the material of the wire.
4. Study of transverse vibrations on a sonometer. To determine the frequency by (i) absolute method, (ii) Comparison method.
5. Study of Newton's law of cooling.
6. Determination of solar constant.
7. J by Joules Calorimeter.
8. Study of the rate of flow of water through a capillary tube under different pressure heads.
9. Study of the relation between pressure and volume of a gas at constant temperature
10. Study of variation of pressure and temperature of a gas at constant volume.

11. To study the variation of thermo emf across two junctions of a thermocouple with temperature
12. Surface Tension-capillary rise method-radius by vernier microscope
13. Study of the motion of a steel sphere in a viscous liquid and determination of the coefficient of viscosity of the liquid.
14. Melde's experiment of determination of frequency.
15. Lees and Charlton disc of Thermal conductivity of a bad conductor.
16. Specific heat of a solid by the method of mixtures.

Core Course 2 B :Chemistry

MSEII.2 :STATES OF MATTER AND NUCLEAR CHEMISTRY

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives :

- Illustrate how a scientific model can be constructed based on the experimental observations of the behaviour of gases and to explain the properties in terms of microscopic organization.
- To develop an understanding of properties of Gases, Liquids, colloids and Solutions.
- To understand the shapes of molecules in terms of symmetries and to relate the properties of matter in solid state to the structure.
- To develop an understanding of the concept of acids and bases, characteristics of non-aqueous solvents.
- To familiarize radioactivity as a nuclear phenomenon in understanding the nuclear reactions

COURSE CONTENT

Unit I : Gaseous and Solid State

Review of kinetic theory of gases and van Der Waals equation. Qualitative discussion of the Maxwell's distribution of molecular velocities, collision number, mean free path and collision diameter. Liquefaction of gases based on Joule-Thomson effect.

Explanation of the macroscopic properties of solids in terms of structure, bonding and defects. Definition of space lattice, unit cell.

Laws of crystallography – (i) Law of constancy of interfacial angles, (ii) Law of rationality of indices, (iii) Law of symmetry. Symmetry elements in crystals.

X-ray diffraction by crystals. Derivation of Bragg equation. Predicting crystal structure. Defects in solids, Dielectric properties. Review a perfect gas connecting temperature with kinetic theory. Postulates of kinetic theory of gases, deviation from ideal behaviour, van der Waals equation of state. Critical Phenomena : P-V isotherms of real gases, continuity of states, the isotherms of van der Waals equation, Derive a relationship between critical constants and van der Waals constants, the law of corresponding states, reduced equation of state.

Molecular Velocities: Root mean square, average and most probable velocities. Qualitative discussion of the Maxwell's distribution of molecular velocities, collision number, mean free path and collision diameter. Liquefaction of gases (based on Joule-Thomson effect).

Unit II : Liquids and Colloids

Accounting the Isotropic and intermediate behaviour of liquids as a link between solids and gases. Also tracing the role of liquids as solvents and reaction regulators. Intermolecular forces, structure of liquids (a qualitative description).

Structural differences between solids, liquids and gases.

Liquid crystals: Difference between liquid crystal, solid and liquid. Classification, structure of nematic and cholesteric phases. Thermography and seven segment cell.

Definition of colloids, classification of colloids.

Solids in liquids (sols) : Properties of kinetic, optical and electrical; stability of colloids, protective action, Hardy's Schulze law, gold number.

Liquids in liquids (emulsions) : Types of emulsions, preparation. Emulsifier.

Liquids in Solids (gels) : Classification, preparation and properties, inhibition, general applications of colloids.

Unit III : Acids and bases

A discussion on changing concepts of acids and bases involving concentrations and effects of solvent medium. Arrhenius, Bronstead-Lowry and Lewis concepts of acids and bases.

Hard and Soft Acids and Bases (HSAB) -Classification of acids and bases as hard and soft. Pearson's HSAB concept, acid-base strength and hardness and softness. Symbiosis, theoretical basis of hardness and softness, electronegativity and hardness and softness.

Non-aqueous Solvents- Physical properties of a solvent, types of solvents and their general characteristics, reactions in non-aqueous solvents with reference to liquid NH_3 and liquid SO_2 .

Unit IV : Nuclear Chemistry

Fundamental particles of nucleus, Concept of Nuclides, isotopes, isobars and isotones (with

specific examples), nuclear forces, qualitative idea of stability of the nucleus (n/p ratio), binding energy, packing fraction, Natural and artificial radioactivity, Radioactive Disintegration series, half life, average life, nuclear reactions, artificial transmutation, nuclear fusion and fission. Nuclear fusion as a future source of energy, Nuclear reactors, Application of Radioactivity and Radio isotopes as tracers in chemistry, , biology, medicine, agriculture and industry. Isotope dilution analysis, Neutron activation analysis.

5. Nuclear Chemistry V.N.Darls Sultan Chand & sons.
6. Essentials of Nuclear Chemistry Arnikaar, Hari jeevan, 4th edition, New age international.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To evolve a scheme of qualitatively analyzing an inorganic mixtureclassification of anions and cations.
- Quantitative inorganic analysis of mixtures containing four radicals.
- To develop skills of synthesizing coordination compound

COURSE CONTENT:

1. To arrive at a scheme of analysis of anions and cations based on solubility products and common ion effect: Systematic qualitative analysis by micro-scale methods of a mixture containing two acidic and two basis radicals from the following list(not more than one interfering radical):
Cations: lead, copper, bismuth, cadmium, tin, antimony, iron, aluminium, zinc, cobalt, nickel, calcium, strontium, barium, magnesium, sodium potassium, ammonium.
Anions: carbonate, bicarbonate, acetate, fluoride, chloride, bromide, iodide, nitrate, sulphate, borate, oxalate, phosphate.
2. Preparation of the complexes:
Tris(thiourea)copper(I)sulphate monohydrate, Mercury tetra thiocyanato cobaltate(II), simple cobalt and chromium complexes and their analysis.

References:

1. A Text Book of Quantitative Inorganic Analysis, A .I . Vogel
2. Advanced Practical Inorganic Chemistry, Gurudeep

Core Course 3 B Mathematics

MSEIL.3 :CALCULUS – II, ANALYTICAL GEOMETRY AND NUMBER THEORY

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

At the end of the course students will be able to understand the concepts of number system and analytical geometry and principles and techniques of calculus of several variables in problem solving.

COURSE CONTENT:

Unit I: Partial Derivatives – I

Functions of two or more variables, Limits, Continuity, Partial derivatives, Differentiable functions, Linear approximation theorem. Homogeneous functions, Euler's Theorem, Chain Rule, Change of Variable, Directional Derivative, Partial Derivatives of higher order, Taylor's Theorem, Derivative of Implicit functions, Jacobians.

Unit II: Analytical Geometry – I

Cartesian coordinates in three dimensional spaces, Relation between Cartesian coordinates and position vector, Distance formula (Cartesian and Vector form), Direction cosines, Direction ratios, Projection on a Straight line, angle between two lines, Area of Triangle, Volume of a tetrahedron. Straight line, equations of straight lines (Cartesian and Vector form).

Unit III: Analytical Geometry – II

Planes, Equations of Planes (Cartesian and Vector form), Normal form, Angle between planes, Coaxial planes, Parallel and Perpendicular planes, Length of a Perpendicular from a point to a plane, Bisectors of angles between two planes, Shortest distance between two skew lines. Translation and Rotation of Cartesian axes in plane, Curves of second degree, Discriminant and Trace, Theorem on Discriminant and trace, Classification theorem on second degree equation.

Unit IV: Theory of Numbers

Division Algorithm ó Prime and Composite Numbers ó proving the existence and uniqueness of GCD and the Euclidean Algorithm ó fundamental theorem of Arithmetic - the least common multiple ó congruences ó linear congruences ó Wilson's theorem ó Simultaneous congruences ó Theorem of Euler ó Fermat and Lagrange.

12. Elementary Number Theory by David M. Burton.
13. Elementary Number Theory with applications (2nd edition) by Thomas Koshy, Academic Press.

ABILITY ENHANCEMENT COURSE AEC 1B : LANGUAGE

MSE II.4A: HINDI

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalise grammar rules so as to facilitate fluency in speech and writing.
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction mode :

Lecture cum discussion, group discussion; panel discussion, seminar group work , library work.

COURSE CONTENT:

Unit I: History of Language and Literature-2

Aadhunik Hindi Sahitya ka Itihas [1857 Se Lekar Ab Tak]

Unit II : Modern Poetry-1 [Pre-Independence Literature]

Swatantratapurva Hindi Kavita Ka Vikas

1. **Maithilisanan Gupt-** Nar Ho Na Nirash Karo Man ko
2. **Jayshankar Prasad-** Himadri Tung Sring Se Prabudh Sudhha Bharti
3. **Suryakant Tripathi Nirala-** Joohi ki Kali
4. **Sumitranandan Pant-** Drut Jharo Jagat Ke Jirn Patra
5. **Mahadevi Verma-**MaiNeer Bhari Dhukh Ki Badli,

Unit III : Modern Poetry-2 [Post-Independence Literature]

Swatantrayottar Hindi Kavita Ka Vikas

1. **Gajanan Madhav Muktibodh**- Bhoor Galti,
2. **Kedarnath Agrawal**- Chandra Gahna Se Lautati Ber
3. **Raghveer Sahay**- Aapki Hansi
4. **Nagarjun**- Aakal Aur Uske Bad
5. **Kedarnath Singh**- Aakal Me Saras

Unit IV : Communication skills

Conversation [Varta]:

Characteristics ó Definition ó Styles of conversation ó Higher order skills-Telephonic conversation, Role Play, ó Models, etc. ó Exercises.

References:

23. Prayojanmoolak Hindi: Sidhant aur Prayog- Dangal Jhalte, Vani Prakashan, Delhi
24. <http://www.hindisamay.com>

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc.), tests & assignments.

C1-10 (test) + (seminars, projects, assignments etc) =15

C2-10 (test) + (seminars, projects, assignments etc) =15

Total =50

MSE II.4B : KANNADA

Credits 3 (2L+1T)
Contact Hours per week: 4
Exam duration: 2 Hrs

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalize grammar rules so as to facilitate fluency in speech and writing.
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

COURSE CONTENT :

Unit I : Descriptive Grammar

Samasa and Alankara

Reference: Kannada Kaipidi, Prasaranga Publication, University of Mysore

Unit II : Functional Language

- a. **News reporting** : Characteristics ó definition ó language of news reporting ó model of news report ó patterns ó role of media in news reporting ó exercises.
- b. **Interview** : Characteristics ó definitions ó preparation for interview ó various types of interviews (business ó employment ó literary etc) ó exercises.

References: a) Fundamentals of Journalism, Report Writing and Editing by R.Thomas Berner, Marquette Books LLC, Washington.
b) The Perfect Interview by Max Eggert, Random House, UK.

Unit III: Medieval Poetry

- i) Enna Devange Jagavella Henu Noda - Akkamahadevi
- ii) Kaayuttirdanirulu Hagalennade-Raghavanka
- iii) Parahimseyam Madi Manavam Baldapane - Laksheesha
(**Kaavya Sanchaya – 3- Mysore University, Mysore**).

Unit IV : Collection of Essays

- i. Chatavannu kurithu ó B G L Swamy
- ii. Samakalina Prajneó G S Shivarudrappa
- iii. Namma Praachiinara Jivana Moulyagalu ó T V Venkatachala Shasthri
- iv. Janapada Geethe ó C P K

(Selected from Gadya Vihara Part III) Mysore University, Mysore

Suggested Activities

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc), tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

MSE II.4C : MALAYALAM

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Unit I. Descriptive Grammar

Samasa and Alamkara

(Ref : Bhashaa bhushanam and Kerala Paanineeeyam , NBS , Kottayam)

Unit II : Functional Language

1. News reporting- Characteristics ó definition ó language of news reporting ó model of news report ó patterns ó role of media in news reporting ó exercises
2. Interview- Characteristics ó definitions ó preparation for interview ó various types of interviews (business ó employment ó literary etc) ó exercises.

References: a) Fundamentals of Journalism, Report Writing and Editing by R.Thomas Berner, Marquette Books LLC, Washington.

1. The Perfect Interview by Max Eggert, Random House, UK.

Unit III:Poetry - Medieval

VEENA POOVU By Kumaaran ashan, Published by Devi Book Stall, Kodungalloor

Unit IV: Collection of Essays

Lessons from ò Bharatha Paryatanam By Kutti Krishna Maraar, Published by Maraar Sahitya Prakasha , Kozhikode

1. Yudhathinte parinaamam
2. Amba
3. Karnante arangettram
4. Markandeyante chiri

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc), tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

ABILITY ENHANCEMENT COURSE AEC 1B: LANGUAGE

MSE II. 4D: Tamil

Credits 3 (2L+1T+0P)
Contact hours per week: 4
Exam duration: 2 Hrs

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- (i) To develop the students to acquire basic skills in functional language
- (ii) To develop independent reading skills and reading for appreciation the literary works
- (iii) To internalize grammar rules so as to facilitate fluency in speech and writing
- (iv) To develop functional and creative skills in language
- (v) To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region

Transaction mode:

Lecture cum discussion, group discussion; panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Aspects of Style:

Styles of writing, Idioms, Phrases and Proverbs

Unit II: Functional Languages:

News Reporting: Characteristics-Definition-Language of news reporting- model of news reporting-patterns-role of media in news reporting- exercises.

Interview: Characteristics-Definition-preparation for interview-various types of interviews(business-employment-literary-etc)-exercises

Unit III: Medieval Poetry:

Periya Puranam -Selection of poems

Naladiyar-Selection of poems

Unit IV: Collection of Essays:

Ariviyal Tamilzhakkam-SV Shanmugam (First three Essays)- Tamil Nenjam-Dr Mu. Varatharajan (First three essays)

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the Teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, seminars, projects, Tests and assignments.

C1-10(Test)+ 15(seminars, projects, assignments etc.) =25

C2-10(Test)+ 15(seminars, projects, assignments etc.) =25

Total=50.

References:

6. The perfect interview by Max Eggert, Random house, UK.

ABILITY ENHANCEMENT COURSE AEC 1B: LANGUAGE**MSE II. 4E Telugu**

Credits 3 (2L+1T+0P)

Contact hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Objectives:

- (i) To enable the students to acquire basic skills in functional language.
- (ii) To develop independent reading skills and reading for appreciating the literary works
- (iii) To internalize grammar rules so as to facilitate fluency in speech and writing
- (iv) To develop functional and creative skills in language.

- (v) To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction mode:

Lecture cum discussion, group discussion; panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Functional language:

Essay Writing: Characteristics ó Definition ó Format of Essays ó Types of Essays (Literary, Scientific, etc.) ó Models ó Exercises.

Translation: Characteristics ó Definition ó Need of Translation ó Translation Models ó Exercises (From English to Regional Languages).

Unit II: Communication skills in language:

Conversation: Characteristics ó Definition ó Styles of conversation ó Higher order Skills- Telephonic conversation, Role Play, ó Models, etc., ó Exercises.

Debate: Characteristics ó Definition ó Need of Debate ó Technique to conduct Debates, etc. ó Exercise.

Unit III: Ancient poetry and medieval poetry:

Damayanthee Swayamvaram by Nannaya (First 18 Poems)

Sathyabhama Santhwanam by Nandi Timmana (Poems 82 to 104)

(From Telugu Sahithya Sravanthi, by Prsaranga, University of Mysore, Mysore).

Unit IV: Genre of literature: (Prose: Literary Work)

Andhrula Sanghika Acharamulu by Khandavalli Lakshmi Ranjanam.

Telugu Samethalu by Nayani Krishna Kumari

(From Telugu Sahithya Sravanthi, by Prasaranga, University of Mysore, Mysore).

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc.), tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc.) =25

C2-10 (test) +15 (seminars, projects, assignments etc.) =25

Total =50

Ability Enhancement Course AEC 2B : English

MSEIL.5 : LANGUAGE PROFICIENCY IN ENGLISH-1I

Credits 3 (2L+1T+0P)
Contact Hours per week: 4
Exam duration: 2 Hrs

Max. Marks: 100
C1+C2:50
C 3:50

Objectives :

Students develop proficiency in English which equips them to:

- understand the demands of audience, subject, situation and purpose and the use of language for effective communication.
- analyse language in context to gain an understanding of grammar, vocabulary, spelling, punctuation and speech.
- examine authentic literary and non-literary texts and develop insight and appreciation.
- gain an understanding of study and reference skills.
- plan, draft, edit and present a piece of writing.

COURSE CONTENT:

Unit I: Descriptive Grammar

Function of Auxiliaries; Modals; Question form
Clauses: Noun Clause; Reported Speech and Change of Voice.

Unit II: Development of Language Competence

To be based on the use of multiple texts which address issues of multiculturalism, gender, racism and texts which relate with current issues and contemporary trends. Short stories, comic strips, cartoons and animations (both print and non-print media) to be used. Speeches of famous persons, diaries, travelogues can also be used.

Unit III: Writing for Functional Purposes

Letter-writing (Professional / Personal)

Unit III: Creative Skills in Writing

Writing dialogues, poems and essays

Unit IV: Basic Phonetics

Sounds of English language, intonation and transcription using IPA.

PROFESSIONAL EDUCATION COURSES

MSE II.6: CONTEMPORARY INDIAN EDUCATION

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

The course enables the student teachers to:

- Understand different perspectives of Education.
- Analyse the concept of Education and its related terms
- Analyse the Aims of Education and their determinants
- Reflect on the educational ideas and systems of various thinkers and develop the ability to theorize educational practices;
- Collect evidences for the influence of socio-cultural aspects on Education
- Analyse the role of Education on society by gathering various evidences and illustrations
- Understand and appreciate the need of autonomy to teacher and learners
- See the relationship between autonomy, accountability, and commitment
- Arrive at a list of qualities of a committed teacher through discussions.

COURSE CONTENT:

Unit I: Education: Concept, Nature, and Purpose

Education as concept and its distinct nature; Classical, Liberalists and Progressivists view on Education; Analytical concept of education - education as a normative concept; Education as a family of Processes; Education as worthwhile activity; Cognitive and normative dimensions of education; Education and Educated person;

Education as System; Modes of education- formal, informal, non-formal;

Education and its related concepts- Training, Instruction and teaching

Education: Purpose(s) and Determinants - Determinants of Purpose-individual, Community, Religion, State and Market; Brief historical inquiry into purposes and determinants of education (from ancient India to contemporary India); social context of purposes of education

Education as a Discipline and Interdisciplinary in nature

Aims of Education from ancient to contemporary Indian society

Education as value development

Determinants of Aims of Education in emerging India

Unit II: Education and Socio-cultural context

Education as an instrument of social change; Influence of education on society and family; Socio-cultural influences on the aims of education; Emerging trends in societies and their influence on education

Education and Development

Globalization and Internationalization of education

Unit III: Educational thoughts and practices

Critical reflection on the educational thoughts of Indian and Western thinkers and on their relevance to the present education system

Indian: Mahatma Gandhi, Rabindranath Tagore, Aurobindo, Swami Vivekananda, Jiddu Krishnamurthy, Gijju Bhai Badheka; B R Ambedkar.

Western: Plato, Rousseau, John Dewey, Froebel, Montessori, Ivan Iliach, Paulo Friere

Unit IV: Autonomy of Teacher and Learner

Autonomy: Meaning and extent

Teacher autonomy: Meaning, extent and nature; Teacher as autonomous professional; Areas of teacher autonomy: Their limit-situations - Curriculum making; Learning resources and material selection and use; Pedagogical practices; Assessment modalities; Limit-situations: Structures- Structured curriculum, and examination system; Time-tables;

Learner Autonomy: Meaning, extent and nature; Learning as an autonomous act; Meaning making and learners' autonomy-opportunities and constraints

Autonomy and Accountability: Teacher Accountability; Teacher commitment

Sessional Activities:

- Presentations on Educational thoughts of Various thinkers
- Preparation of an Album or posters on different thoughts of great thinkers
- Analysis of aims of education from ancient Vedic times to modern times
- Collection of examples/evidences to show the influence of Education on social change and the socio-cultural influences on Educational aims
- Comparative study of National curriculum frameworks of NCERT on aims of education
- Readings on Position paper on 'Aims of Education'-NCF 2005
- Comparative study of Aims of Education of few countries
- Collection of case studies that exemplifies teacher accountability and commitment

MSEII.7: YOGA EDUCATION, SELF UNDERSTANDING AND DEVELOPMENT

Credits: 2 (1L+ 0T +1P)

Contact hrs per week: 3

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives :

The student teacher will be able to:

- Understand the meaning and importance of self-concept and self-esteem.
- Be aware of different factors related to self-concepts and self-esteem. Record a brief history of development of yoga through the ages. Discuss how yoga and yoga practices are important for healthy living.
- Explain some important principles of yoga.
- Explain the different limbs of *Astañga* yoga.

- State the different types of yoga.
- Derive how Hatha yoga and *Astañga* yoga are complementary to each other.
- Enable the student to have good health.
- Practice mental hygiene.
- Possess emotional stability.
- Integrate moral values.
- Attain higher level of consciousness.
- Demonstrate some important *asanas* and *pranayama*.

COURSE CONTENT :

Unit I : Introduction to Yoga and Yogic Practices

Yoga: meaning and initiation, What is Yoga? Conceptions of Yoga, History of development of yoga, The streams of Yoga: Astanga yoga Raja yoga, Yogic practices for healthy living

Unit II Introduction to Yogic Texts

Historicity of yoga as a discipline, Classification of yoga and yogic texts, Hatha yogic practices, Meditational processes

Unit III: Yoga and Health

Need of yoga for positive health, Role of mind in positive health as per ancient yogic literature, Concept of health, healing and disease: yogic perspectives, Potential cause of ill health, Yogic principles of healthy living

Unit IV: Personality Development and Stress Management through Yoga

Yogic Practices for Personality Development : Surya Namaskar, Asanas : Tadasana, Simhasana, Kukkutasana, Akarna Dhanurasana, Matsyasana, Prnayama, Anuloma-Viloma Pranayama, Bhastrika Pranayama, Banda, Uddiyana Bandha, Dhyana (Meditation), What is Stress, Yoga as a Way of Life for Stress Management: Ahara, Vihara, Achara, Vichara, Vyavahara, Yogic Practices for Stress Management ; Asanas, Hastottanasana, Padahastanasana, Trikonasana, Shashankasana, Ushtrasana, Ardhamatsyendrasana , Bhujangasana, Makarasana, Sarvangasana, Matsyasana, Shavasana; Pranayama, Bhramari Pranayama, Sheetalī Pranayama; Yoga for Healthy Living, Shirshasana, Bakasana, Hamsasana, Mayurasana

PRACTICALS

Exam Duration: 3 hrs

C₃ : 50 marks

Practicum

- General guidelines for performance of the practice of yoga for the beginners
 1. Guidelines for the practice of *āsanas*
 2. Guidelines for the practice of *prānāyāma*
 3. Guidelines for the practice of *meditation*
- Select yoga practices for persons of average health for practical yoga sessions
 1. Supine position
 2. Prone position
 3. Sitting position

4. Standing position
5. Mudras
6. Pr n y mas

*** In addition, school and community based activities may be organised.**

Evaluation Strategies

The evaluation will be done through practicals/ assessment of ability to develop and design softwares for selected contents.

THIRD SEMESTER

Core Course 1 C : Physics

MSEIII.1 : ELECTRICITY AND ELECTROMAGNETISM

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable students to acquire a broad conceptual framework of electrostatics electromagnetic phenomena.

COURSE CONTENT:

Unit I: Electrostatics

Electrostatic Field, electric flux, Gauss's theorem of electrostatics. Applications of Gauss's theorem- Electric field due to point charge, infinite line of charge, uniformly charged spherical shell and solid sphere, plane charged sheet, charged conductor. Electric potential as line integral of electric field, potential due to a point charge, electric dipole, uniformly charged spherical shell and solid sphere and continuous charge distributions (charged rod, ring, disk). Calculation of electric field from potential.

Unit II: Electric Fields in Matter and DC circuits

Capacitance of an isolated spherical conductor. Parallel plate, spherical and cylindrical condenser. Combination of capacitors, energy stored in a capacitor, Energy per unit volume in electrostatic field. Atomic view of dielectrics, Polarization, Displacement vector. Gauss's theorem in dielectrics. Dielectric constant, Parallel plate capacitor completely filled with dielectric. Polarizability and susceptibility, Clausius-Mossotti equation.

DC Circuits: Kirchhoff's laws, Voltage and Current dividers, Mesh analysis and Loop analysis, RC circuits, Maximum power transfer theorem.

Unit III: Magnetism

Magnetostatics: Biot-Savart's law and its applications- straight conductor, circular coil, solenoid carrying current. Magnetic force between two parallel current carrying conductors. The Divergence and Curl of \mathbf{B} , Magnetic vector potential. Ampere's circuital law. Magnetic field due to a very long solenoid and a toroidal coil.

Magnetism in matter: Magnetic intensity, magnetic induction, Magnetic susceptibility, permeability. Classification of magnetic substances- a brief introduction of dia-, para- and ferro-magnetic materials.

Unit IV: Electromagnetic Induction and AC Circuits

Electromagnetic Induction: Review of Faraday's law of induction, Lenz's law, Motional EMF. Inductance: Self inductance, energy in a magnetic field, magnetic energy density.

AC circuits: The j operator. sinusoidal voltage, current voltage relation in resistance, capacitance and inductance, Reactance and impedance, Power in AC circuits, RMS values, Power factor, LR and CR circuits. Series and parallel LCR circuits. Resonance. Mutual inductance and transformers.

2. D C Tayal, Electricity and Magnetism, 1988, Himalaya Publishing House.
3. David Halliday, Robert Resnick and Jearl Walker, Fundamentals of Physics, 6th Edition, John Wiley, Inc.
4. A N Matveev, Electricity and Magnetism, Mir Publishers, Moscow.
5. F.W.Sears, Electricity and Magnetism, Addison Wesley Co.
6. A F Kipp, Fundamentals of Electricity and Magnetism, McGraw Hill.
7. Edward M. Purcell, Electricity and Magnetism, McGraw-Hill Education, 1986.
8. J.H. Fewkes & J. Yarwood, Electricity and Magnetism, Vol. I, Oxford Univ. Press, 1991.
9. Ronald Lane Reese, University Physics, 2003, Thomson Brooks/Cole.

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. To study the variation of Magnetic field along the axis of a circular coil.
2. To determine M & H using deflection magnetometer & vibration magnetometer.
3. To determine horizontal component of Earth's magnetic field using a Tangent galvanometer.
4. To calibrate an ammeter using a potentiometer and Daniel cell.
5. Mapping of magnetic field due to a current carrying straight conductor.
6. Determination of resistance & resistivity using Meter Bridge.
7. Charging & Discharging of a Capacitor.
8. Deflection magnetometer-Tan A, Tan B positions.
9. Deflection magnetometer -Tan C Position-moment of moments.
10. Mapping of magnetic field lines for a current carrying solenoid.
11. Searle's vibration magnetometer-moment & ratio of moments.

12. Box type vibration magnetometer- M & B_H .
13. Comparison of emf and determination of internal resistance of a cell using a potentiometer.
14. Determination of resistance & resistivity using PO Box.
15. Comparison of capacitance by DeSauty's bridge using BG.
16. Determination of frequency of AC mains using Sonometer & electromagnet.
17. Variation of phase angle with capacitance for a RC circuit.
18. Conversion of Galvanometer to Voltmeter.
19. Unknown resistance by Carey Foster bridge.
20. Induced emf.
21. Maximum power transfer theorem.
22. To verify the Thevenin's and Norton's theorem

Core Course 2 CChemistry

MSEIII.2 : ORGANIC CHEMISTRY – I

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

- To review the concept of isomerism and its types
- To develop an understanding of chemistry of hydrocarbons and their halogenated derivatives.

COURSE CONTENT:

Unit I: Stereochemistry of Organic Compounds

Review of Concept of Isomerism and Types of isomerism with examples.

Optical Isomerism: Structural changes responsible for properties: elements of symmetry, molecular chirality, enantiomers, stereogenic centre, optical activity, properties of enantiomers, chiral and achiral molecules with two stereogenic centres, diastereomers, threo and erythro diastereomers, meso compounds, resolution of enantiomers, inversion, retention and racemization and asymmetric synthesis.

Relative and absolute configuration, sequence rules, D & L and R & S systems of nomenclature.

Geometric isomerism: Determination of configuration of geometric isomers. Cis & trans and E & Z system of nomenclature, geometric isomerism in oximes and alicyclic compounds.

Conformational isomerism: Difference between configuration and conformation. Conformational analysis of ethane and n-butane; conformations of cyclohexane, axial and equatorial bonds, conformation of mono alkyl substituted cyclohexane derivatives. Review of Newman projection and Sawhorse formulae, Fischer and flying wedge formulae.

Unit II: Aliphatic Hydrocarbons

Alkanes: Review of IUPAC nomenclature of branched and unbranched alkanes. Isomerism in alkanes and industrial source. Methods of formation (with special reference to Wurtz reaction, Kolbe reaction, Corey-House reaction and decarboxylation), physical properties and chemical reactions of alkanes (halogenation, nitration, sulphonation, oxidation and isomerisation reactions) Mechanism of free radical halogenation of alkanes: orientation, reactivity and selectivity.

Cycloalkanes: Nomenclature, methods of formation (from acetoacetic ester / malonic ester and Dieckmann reaction), chemical reactions (halogenation), Baeyer's strain theory and its limitations. Ring strain in small rings (cyclopropane and cyclobutane), theory of strainless rings. The case of cyclopropane ring: banana bonds.

Alkenes: Accounting for Reactions due to unsaturation in compounds. Nomenclature of alkenes, methods of formation (by dehydration, dehydrohalogenation and dehalogenation) with mechanism. Regioselectivity in alcohol dehydration. The Saytzeff rule, Hofmann elimination, physical properties and relative stabilities of alkenes. Chemical reactions of alkenes & mechanism of hydrogenation, electrophilic and free radical additions, Markownikoff's rule, hydroboration followed by oxidation, oxymercuration & reduction. Epoxidation, ozonolysis, hydration, hydroxylation and oxidation with KMnO_4 . Polymerization of Alkenes. Substitution at the allylic and vinylic positions of alkenes.

Cycloalkenes: Methods of formation and chemical reactions of cycloalkenes.

Alkadienes: Nomenclature and classification of dienes: Isolated, conjugated and cumulated dienes. Structure of allenes and butadiene, methods of formation, polymerization. Chemical reactions & 1,2 and 1,4 additions. Diels-Alder reaction.

Alkynes: Nomenclature, structure and bonding in alkynes. Methods of formation (alkylation of acetylene and by elimination reactions). Acidity of alkynes. Chemical reactions of alkynes: Mechanism of electrophilic and nucleophilic addition reactions, hydroboration, oxidation, metal-ammonia reductions, oxidation and polymerization.

Unit III: Aromatic Hydrocarbons

Factors responsible for the characteristic reactions of Aromatic compounds. Nomenclature of benzene derivatives. Structure of benzene: molecular formula and Kekule structure. Stability and carbon-carbon bond lengths of benzene, resonance structure, MO picture. Aromaticity: The Huckel rule, aromatic ions.

Aromatic electrophilic substitution: General pattern of the mechanism, role of σ - and π -complexes. Mechanism of nitration, halogenation, sulphonation, mercuration and Friedel-Crafts reaction. Energy profile diagrams. Activating and deactivating substituents, orientation and ortho/ para ratio. Side chain reactions of benzene derivatives. Birch reduction.

Methods of formation and chemical reactions of alkylbenzenes, alkynylbenzenes and biphenyl.

Unit IV: Alkyl and Aryl Halides

Alkyl halides: A study of Alkyl halides highlighting its synthetic applications. Nomenclature and classes of alkyl halides, methods of formation, chemical reactions. Mechanism of nucleophilic substitution reactions of alkyl halides S_N2 and S_N1 reactions with energy profile diagrams. Polyhalogen compounds: chloroform, carbon tetrachloride.

Aryl halides: Methods of formation of aryl halides, nuclear and side chain reactions. The addition- elimination and the elimination-addition mechanisms of nucleophilic aromatic substitution reactions.

Relative reactivities of alkyl halides vs allyl, vinyl and aryl halides. Synthesis and uses of DDT and BHC.

1. Organic Chemistry : Seyhand N Ege
2. Organic Chemistry : Morrison and Boyd
3. Organic Chemistry : I L Finar
4. Organic Chemistry : Hendricson, Cram and Hammond
5. Organic Chemistry : Stanley H. Pine

PRACTICALS

Exam Duration : 3 hrs

C3 : 50

Objective:

To develop basic skills in organic synthesis and purification of organic compounds

COURSE CONTENT:

1. Calibration of Thermometer using naphthalene / acetanilide / urea
2. Determination of melting point of Benzoic acid / cinnamic acid / m ó dinitro benzene /

- p-dichlorobenzene
3. Determination of boiling point of aniline / nitrobenzene / chlorobenzene
 4. Distillation of water & alcohol mixture using water condenser; Distillation of chlorobenzene & nitrobenzene mixture using air-condenser
 5. Crystallization: Benzoic acid from hot water, naphthalene from ethanol
 6. Sublimation of camphor / phthalic acid / succinic acid

Organic synthesis:

1. Preparation of Iodoform from ethanol / acetone using sodium hypochlorite and KI
2. Preparation of *m*-dinitrobenzene from nitrobenzene by nitration
3. Preparation of *p*-bromoacetanilide from acetanilide by bromination
4. Preparation of 2,4,6-tribromo phenol from phenol / 2,4,6-tribromoaniline from aniline
5. Preparation of Acetanilide from aniline by acetylation
6. preparation of benzoic acid from benzamide by base hydrolysis
7. preparation of aspirin from salicylic acid by acetylation
8. preparation of *p*-bromoaniline from acetanilide
9. preparation of *o*-iodobenzoic acid from anthranilic acid
10. preparation of *p*-nitroacetanilide from acetanilide by nitration

References :

Core Course 3 C :Mathematics

MSEIII.3 : REAL ANALYSIS

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

At the end of the course students will be able to understand the concepts of real number system, real sequences, infinite series and the convergence tests. Also understand the concept of Riemann integration and its properties.

COURSE CONTENT:

Unit I:

The field axioms; Theorems about field properties, Order in R-Absolute value, Completeness, some important subsets, Intervals, Countable and Uncountable sets. Neighborhoods, Open Sets, Closed Sets, Limit points of a set, Closure of a set, Interior of a set, Compactness, Connectedness.

Unit II:

Introduction to sequences, Convergent sequences, Divergent sequences, Oscillatory sequences, Bounded sequences, Some important limit theorems, Cauchy sequences, Monotonic sequences, Cluster points of a sequence, Limit superior and limit inferior of a sequence, Subsequences.

Unit III:

Introduction to Infinite Series, Sequence of partial sums of a series, Convergent series, Cauchy's general principle of Convergence for Series, A necessary condition for convergence, Series of positive terms, A fundamental result for series of positive terms, Geometric series, Comparison test, Cauchy's nth root test, D'Alembert's Ratio test, Raabe's test, Maclaurin's integral test.

Unit IV:

Riemann Integration: Upper and lower sums, Criterion for integrability, Integrability of continuous functions and monotone functions, Fundamental theorem of Calculus, Change of variables, Integration by parts, First and Second Mean Value Theorems of Integral Calculus.

Ability Enhancement Course – AEC 1 C : Language

MSE III.4A : HINDI

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalise grammar rules so as to facilitate fluency in speech and writing .
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction mode :

Lecture cum discussion, group discussion; panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Modern Literary Genres:

Naveen Gadya Vidhavon Ka Janm Aur Hindi Gadya Ka Vikas

- (i) **Nibandh**-Sardar PurnSingh- Aacharan Ki Sabhyata
- (ii) **Yatra-Vritant**-Bhartendu Harishchandra-Saryu Par ki Yatra
- (iii) **Sansmarn**-Mahadevi Verma- Gungiya
- (iv) **Riportaj**- **Phaniswar Nath 'Renu'** - Rinjal-Dhanjal
- (v) **Aatmkatha**- **Bharatendu Harishchandra** - Kuchh AapBeeti Aur Jag Beeti

Unit II: Criticism:

Hindi Aalochna Ka Aarambh Aur Vikas

Unit III: Novel:

Karbhoomi by Premchand, Swaraj Prakashan, Delhi.

Unit IV: Communication skill:

Interview [Sachchatkar]

Characteristics ó Definition ó Types of Interviews ó Preparation for Interview ó Models ó Exercises.

References:

22. Prayojanmoolak Hindi- Madhav Sontakke, Rajkamal Prakashan Samooh, Delhi
23. Prayojanmoolak Hindi ki Nayee Bhoomika- Kailash Nath Panday, Rajkamal Prakashan Samooh, Delhi
24. Prayojanmoolak Hindi: Sidhant aur Prayog- Dangal Jhalte, Vani Prakashan, Delhi
25. <http://www.hindisamay.com>

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment (C₁+C₂)

Assessment will be based on tutorials, (seminars, projectsetc), tests & assignments.

C1-10 (test) + (seminars, projects, assignments etc) =15

C2-10 (test) + (seminars, projects, assignments etc) =15

Total =50

MSE III.4B : KANNADA

Credits 3 (2L+1T)
Contact Hours per week: 4
Exam duration: 2 Hrs

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating literary works.
- To internalize grammar rules so as to facilitate fluency in speech and writing.
- To develop functional and creative skills in language.
- To develop values of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

COURSE CONTENT:

Unit I : Functional Language :

a) Letter drafting

Characteristics ó types of letters ó Emails - language of letters ó letters of famous people ó exercises.

b) **Essay writing** ó Characteristics ó Definition ó format of essay ó types of essays (literary, scientific etc) ó models, exercises

Reference: A Handbook of Writing Activities, Prasaranga, University of Bangalore.

Unit II : Translation from English to Regional Language.

Reference: a) About Translation by Peter Newmark, MultiLingual Motters, Clavedon, UK. b) Aspect of Translation by K V V L Narasimha Rao, CIIL, Mysore.c0 Bhashanthara kale by Dr.Pradhana gurudatt, B M Sri Memorial foundations , 54, 3rd cross, gavipuram extention , Bangalore

Unit III : Medieval and Folk Literature

- i. Halatorege Bellada kesaru - Basavanna
 - ii. Chintayemuppu santhoshave javvana ó Rathnakaravarne
 - iii. Adava nama jola Ulidava Nama hadu ó Folk
- (Selections from Kavya Sanchaya Part III), Mysore University, Mysore

Unit IV : Novel

Odalaala ó Devanuuru Mahadeva

Suggested Activities :

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc.), tests & assignments.

C1-10 (Test) +15 (seminars, projects, assignments etc) =25

C2-10 (Test) +15 (seminars, projects, assignments etc) =25

Total =50

MSE III.4C MALAYALAM

Credits 3 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Unit I:Functional Language

1. Letter drafting- Characteristics ó types of letters ó language of letters ó letters of famous people ó exercises
2. Essay writing- Characteristics ó Definition ó format of essay ó types of essays (literary, scientific etc) ó models, exercises

Reference: A Handbook of Writing Activities, Prasaranga, University of Bangalore.

Unit II: Translation (English to Malayalam)

(Ref: Tharjama-Siddhanthavum Prayogavum Malayathil , Current Books, Trichur.)

Unit III: Poetry and Folk literature

Text : 1. Sishyanum makanum By Vallathol narayana menon, NBS , Kottayam

Text 2: Othenanum ponniam pada nilatha angavum, Shantha Book stall, Kodungalloor

Unit IV: Novel

BALYA KALA SAKHI by Vaikkam Muhammed Basheer, DC Books, Kottayam

Suggested Activities

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given .

Continuous Assessment:

Assessment will be based on tutorials,(seminars, projects etc.), tests & assignments.

C1-10 (Test) +15 (seminars, projects, assignments etc) =25
C2-10 (Test) +15 (seminars, projects, assignments etc) =25
Total =50

ABILITY ENHANCEMENT COURSE – AEC 1 C: LANGUAGE

MSE III. 4D: Tamil

Credits 3 (2L+1T+0P)
Contact hours per week: 4
Exam duration: 2 Hrs.

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- (i) To develop the students to acquire basic skills in functional language
- (ii) To develop independent reading skills and reading for appreciation the literary works
- (iii) To internalize grammar rules so as to facilitate fluency in speech and writing
- (iv) To develop functional and creative skills in language
- (v) To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region

Transaction mode:

Lecture cum discussion, group discussion, panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Medieval Poetry:

i) Thirukkural ii) Silappathikaram

Unit II: Novel:

Onpadhu Rupaai Nottu

Unit III: Communication skills (Effective speaking and effective writing) in language:

Precise writing- concept - importance - techniques - types - etc.-exercises

Book review – concept - importance of review - techniques-significance-types - etc.-exercises

Unit IV: Grammar:

Sol Elakkanam- Sol-Peyar Sol-Vinai sol-Edai Sol-Uri Sol

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the Teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, seminars, projects, Tests and assignments.

C1-10(Test)+ 15(seminars, projects, assignments etc.) =25

C2-10(Test)+ 15(seminars, projects, assignments etc.) =25

Total=50.

6. *Onpadhu Rupaai Nottu*, Thankar Pachan, Ekkattu Thangal, Chennai- 600 017.

ABILITY ENHANCEMENT COURSE – AEC 1 C: LANGUAGE

MSE III. 4E: Telugu

Credits 3 (2L+1T+0P)

Contact hours per week: 4

Exam duration: 2 Hrs.

Max. Marks: 100

C1+C2:50

C 3:50

Objectives:

- (i) To enable the students to acquire basic skills in functional language.
- (ii) To develop independent reading skills and reading for appreciating the literary works
- (iii) To internalize grammar rules so as to facilitate fluency in speech and writing
- (iv) To develop functional and creative skills in language.
- (v) To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction mode:

Lecture cum discussion, group discussion, panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Functional Language:

Book Review: definition-features of review-techniques of reviewing-reviewing different genres-examples-exercises.

Unit II: Selected Translated Stories: (From English to Telugu)

Selections from Shakspeare Kathalu

Unit III: Poetry:

Vamana Charitra

Subhadra Parinayamu

(Lessons from óTelugu Sahitya Sravanthi)

Unit IV: Novel:

Kalaatheetha Vyakthulu (by Dr P Sridevi)

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, (seminars, projects etc.), tests & assignments.

C1-10 (Test) +15 (seminars, projects, assignments etc.) =25

C2-10 (Test) +15 (seminars, projects, assignments etc.) =25

Total =50

Ability Enhance Course AEC 2C : English**MSE III.5 ENGLISH**

Credits 4 (2L+1T)

Contact Hours per week: 4

Exam duration: 2 Hrs

Max. Marks: 100

C1+C2:50

C 3:50

Objectives :

Students develop proficiency in English which equips them to:

- understand the demands of audience, subject, situation and purpose and the use of language for effective communication.
- analyse language in context to gain an understanding of grammar, vocabulary, spelling, punctuation and speech.
- examine authentic literary and non literary texts and develop insight and appreciation.
- gain an understanding of study and reference skills.
- plan, draft, edit and present a piece of writing.

Transaction Mode:

Lecture-cum-discussion, interactive session, group dynamics, role-play, peer-assessment, self-valuation.

COURSE CONTENT :**Unit I : PROSE**

Walter Benjamin: Experience, Art In the Age of Mechanical Reproduction

Sylvia Townsend Warner: -The Phoenixø

Unit II : POETRY

1. P.B.Shelley - Ode to a Skylark
2. Alfred Lord Tennyson - Lotus Eaters
3. E.D.Browning - How Do I Love Thee (from Sonnets from the Portugese)
4. Walter De La Mare ó The Ghost
5. Hopkins - Thou Art Indeed Just My Lord
6. Wilfred Owen - Anthem for Doomed Youth

7. William Shakespeare ó (Sonnet- 18)- Shall I Compare Thee to a Summer's Day?
8. Robert Browning ó Porphyria's Lover
9. R.S.Thomas - Song for Gwydion
10. Auden - Refugee Blues

Unit III : DRAMA

Anton Chekov : *The Bear*
 Shakespeare : *Othello*

Unit IV : FICTION

Somerset Maugham : *The Razor's Edge*

Emile Bronte- *Wuthering Heights*

Continuous Assessment:

Assessment will be based on tutorials(seminars, projects Etc) tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

Skill Enhancement Course- 1 Physics

MSEIII.4A : BASIC INSTRUMENTATION SKILLS

Credits: 3 (2L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To get exposure with various aspects of instruments and their usage through hands- on mode.

COURSE CONTENT:

Unit I: Basic of Measurement

Instruments accuracy, precision, sensitivity, resolution range etc. Errors in measurements and loading effects. Multimeter: Principles of measurement of dc voltage and dc current, ac voltage, ac current and resistance. Specifications of a multimeter and their significance.

Electronic Voltmeter: Advantage over conventional multimeter for voltage measurement with respect to input impedance and sensitivity. Principles of voltage, measurement (block diagram only). Specifications of an electronic Voltmeter/ Multimeter and their significance. AC millivoltmeter: Type of AC millivoltmeters: Amplifier- rectifier, and rectifier- amplifier. Block diagram ac millivoltmeter, specifications and their significance.

Unit II: Cathode Ray Oscilloscope and its uses

Block diagram of basic CRO. Construction of CRT, Electron gun, electrostatic focusing and acceleration (Explanation only no mathematical treatment), brief discussion on screen phosphor, visual persistence & chemical composition. Time base operation, synchronization. Front panel controls. Specifications of a CRO and their significance. Use of CRO for the measurement of voltage (dc and ac frequency, time period. Special features of dual trace, introduction to digital oscilloscope, probes. Digital storage Oscilloscope: Block diagram and principle of working.

Unit III:

Signal Generators and Analysis Instruments: Block diagram, explanation and specifications of low frequency signal generators. pulse generator, and function generator. Brief idea for testing, specifications. Distortion factor meter, wave analysis.

Impedance Bridges & Q-Meters: Block diagram of bridge. working principles of basic (balancing type) RLC bridge. Specifications of RLC bridge. Block diagram & working principles of a Q- Meter. Digital LCR bridges.

Unit IV:

Digital Instruments: Principle and working of digital meters. Comparison of analog & digital instruments. Characteristics of a digital meter. Working principles of digital voltmeter.

Digital Multimeter: Block diagram and working of a digital multimeter. Working principle of time interval, frequency and period measurement using universal counter/ frequency counter, time- base stability, accuracy and resolution.

7. , U.Tietze, Ch.Schenk, Electronic circuits: Handbook of design and applications, Springer, 2008.
8. Thomas L. Floyd, Electronic Devices, Pearson India, 2008.

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

To get exposure with various aspects of instruments and their usage through hands- on mode.

COURSE CONTENT:

(A minimum of EIGHT experiments to be selected from the following)

1. Circuit tracing of a given laboratory electronic equipment.
2. Use of Digital multimeter/VTVM for measuring voltages.
3. Winding a coil / transformer.
4. Study the layout of receiver circuit.
5. Trouble shooting a circuit.
6. To observe the loading effect of a multimeter while measuring voltage across a low resistance and high resistance.
7. To observe the limitations of a multimeter for measuring high frequency voltage and currents.
8. To measure Q of a coil and its dependence on frequency, using a Q- meter.
9. Measurement of voltage, frequency, time period and phase angle using CRO.
10. Measurement of time period, frequency, average period using universal counter/ frequency counter.
11. Measurement of rise, fall and delay times using a CRO.
12. Measurement of distortion of a RF signal generator using distortion factor meter.
13. Measurement of R, L and C using a LCR bridge/ universal bridge.

Skill Enhancement Course 1 - Botany

MSE III.6B : PLANT PROPAGATION, NURSERY AND GARDENING

Credits: 3 (2L+ 0T +1P)

Contact hrs per week: 5

Marks: 100

C1 + C2: 50

Exam Duration: 2 hrs

C3: 50

Objectives:

After completing the course students will be able to:

- Plan and manage a garden
- Cultivate vegetables in kitchen gardens
- Multiply plants through appropriate techniques
- Identify seeds and garden plants

COURSE CONTENT:

Unit I

Vegetative propagation: air-layering, cutting, selection of cutting, collecting season, treatment of cutting, rooting medium and planting of cuttings - Hardening of plants - green house - mist chamber, shed root, shade house and glass house.

Unit II

Nursery: Definition, objectives and scope and building up of infrastructure for nursery, planning and seasonal activities - Planting - direct seeding and transplants.

Unit III

Seed: Structure and types - Seed dormancy; causes and methods of breaking dormancy - Seed storage: Seed banks, factors affecting seed viability, genetic erosion - Seed production technology - seed testing and certification.

Unit IV

1. Gardening: Definition, objectives and scope - different types of gardening - landscape and home gardening - parks and its components - plant materials and design - computer applications in landscaping - Gardening operations: soil laying, manuring, watering, management of pests and diseases and harvesting.
2. Sowing/raising of seeds and seedlings - Transplanting of seedlings - Study of cultivation of different vegetables: cabbage, brinjal, lady's finger, onion, garlic, tomatoes, and carrots - Storage and marketing procedures.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

COURSE CONTENT:

1. Identification of common agricultural tools and implements.
 - Demonstration and practice of different methods of plant propagation
 - Raising a floral nursery, soil bed preparation, transplantation and maintenance of garden
 - Identification of seeds of common garden plants, crop plants and vegetables.
 - Steps in the Preparation of pots for planting, maintenance of pots
 - Methods of breaking seed dormancy

- Visit to Brindavan garden, Zoo garden and parks in Mysore for study and preparation of report.

6. Janick Jules. 1979. Horticultural Science. (3rd Ed.), W.H. Freeman and Co., San Francisco, USA.

Skill Enhancement Course 1 :Chemistry

MSEIII.4C : INDUSTRIAL CHEMICALS AND ENVIRONMENT

Credits: 3 (2L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

- To understand the basic techniques of chemical industry
- To gain idea about the energy sources
- To understand the properties and application of lubricants
- To study the effects of green house phenomena
- To study the water quality parameter and waste water management
- To acquire the basic knowledge about common pesticides

COURSE CONTENT:

Unit I:

Chemical Technology: Basic principles of distillation, solvent extraction, solid-liquid leaching and liquid liquid extraction, separation by absorption and adsorption. An introduction into the scope of different types of equipment needed in chemical technology, including reactors, distillation columns, extruders, pumps, mills, emulgators. Scaling up operations in chemical industry. Introduction to clean technology.

Unit II:

Fuel Chemistry: Review of energy sources (renewable and non-renewable). Classification of fuels and their calorific value.

Coal: Uses of coal (fuel and non fuel) in various industries, its composition, carbonization of coal. Coal gas, producer gas and water gas composition and uses. Fractionation of coal tar, uses of coal tar based chemicals, requisites of a good metallurgical coke, Coal gasification (Hydro Gasification and Catalytic gasification), Coal liquefaction and Solvent Refining.

Petroleum and Petrochemical Industry: Composition of crude petroleum, Refining and different types of petroleum products and their applications. Fractional Distillation (Principle and process), Cracking (Thermal and catalytic cracking), Reforming Petroleum and non-petroleum fuels (LPG, CNG, LNG, bio-gas, fuels derived from biomass), fuel from waste, synthetic fuels (gaseous and liquids), clean fuels. Petrochemicals: Vinyl acetate, Propylene oxide, Isoprene, Butadiene, Toluene and its derivatives Xylene.

Lubricants: Classification of lubricants, lubricating oils (conducting and non-conducting) Solid and semisolid lubricants, synthetic lubricants. Properties of lubricants (viscosity index, cloud point, pour point) and their determination.

Unit III:

Air Pollution: Pollutants and their sources, pollution by SO₂, CO₂, CO, NO_x, H₂S and other foul smelling gases. Methods of estimation of CO, NO_x, SO_x and control procedures. Green House effect and Global warming, Ozone depletion by oxides of nitrogen,

chlorofluorocarbons and Halogens, removal of sulphur from coal. Control of particulates.

Water pollution and Water Quality Standards: Pollutants and their sources, Effluent treatment plants (primary, secondary and tertiary treatment). Industrial effluent from the following industries and their treatment: electroplating, textile, tannery, dairy, petroleum and petrochemicals, agro, fertilizer, etc. Sludge disposal. Industrial waste management, incineration of waste. Water treatment and purification (reverse osmosis, electro dialysis, ion exchange). Water quality parameters for waste water, industrial water and domestic water.

Unit IV:

Pesticides General introduction to pesticides (natural and synthetic), benefits and adverse effects, changing concepts of pesticides, structure activity relationship, synthesis and technical manufacture and uses of representative pesticides in the following classes: Organochlorines (DDT, Gammexene,); Organophosphates (Malathion, Parathion); Carbamates (Carbofuran and carbaryl); Quinones (Chloranil) , Anilides (Alachlor and Butachlor).

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To monitor the water quality parameters
- To prepare simple industrial products
- To analyse food adulterants

COURSE CONTENT:

1. Determination of dissolved oxygen in water.
2. Determination of Chemical Oxygen Demand (COD)
3. Determination of Biological Oxygen Demand (BOD)
4. Percentage of available chlorine in bleaching powder.
5. Measurement of chloride, sulphate and salinity of water samples by simple titration method.
(AgNO₃ and potassium chromate)
6. Estimation of total alkalinity of water samples (CO₃, HCO₃) using double titration method.
7. Preparation of borax/ boric acid.
8. To calculate acidity/alkalinity in given sample of pesticide formulations as per BIS specifications.
9. Preparation of simple organophosphates, phosphonates and thiophosphates
10. Preparation of Magnesium bisilicate (Antacid).
11. Preparation of soap.
12. Testing of mercuric powder, milk powders, mustard oil for adulterants.

Skill Enhancement Course 1 : Mathematics

MSEIII.4D : COMBINATORICS, STATISTICS AND BASIC PROBABILITY

Credits :3 (2L + 1T + 0P)

Contact hrs per week: 4

Exam Duration : 2 hrs

Marks: 100

C1 + C2: 50

C3 : 50

Objectives:

To enable the students to understand the basic concepts of combinatorics, statistics and probability, to obtain the skills and apply them in problem-solving and teaching.

COURSE CONTENT:

Unit I:

Partially ordered sets, Lattices, Complete lattices, Distributive lattices, Complements, Boolean Algebra, Boolean expressions, Application to switching circuits.

Unit II:

Permutations and Combinations, Pigeon-hole principle, Principle of inclusion and exclusion. Solving real life problems based on them.

Unit-III:

Introduction to statistics, Mean, Mode and Median of grouped and ungrouped data, Graphical representations; Pie Charts, Line Graphs, Bar Graphs, Histograms, frequency polygon. Measures of dispersion; Range, Mean deviation, Variance and Standard deviation, Analysis of frequency distribution.

Unit-IV: Random experiment, Concept of probability, Sample space, Events- different kinds Probability definitions of Mathematical or Classical or Statistical, Conditional probability, Independent events, Bayes's theorem.

Random variable, Discrete and continuous random variables, Probability function, Probability density function, Distribution function. Mean Variance and standard deviation of a random variable.

6. Basic Probability Problems by Richard Serfozo (2003), London, Springer.
7. Introduction to Mathematical Statistics by Robert V. Hogg and Allen T. Craig (1978), McMillan Publishing Co.

Skill Enhancement Course 1: Zoology**MSE III.6E : APICULTURE****Credits: 3 (2L + 0T + 1P)****Contact Hrs per Week: 2 hrs****Exam. Duration: 2 hrs****Max. Marks: 100****C1+C2: 50****C3: 50****Objectives:**

- Impart education about techniques in beekeeping,
- to inculcate and sharpen the observation skill to enjoy the wonders of nature
- to understand the social life of honey bees, management and their importance to man
- to learn the uses of hive products and biopesticides
- to learn the technique of processing and preserving of honey, its economic and medicinal value
- to understand the diseases of honeybees and prophylactic measures.
- to develop entrepreneurial skills in beekeeping

UNIT I :

Introduction to Apiculture, history, importance of bee keeping, b) Types of bee hives, floral calander, bee biology and behavior, c) Role of bees in Pollination.

UNIT II:

Study of morphology of honey bees (workers drones and queen bees), b) Reproduction in honey bees, Bee hives, types of beehive boxes, selection of bee hive equipment, Populating and management of bee colony.

UNIT III:

Composition and types of honey, Different methods of collecting honey. Harvesting quality honey, Hive products.

UNIT IV:

Bee pests, predators and diseases and prophylactic methods, Economics of bee keeping, Medicinal importance of honey.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To provide the hands-on experience in Bee Keeping practices
- To understand the importance of Honey Bees in environment
- To appreciate the modern technology employed in Bee Keeping

COURSE CONTENT:

1. Collect different species of honey bees
2. Study the morphology of worker drone and queen bees.
3. Study different types of hive boxes
4. Study the life cycle of honey bees
5. Extraction of honey ó different methods
6. Study on predators on Honey bees
7. Dealing with robber bees

Visit to Apiaries at Mysore and agriculture universities to study the new techniques in bee keeping

References:

1. The complete book on BEE keeping and honey Processing (2nd revised edition) NPCB Board , Published by: NIIR project consultancy services

10. Mugume, A.(2009). Beekeeping Training Notes. Kabarole DLG. Fortportal - Uganda.
11. Beescape of maliponines: Conservation of Indo- Malayan stingless bees By Abu Hassan Jalil, Ibrahim huib M B; B S (Malaya)
12. Diseases and hygienic Behavior in Honey bees and stingless bees by University of Sheffield.
13. National Bee keeping training and extension manual, 2012.

PROFESSIONAL EDUCATION COURSES

MSE III.7: UNDERSTANDING THE LEARNER

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

The student teacher will be able to:

- Understand the salient features and problems of growth and development during childhood to adolescence.
- Understand the dynamics of personality development in order to facilitate student trainees' and their students' personal growth.
- Develop the ability to apply the knowledge provided by Educational Psychology to classroom problems of various kinds.
- Understand the intra and inter individual differences in the learners and their Implications for organizing educational programmes.
- Acquire the skills of understanding the needs of all the learners in the classroom and meeting their needs.
- Appreciate the contribution of psychology in realizing the objectives of education.

COURSE CONTENT

Unit I : Nature of Human Development and Educational Implications

Concept and Branches of Psychology; Importance of Study of Psychology by Classroom Teachers, Meaning of Growth and Development. Differences between growth and development, importance of growth and development for the teachers. Principles of Development, Factors Influencing Growth and Development; Role of Heredity and Environment in Determining individual Differences in Development. Developmental Stages and Tasks, Development during Early Childhood, Late Childhood and Adolescence- Characteristics, Factors Influencing and Educational Implications: (a) Physical (b) Psychomotor (c) Intellectual (d) Language (e) Emotional (f) Social and (g) Moral and Value Development

Unit II : Management of Issues and Concerns of Adolescent Students

Factors Affecting Adolescent development; Issues and Concerns during Adolescence - Physical and Health concerns, Emotional Issues, Social Issues, Socio-cultural diversity, Adverse Life experiences, Identity Vs Role Confusion; Adolescent Cognition and its effect on Adjustment, Need and Importance of Adolescence Education, Significance of Life Skill Education for Adolescence, Role of Schools for the Balanced Personality

Unit III: Individual Differences in Learners

Individual Differences in - Psycho-Motor skills, Intelligence, Aptitude, Personality, Learning styles and Cognitive Preferences, Self concept and Self esteem, Social-Emotional Development, Aptitude, Interest, Attitude and Values and Study Habits.

Unit IV :Assessment of Individual and Intra Individual Differences in Learners

Tools and Techniques: Psychological Tests, observation Schedules, Inventories, Checklists, Anecdotal Records, Cumulative Records, Sociometry, Interview Techniques, Achievement and Diagnostic Tests.

Meeting the Individual Differences in the Classroom- General Approaches; Remedial Instruction, Guidance and Counseling, Whole School Approach.

Practicum

Administering Group Tests

Conducting Case Studies

Diagnosing the deviations

Studying School Record and preparing Reports.

Getting Familiarized with Individual Psychological Tests.

MSEIII.8 : Gender, School and Society

Credits: 2 (1L+ 1T +0P)

Contact hrs per week: 3

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

This course enables the student teachers to

- Understand and contextualize ideals of the Constitution of India;
- Appreciate humanistic agenda of the Constitution of India;
- Value and recognize the role of education in realizing the ideals of the Constitution;
- Analyse various educational contexts to see whether the child's rights are ensured
- Understand and develop positive attitudes towards various forms of exclusions;
- Appreciate the measures taken at the national level to universalize elementary and secondary education;
- Analyse the contextual examples to understand the gender issues and concerns;
- Develop positive attitude and values towards promoting gender equality;
- Evolves strategies and mechanisms as a teacher to ensure equality in school and learning contexts

COURSE CONTENT:

Unit I: Education as Fundamental Right

Constitution of India : Fundamental rights; Education as Fundamental right; Human Rights: Meaning, Nature, and classification; Rights of Children: International covenants and Indian Constitution; Education as Fundamental Right of Children: 2009, Rights of girl child

Unit II: Policy framework for public Education in India and its implementation

Education in Post-Independent India: Significant recommendations of commissions and committees, National Policy on Education-1986, Revised 1992, Delors Report: learning the treasure within, Universalization of elementary education: Need and significance; Government schemes and efforts with special focus on Sarva Shiksha Abhiyan, Issues in implementing RTE-2009: A critical understanding. Issues that affect and negate the children's right to education (Child labour: Street children, abandoned and orphans; Differently abled children; Attitude towards the girl child and her participation in schooling; Punishment, abuse and violence in schools). alternative schooling, Secondary education: Universalization of secondary education; universal access, universal enrollment, universal retention, universal success; interventions of RMSA, Initiatives and measures taken at national level to improve teacher education at secondary level: Role of NCTE and NCERT

Unit III: Contemporary Indian Schooling: Concern and Issues

Equality of Educational Opportunity: Meaning and nature; Forms of inequality: Caste, Gender, Transgender, regional, religious and other marginalized groups;

Inequality in Schooling: Public- private schools, Rural-urban schools, Mass-elite schools, single teachers' schools and many other forms of unequal school systems. Positive discrimination: concept and issues and policy intervention;

Understanding Exclusion in schooling: Exclusion: Meaning, and nature; Forms of Exclusion:

Physical/physiological Exclusion; Different kinds/types of differently abled children: Measures to address the issues of learning of differently abled children and professional preparedness of institutions;

Socio-cultural and economic exclusion

Understanding different forms of socio-cultural and economic exclusion in schooling: Caste, Class, Gender, Minority, and other Marginalized sections of the society; Critical understanding of ascribed identities on educational opportunities;

Unit IV: Gender: Issues and concerns

Basic Gender concepts: Difference between Gender and Sex; Social construction of Gender; Gender roles as viewed in Indian context; Concept of Transgender

Gender roles in society through various institutions such as family, caste, religion, culture, media and popular culture (films, advertisements, songs etc), law and State; stereotype in gender roles

Issues related to women/girl child: female infanticide and feticide, sex ratio, honour killing, dowry, child marriage, property rights, divorce, widowhood.

Gender bias in school enrolments, household responsibilities, societal attitude towards girls' education

Issues related to gender in school: sexual abuse, sexual harassment, perception of safety at school, home and beyond

Representation of gendered roles, relationships and ideas in textbooks and curricula.

Role of schools, peers, teachers, curriculum and textbooks in challenging gender inequalities or reinforcing gender parity

The Indian constitution and provisions accorded to women; women's rights; legal aspects related to women, indecent representation of women (Prohibition act), cybercrime:

Educational and Employment provisions for Transgender: Legal aspects; social recognition

Sessional activities

- A critical study, with the help of survey and observational study, of alternative schools- child labour schools, night schools, mobile schools and boat schools.
- Critical analysis of different committees and commissions on Education
- Readings on National Policy on Education, RTE Act 2009, Delors Report
- Survey of schools to see the implementation of various incentives of government to equalize educational opportunities
- Textbook analysis for identifying integration of gender issues.
- Prepare presentation on laws related to women harassment, early marriage, property inheritance, trafficking etc.
- Prepare presentations on constitutional provisions and other government measures to promote girl child's education
- Presentation of Case study reports on girl child's problems in schools and at home.

MSEIII.9 : School Attachment Programme 1

Credits : 2

Duration: 2 Weeks

Marks: 100

C1+C2 : 50

C3 : 50

Objectives

- To familiarize the student teachers to school environment, its structure, functions and processes.
- To provide field experience of assessment practices including record maintenance and report cards followed in schools at elementary and secondary levels.

COURSE CONTENT:

- The student teachers will visit the neighbourhood schools for two weeks to get acquainted with the school environment and its functions and processes and submit the report.
- The student teachers will familiarize themselves with school structure and administration.
- The student teachers will visit schools and interact with teachers to know about the assessment practices like CCE, grading patterns and reporting the performance of students and submit the report
- Students will analyse the assessment records and the report cards to study the models of assessment and procedures followed in reporting students' performance. The students will attend the PTA meetings where feedback about students' performance is given by the teachers and submit the report.

Evaluation: All assessments are internal

C1 ó Report 1

C2 ó Report 2

C3 ó Presentation through PPT.

FOURTH SEMESTER

Core Course 1D : Physics

MSEIV.1 : OPTICS

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable students to

- understand that light is a wave phenomenon.
- apply the understanding of wave phenomenon to light.

COURSE CONTENT:

Unit I: Nature of Light and Scattering

Brief discussion on theories of light. Dual nature of electromagnetic radiation, electromagnetic spectrum, energy and momentum of em wave. Electromagnetic nature of light. Definition and Properties of wave front. Huygen's Principle.

A brief discussion on Tyndall, Rayleigh and Raman scattering of light. A qualitative account of fluorescence and phosphorescence, the Raman Effect experiment and its explanation, intensity and polarisation of Raman lines, some applications of Raman Effect.

Unit II: Interference

Definition of Coherence, Methods of production of Coherent sources by division of wavefront and division of amplitude. Theory of interference (condition for constructive and destructive interference). Young's double slit experiment, Lloyd's Mirror and Fresnel's Biprism. Interference in Thin Films: parallel and wedge-shaped films. Fringes of equal inclination (Haidinger Fringes); Fringes of equal thickness (Fizeau Fringes). Newton's Rings: measurement of wavelength and refractive index.

Michelson and Fabry-Perot interferometers: determination of wavelength of light. Wavelength difference, Refractive index and Visibility of fringes

Unit III: Diffraction

Fraunhofer Diffraction, Diffraction at a single slit, double slit, multiple slits, Diffraction grating, Resolving power & Rayleigh's criterion, Resolving power of a grating and telescope. Fresnel diffraction, half period zone, zone plate, diffraction at a circular aperture and at a straight edge, a slit and a wire using half-period zone analysis.

Unit IV: Polarisation

Polarization by reflection, Brewster's law, Malus law, Double refraction, Production and detection of linearly, circularly and elliptically polarized light, Quarter and half wave plates, Polaroids, Discussion on use of Polaroid sheets in preparing tinted sunglasses, Optical activity, Fresnel's theory, Rotatory polarization, use of bi-quartz.

6. A K Ghatak, Optics, Tata McGraw-Hill Education, 2009.
7. Ariel Lipson, Stephen G. Lipson, Henry Lipson, Optical Physics, Cambridge University Press, 2010.

PRACTICALS

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. To determine the refractive index (n) of a liquid by Liquid Lens.
2. Determination of μ of a Lens using the Newton's ring arrangement.
3. Determination of thickness of a paper foil using Air wedge setup.
4. Refractive index (n) of the material of Prism by Spectrometer- measuring angle of minimum deviation.
5. To determine the refractive index (n) of glass & water by apparent depth method.
6. Specific rotation of sugar solution using Polarimeter.
7. Spectrometer- i_1 - i_2 curve.
8. Refractive index of glass prism (i - d curve).
9. Spectrometer-solid prism- Dispersive power.
10. Wavelength of sodium D1 & D2 lines using Diffraction grating.
11. Newton's rings-wavelength of sodium light.
12. Cauchy's constants A & B using spectrometer.
13. p - n junction diode characteristics.
14. Half wave Rectifier
15. Construction of full wave, Centre tapped and Bridge rectifiers

Core Course 2 D :Chemistry**MSEIV.2 :THERMODYNAMICS, EQUILIBRIUM AND SOLUTIONS****Credits: 4 (3L+ 0T +1P)****Contact hrs per week: 5****Exam Duration: 2 hrs****Marks: 100****C1 + C2: 50****C3: 50****Objectives:**

- To understand that conservation of energy is the central concept which governs all the changes and to appreciate its role in various thermochemical equations.
- Explain the origin of the driving force of physical and chemical changes and evolution of second law of thermodynamics and related concepts.
- Apply the concept of equilibrium to construct and interpret the phase diagrams.
- To understand the colligative properties of solutions and the behaviour of immiscible liquids.

COURSE CONTENT:**Unit I: Thermodynamics – I**

Concept of Energy, Historical perspectives, Generalisation of laws of Thermodynamics based on human experience with Nature and natural Processes. Language of thermodynamics : system, surroundings, etc. Types of system, intensive and extensive properties. State and path functions and their differentials. Thermodynamic process. Concept of heat and work.

First Law of Thermodynamics :Statement, definition of internal energy and enthalpy. Heat capacity, heat capacities at constant volume and pressure and their relationship. Joule, Jouleó Thomson coefficient and inversion temperature. Calculation of w.q. dU and dT for the

expansion of ideal gases under isothermal and adiabatic conditions for reversible process.

Thermochemistry : Standard state, standard enthalpy of formation. Hess's Law of heat summation and its applications. Heat of reaction at constant pressure and at constant volume. Enthalpy of neutralization. Bond dissociation energy and its calculation from thermochemical data, temperature dependence of enthalpy, Kirchhoff's equation.

Unit II : Thermodynamics – II

Discussion of experiential knowledge to account for the spontaneity in changes around us.: need for the Second law of thermodynamics, different statements of the law, Carnot cycle and its efficiency, Carnot theorem, Thermodynamic scale of temperature.

Concept of Entropy : Entropy as a state function, entropy as a function of V & T, entropy as a function of P & T, entropy change in physical changes, Clausius inequality, entropy as a criteria of spontaneity and equilibrium. Entropy change in ideal gases and mixing of gases. Gibbs and Helmholtz functions: Gibbs function (G) and Helmholtz function (A) as thermodynamic quantities. A and G as criteria for thermodynamic equilibrium and spontaneity, their advantage over entropy change. Variation of G and A with P, V and T.

Third law of thermodynamics : Nernst heat theorem, statement and concept of residual entropy, evaluation of absolute entropy from heat capacity data.

Unit III : Chemical Equilibrium and Phase Equilibria

Recognising a system at Chemical Equilibrium. Attributes of Chemical Equilibrium, Thermodynamic derivation of law of mass action, Equilibrium constant and free energy. Factors that affect the chemical equilibrium and Le Chatelier's principle. Calculations involving equilibrium constant Ionic equilibria in aqueous solutions, sparingly soluble salts, solubility product common ion effect, selective precipitation, applications in qualitative analysis.

Ionisation of water, pH scale, weak acids and bases, hydrolysis, buffer solutions, acid base indicators, acid base titrations and multi stage equilibria. Reaction isotherm and reaction isochore.

To establish a systematic way of discussing the changes systems undergo when they are heated and cooled and when their composition is changed. Clapeyron equation and Clausius-Clapeyron equation, applications.

Statement and meaning of the terms phase, component and degree of freedom, derivation of Gibbs phase rule, phase equilibria of one component system water, CO₂ and Sulphur systems. Phase equilibria of two component system solid-liquid equilibria simple eutectic Bi-Cd. Pb-Ag Systems, desilverisation of lead. Simple eutectics, systems forming compounds with congruent melting points.

Unit IV: Solutions

To unify the equilibrium properties of simple mixtures on the basis of chemical potential. Solutions of Gases in liquids. Henry's law and its applications, solutions of solids in liquids. Distribution law, application of distribution law to association, dissociation and extraction.

Dilute Solution : Colligative properties, Osmosis, Osmotic pressure, Vant Hoff Theory, Lowering of Vapour Pressure, Depression in Freezing point and Elevation in Boiling Point, Vant Hoff Factor.

Solid solutions and compound formation with congruent melting point (Mg and Zn) and incongruent melting point (NaCl and H₂O), (FeCl₃ and H₂O) and (CuSO₄ and H₂O) system. Freezing mixtures, acetone dry ice.

Liquid and liquid mixtures: Ideal liquid mixtures, Raoult's and Henry's law. Non-ideal system and Azeotropes HCl and H₂O and ethanol and water systems.

Partially miscible liquidsó Phenol-water, trimethylamineó water, nicotineó water systems. Lower and upper consolute temperature. Effect of impurity on consolute temperature. Immiscible liquids, steam distillation. Nernst distribution law ó thermodynamic derivation, applications.

References :

1. Principles of physical chemistry : Puri,Sharma and Pathania, 47th edition
2. Physical Chemistry : Atkins
3. Phase rule: Gurdeep Raj, Goel Publishing house.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To study the energetics of chemical reactions
- To find out the equilibrium constants of selected systems
- To study the behaviour of immiscible liquid systems
- To appreciate the physical properties of liquids and liquid mixtures

COURSE CONTENT:

1. Determination of heat of neutralization of acids and bases .Verification of Hessø law of constant heat summation.
2. Determination of solubility of sparingly soluble salt at various temperature, calculation of enthalpy of solution.
3. pH titration of acid versus base (oMServation of change in pH
4. Determination of equilibrium constant of hydrolysis of an ester(ethyl acetate/methyl acetate)
5. Determination of dissociation constant of a weak acid.
6. Determination of solubility product constant (K_{sp}) of a sparingly soluble salt
7. Determination of dissociation constant of phenolphthalein/methyl orange by colorimetric method.
8. Determination of molecular weight of a given liquid by steam distillation.
9. Determination of percentage composition of the given NaCl solution by miscibility temperature method (phenol-water system).
10. Determination of distribution coefficient of benzoic acid between water and toluene or acetic acid between water and 1-butanol.
11. Determination of transition temperature of a given salt hydrate by thermometric method.
12. Determination of molecular weight of a given substance by Rastø method.
13. Determination of density, coefficient of viscosity and surface tension of the given liquid.
14. Determination of refractive index of pure liquids and liquid mixtures.

Systematic Experiments in Chemistry by Arun Sethi.

Core Course 3D :Mathematics

MSE IV.3 :DIFFERENTIAL EQUATIONS

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

By the end of the semester the students will be able to understand the concept of ordinary and partial differential equations, and their uses in solving real life problems.

COURSE CONTENT:

Unit I:

Definition, Formation of a differential equation, Solution of a differential equation, Equations of the first order and first degree, Variables separable, Integrating factors, Homogeneous form ó Reducible to homogeneous form, Linear equations, Bernoulli's equation, Exact equations, Equations reducible to exact equations.

Unit II:

Equations of the first order and higher degree, Clairaut's equation solvable for x and y and p, Orthogonal trajectories in polar and Cartesian form, Operator D, Rules for finding the particular integral, Cauchy-Euler differential equation, Legendre's differential equations, Simultaneous differential equations.

Unit III:

Equations which do not contain x, Equation whose one solution is known, Equations which can be solved by changing the independent variable and dependent variable, Variation of parameters, Total differential equation : $Pdx + Qdy + Rdz = 0$, Simultaneous equations of the form $dx/P = dy / Q = dz / R$.

Unit IV:

Formation by elimination of arbitrary constants, Formation by elimination of arbitrary functions, Solution by direct integration, Lagrange's linear equations $Pp + Qq = R$, Standard types of first order non-linear partial differential equations, Charpit's method, Homogeneous linear equations with constant coefficients, Rules for finding the complementary functions, Rules for finding the particular integral, Separation of variables.

- To internalize grammar rules so as to facilitate fluency in speech and writing

- To develop functional and creative skills in language
- To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region

Transaction mode:

Lecture cum discussion, group discussion, panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: New Genres & Media Studies:

a) **Travelogue:** Nadanthai Vaazhi Kaveri- Janakiraman

b) **Cinema, TV, Newspaper and New Media:** significance of media-role of media in society- values-etc.

Unit II: Drama

Tanneer Tanneer

Unit III: Poetry: Ancient Poetry

1. Nedunalvaadai

2. Kalithogai

Unit IV: Grammar: Porul, Yappu, Ani- Agam, Puram- Venpa, Aasiryappa-Uvamai, Uruvagam, Vettumai, Vettuporul, Tharkurippettam.

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the Teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials, seminars, projects, Tests and assignments.

C1-10(Test)+ 15(seminars, projects, assignments etc.) =25

C2-10(Test)+ 15(seminars, projects, assignments etc.) =25

Total=50.

References:

1. An anthology of Tamil poetry (for second year Degree class), University of Mysore, Mysore.
2. Thandiyalangaaram, Thirunelveli Saiva Chithaantha Noorpathippu Kazhagam, 522, DDK Road, Chennai-18.
3. Purapporul venpa maalai, Thirunelveli Saiva Chithaantha Noorpathippu Kazhagam, 522, DDK Road, Chennai-18.
4. Udagangalin ethirkalam, Dr. Neelakanda pillai, no 17, Tagur street, Sidlapakkam, Chennai-64.
5. Nadanthai vaazhi Kaveri- Janakiraman. Kaiachuvadu pathippagam, 669, K.P. Road, Nagercoil-629001.
6. Tanneer Tanner. Komal Swaminathan, Vanathi pathippagam, 13 Deenadayalu street, T. Nagar, Chennai-600 017.

ABILITY ENHANCEMENT COURSE - AEC 1D: LANGUAGE

MSE IV. 4E TELUGU

Credits 3 (2L+1T+0P)
Contact hours per week: 4
Exam duration: 2 Hrs.

Max. Marks: 100
C1+C2:50
C 3:50

Objectives:

- To enable the students to acquire basic skills in functional language.
- To develop independent reading skills and reading for appreciating the literary works
- To internalize grammar rules so as to facilitate fluency in speech and writing
- To develop functional and creative skills in language.
- To develop value of liberalism and an insight into the cultural heritage of the region which remains embodied in the literary output of the region.

Transaction mode:

Lecture cum discussion, group discussion; panel discussion, seminar group work, library work.

COURSE CONTENT:

Unit I: Functional Language

1. Analytical writing; definition-how to analyze a poem-a story- a novel and an essay-different approaches to observe-examples-exercises

2. Precise-writing: Characteristics ó definitions ó steps to précis writing ó models ó exercises.

Unit II: Technical Writing

Definition-characteristics-format-models-language used in the writing-terminology-process of writing-planning of document-styles of writing-technologies of writing-exercises.

Unit III: Ancient Poetry

Padmavyuha bhedanam-Tikkana (Sree Madaandhra Mahabharatham)

Ruthu varnanalu ó Srikrishna devaraya (Amuktha Malyada)

Lessons from óTelugu Sahitya Sravanthiö.

Unit IV: Short stories:

(i) *Nannu gurinchi katha vrayavoo*-Buchchibabu

(ii) *Lakshmi* - Rachakonda viswanatha sasthry

(Selections from Telugu Katha, by Central Sahithya Academy, New Delhi.)

Suggested Activities:

In the internal class during the different activities the performance of the student will be assessed by the teacher. Test, assignments and small projects works may be given.

Continuous Assessment:

Assessment will be based on tutorials (seminars, projects etc.) tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc.) =25

C2-10 (test) +15 (seminars, projects, assignments etc.) =25

Total =50

1. Government of Karnataka, *A Handbook of Writing Activities*, Prasaranga, University of Bangalore.
2. Kodavati Ganti Kutumba Rao, *Science Vyasalu*, Published by Vishalandhra Publications, Abids, Hyderabad.
3. Government of Karnataka, *Telugu Sahitya Sravanthi*, Published by Prasaranga, University of Mysore, Mysore
4. *Amuktha Malyada*, Sanjeevani Vyakhya, Emesco Publishers, Hyderabad.

Ability Enhancement Course – AEC 2D

MSE IV.5 ENGLISH

Credits 4 (2L+1T)

Max. Marks: 100

Contact Hours per week: 6

C1+C2:30

Exam duration: 3 Hrs C 3:70

Objectives :

Students develop proficiency in English which equips them to:

- understand the demands of audience, subject, situation and purpose and the use of language for effective communication.
- analyse language in context to gain an understanding of grammar, vocabulary, spelling, punctuation and speech.
- examine authentic literary and non literary texts and develop insight and appreciation.
- gain an understanding of study and reference skills.
- plan, draft, edit and present a piece of writing.

Transaction Mode :

Lecture-cum-discussion, interactive session, group dynamics, role-play, peer-assessment, self-valuation.

COURSE CONTENT :

Unit I : PROSE

1. J.B.Priestley : Travel by Train.
2. Bertrand Russell : Knowledge and Wisdom

Unit II : POETRY

T.S.Eliot : Hollow Men
Wordsworth : The Solitary Reaper
Pablo Neruda : The Portrait in the Rock
William Shakespeare : True Love.
William Blake : A Poison Tree.
William Wordsworth : Lucy Gray.
Robert Frost : The Road Not Taken
Emily Dickinson : There is a certain slant of light

Unit III : DRAMA

Ionesco : *Rhinoceros*
Harold Pinter : *The Dumb Waiter*

Unit IV : FICTION

D.H.Lawrence : *Sons and Lovers*
Gabriel Garcia Marquez : *One Hundred Years of Solitude*

Continuous Assessment:

Assessment will be based on tutorials(seminars, projects Etc) tests & assignments.

C1-10 (test) +15 (seminars, projects, assignments etc) =25

C2-10 (test) +15 (seminars, projects, assignments etc) =25

Total =50

Suggested Readings:

Cambridge Companion to British Romanticism
Pelican Guide to English Literature ó Dickens to Hardy to Lyrical Ballads
Norton's Anthology, Volume.2 1-7, 139
Mathew Arnold- Culture and Anarchy
Dickens- Novel ÷Changing Face of Cityø
Meenakshi Mukherjee - Jane Austen
William Congrev- Excerpts from London Gazette
Brown, John Russel, and Harris, Bernard(ed.)- Restoration Theatre (London, 1965)
Richetti, John, The Cambridge Companion to Eighteenth Century Novel (Cambridge, 1996)
Addison and Steele - Spectators Papers
Cambridge Companion to English Poetry- Donne to Marvel
Restoration Theatre - ed. Brown, John Russel
Background Prose Reading - papers 6,7 & 8: Worldview, an Imprint of Book Land Publishing co.

Skill Enhancement Course - SEC 2 Physics

MSE IV.6A : COMPUTATIONAL PHYSICS

Credits: 3 (2L + 0T +1P)
Contact hrs per week: 4
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives:

The course aims to emphasize the role of computer programming and numerical analysis in solving problems in Physics.

- To use of computational methods to solve physical problems.
- To use computer language as a tool in solving physics problems (applications).

COURSE CONTENT:

Unit I: Introduction

Importance of computers in Physics, paradigm for solving physics problems for solution. Algorithms and Flowcharts, Algorithm: Definition, properties and development. Flowchart: Concept of flowchart, symbols, guidelines, types. Examples (Cartesian to Spherical Polar Coordinates, Roots of Quadratic Equation, Sum of two matrices, Sum and Product of a finite series, calculation of $\sin(x)$ as a series, algorithm for plotting (1) lissajous figures and (2) trajectory of a projectile thrown at an angle with the horizontal).

Unit II: Scientific Programming

Concept of high level language, steps involved in the development of a Program, Compilers and Interpreters. Development of C, Basic elements of C. Character Set, Constants and their types, Variables and their types, Keywords, Variable Declaration and concept of instruction and program. Operators: Arithmetic, Relational, Logical and Assignment Operators. Expressions: Arithmetic, Relational, Logical, Character and Assignment Expressions. Data types, Type declaration of variables, Symbolic constants, Arithmetic operators, Increment and decrement operators, Conditional operator, Bitwise operators, Hierarchy, Arithmetic expressions, Logical operators and expressions, Assignment operators, Arithmetical and assignment statements, Mathematical functions, Input/output statements (unformatted/formatted), Relational operators, Decision making and branching, Go to, if, iff else, switch statements, Looping, While, do and for, Arrays (Types of Arrays, DIMENSION Statement, Reading and Writing Arrays), Handling characters and strings, Functions and voids, structures, Pointers (elementary ideas only), File operations(defining and opening, reading, writing, updating and closing of files, Enough examples from physics problems.

Unit III:Scientific word processing

Introduction to LaTeX: TeX/LaTeX word processor, preparing a basic LaTeX file, Document classes, Preparing an input file for LaTeX, Compiling LaTeX File, LaTeX tags for creating different environments, Defining LaTeX commands and environments, Changing the type style, Symbols from other languages. Equation representation: Formulae and equations, Figures and other floating bodies, Lining in columns- Tabbing and tabular environment,

Generating table of contents, bibliography and citation, Making an index and glossary, List making environments, Fonts, Picture environment and colors, errors.

Unit IV: Visualization

Introduction to graphical analysis and its limitations. Introduction to Gnuplot. importance of visualization of computational and computational data, basic Gnuplot commands: simple plots, plotting data from a file, saving and exporting, multiple data sets per file, physics with Gnuplot (equations, building functions, user defined variables and functions), Understanding data with Gnuplot.

- 12) K.E. Atkinson, Elementary Numerical Analysis, , 3rd edition, 2 007, Wiley India.

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

The course aims to emphasize the role of computer programming and numerical analysis in solving problems in Physics and to provide hands on training on the Problem solving on Computers.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. To print out all natural even/ odd numbers between given limits.
3. To find maximum, minimum and range of a given set of numbers.
2. Calculating Euler number using $\exp(x)$ series evaluated at $x=1$
3. To compile a frequency distribution and evaluate mean, standard deviation etc.
4. To evaluate sum of finite series and the area under a curve.
5. To find the product of two matrices
6. To find a set of prime numbers and Fibonacci series.
7. To write program to open a file and generate data for plotting using Gnuplot.
8. Plotting trajectory of a projectile projected horizontally.
9. Plotting trajectory of a projectile projected making an angle with the horizontally.
10. Creating an input Gnuplot file for plotting a data and saving the output for seeing on the screen. Saving it as an eps file and as a pdf file.
11. To find the roots of a quadratic equation.
12. Motion of a projectile using simulation and plot the output for visualization.
13. Numerical solution of equation of motion of simple harmonic oscillator and plot the outputs for visualization.
14. Motion of particle in a central force field and plot the output for visualization.

Skill Enhancement Course - SEC 2 Botany

MSE IV.6B : UTILIZATION OF PLANTS AND HERBAL TECHNOLOGY

Credits: 2(1L+0T+1P)
Contact Hours per week: 3
Exam duration: 2 hrs.

Max Marks: 100
C1+C2 = 50
C3 = 50

Objectives:

After completion of the course students will be able to:

1. Appreciate the wealth and potential of medicinal plants in our country
 - Identify important plants that are useful to us
 - Familiarise with phytochemical and micropropagation techniques

COURSE CONTENT:

Unit I: Utilization of plants

Brief account (botanical name, family, extraction/ processing where necessary) and uses of the following :

- a) Cereals and Pulses : Rice, wheat, maize, millets, pigeon, pea, Bengal gram, green gram, black gram.
 - b) Fibres : Cotton, jute, linen, coir.
 - c) Vegetable oils : Groundnut, coconut, sunflower, safflower, castor.
 - d) Timber and bamboos : Rosewood, teakwood, honne, canes and bamboos.
5. Beverages : General account, coffee, tea, cocoa.
Spices and condiments : General account, cardamom, clove, pepper, ginger, cinnamon, saffron, turmeric, mustard.
- A. Rubber : General account, *Hevea*, *Ficus*.
 - B. Pharmacognosy: Uses of *Rauwolfia*, *Phyllanthus*, *Catharanthus*, *Ocimum*, *Tylophora*, *Zingiber*, *Trigonella*, and other locally available medicinal plants.

Unit: II

Herbal medicines: history and scope - definition of medical terms - role of medicinal plants in Siddha systems of medicine; cultivation - harvesting - processing - storage - marketing and utilization of medicinal plants.

Unit III:

Phytochemistry - active principles and methods of their testing - identification and utilization of the medicinal herbs; *Catharanthus roseus* (cardiotonic), *Withania somnifera* (drugs acting on nervous system), *Clerodendron phlomoides* (anti-rheumatic) and *Centella asiatica* (memory booster).

Unit IV:

- a) Analytical pharmacognosy: Drug adulteration - types, methods of drug evaluation - Biological testing of herbal drugs - Phytochemical screening tests for secondary metabolites (alkaloids, flavonoids, steroids, triterpenoids, phenolic compounds)
- b) Medicinal plant banks micro propagation of important species (*Withania somnifera*, neem)

and tulsi- Herbal foods-future of pharmacognosy)

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

COURSE CONTENT:

1. Identification and study of plants of economic importance included in theory.
 - Methods of cultivation and micropropagation of medicinal plants
 - Familiarisation with basic phytochemical techniques
 - Submission of a report on local medicinal plants
 - Preparation of 2 herbarium sheets of medicinal plants
 - Visit to medicinal plants garden and herbal extraction companies

Skill Enhancement Course - SEC2 Chemistry

MSE IV.4C : INDUSTRIAL INORGANIC MATERIALS

Credits : 3 (1L + 0T +1P)

Contact hrs per week: 3

Exam Duration : 2 hrs

Marks: 100

C₁ + C₂: 50

C₃ : 50

Objectives :

- To understand the production, handling and storage of industrial gases
- To gain knowledge about the manufacture, application and hazardous in handling the inorganic chemicals
- To know the composition, properties and application of silicate minerals in industry
- To acquire the knowledge of simple fertilizers, surface coatings, alloys, and chemical explosives

COURSE CONTENT

UNIT I : Industrial Gases and Inorganic Chemicals

Industrial Gases: Large scale production, uses, storage and hazards in handling of the following gases: oxygen, nitrogen, argon, neon, helium, hydrogen, acetylene, carbon monoxide, chlorine, fluorine, sulphur dioxide and phosgene.

Inorganic Chemicals: Manufacture, application, analysis and hazards in handling the following chemicals: hydrochloric acid, nitric acid, sulphuric acid, caustic soda, common salt, borax, bleaching powder, sodium thiosulphate, hydrogen peroxide, potash alum, chrome alum, potassium dichromate and potassium permanganate. Industrial Metallurgy - Preparation of metals (ferrous and nonferrous) and ultra pure metals for semiconductor technology.

UNIT II : Silicate Industries

Glass: Glassy state and its properties, classification (silicate and non silicate glasses). Manufacture and processing of glass. Composition and properties of the following types of glasses: Soda lime glass, lead glass, armoured glass, safety glass, borosilicate glass, fluorosilicate, coloured glass, photosensitive glass.

Ceramics: Important clays and feldspar, ceramic, their types and manufacture. High technology ceramics and their applications, super conducting and semi conducting oxides, fullerenes carbon nanotubes and carbon fiber.

Cements : Classification of cement, ingredients and their role, Manufacture of cement and the setting process, quick setting cements.

UNIT III

Fertilizers: Fertilizers: Different types of fertilizers. Manufacture of the following fertilizers: Urea, Ammonium nitrate, Calcium ammonium nitrate, Ammonium phosphates; Polyphosphate, Super phosphate, Compound and mixed fertilizers Potassium Chloride, Potassium sulphate.

Surface Coatings: Objectives of coatings surfaces, preliminary treatment of surface, classification of surface coatings. Paints and pigments-formulation, composition and related properties. Oil paint, Vehicle, modified oils, Pigments, toners and lakes pigments, Fillers, Thinners, Enamels, emulsifying agents. Special paints (Heat retardant, Fire retardant, Eco-friendly paint, Plastic paint), Dyes, Wax polishing, Water and Oil paints, additives, Metallic coatings (electrolytic and electroless), metal spraying and anodizing

UNIT IV

Alloys: Classification of alloys, Ferrous and Non-Ferrous alloys, Specific properties of elements in alloys. Manufacture of Steel (removal of silicon decarbonization, Page 39 of 80 demanganization, desulphurization dephosphorisation) and surface treatment (argon treatment, heat treatment, nitriding, carburizing). Composition and properties of different types of steels.

Chemical Explosive: Origin of explosive properties in organic compounds, preparation and

explosive properties of lead azide, PETN, cyclonite (RDX). Introduction of rocket propellant.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To analyse the chemical composition, properties of simple fertilizer and alloys
- To familiarise with the preparation of inorganic salts, dyes and pigments

COURSE CONTENT:

1. Determination of free acidity in ammonium sulphate fertilizer.
2. Estimation of Calcium in Calcium ammonium nitrate fertilizer.
3. Estimation of phosphoric acid in superphosphate fertilizer.
4. Estimation of Cu-Zn in brass
5. Determination of composition of dolomite (by complexometric titration).
6. Analysis of Cu-Ni or (Cu, Zn) in alloy or synthetic samples.
7. Analysis of Cement.
8. Preparation of pigment (zinc oxide).
9. Estimation of Available Oxygen in Hydrogen Peroxide.
10. Determination of phosphoric acid in commercial sample of phosphoric acid.
11. Preparation of chrome alum.
12. Preparation of potash alum from aluminium scarp
13. Preparation of methyl orange.

4. S. S. Dara: A Textbook of Engineering Chemistry, S. Chand & Company Ltd. New Delhi.
5. A. K. De, Environmental Chemistry: New Age International Pvt, Ltd, New Delhi.
6. S. M. Khopkar, Environmental Pollution Analysis: Wiley Eastern Ltd, New

Skill Enhancement Course –SEC 2 : Mathematics

MSE IV.4D :DATA HANDLING

Credits : 2 (2L + 1T + 0P)

Contact hrs per week: 4

Exam Duration : 2 hrs

Marks: 100

C1 + C2: 50

C3 : 50

Objectives:

On completion of this course, the students will be able to:

- understand the types of educational data, procedures of data validation and its analysis.
- appreciate the analysis of educational data by using statistical tests.
- Develop skill of using the application software for data analysis and computation of various statistical measures.
- Compute the different statistical measures by using computerized application software.
- Drawing meaningful conclusions based on the interpretation of analysed data.

Unit I: Data Collection- Nature and types of data

Data collection- primary sources and secondary sources; Scales of measurement (NOIR)

Coding: Variable names; Coding responses; Coding open-ended questions

Tabulation, Constructing frequency distribution table, Graphical representation of data ó Pie diagram, Histogram, frequency curve.

Unit II : Descriptive Analysis of Data-1

Measures of dispersion ó Range; Quartile deviation; Standard deviation; Coefficient of dispersion; Skewness and Kurtosis.

Unit III: Descriptive Analysis of Data-2

Normal Probability Curve ó Meaning, Purpose and Applications, Derived Scores (Z & T Scores).

Measures of Relationships: Meaning of Correlation and Methods of computing correlation - Product Moment Correlation; Rank Difference Method of Correlation

Unit IV: Inferential Statistics

Sampling Procedures ó Random sampling, Systematic Random sampling, (with and without repetitions), Stratified random sampling, Cluster sampling, Snow ball sampling.

Hypothesis ó Meaning and types; testing of hypothesis ó one sample t-test, independent samples t-test, paired samples t-test, Chi-square test.

Practicum:

1. Collect data live ó class test scores/ survey data and generate frequency distribution table and represent it graphically.
2. Collect test scores of any school subject of any class and compute Mean, Quartile Deviation and Standard Deviation.
3. Compute coefficient of correlation among language subject papers and core subject papers like ó English and History, Mathematics and Science, etc.
4. Study the sampling procedures adopted by taking various school contexts like

selecting a team for school reports, team for debate competition, etc.

Skill Enhancement Course SEC 2: Zoology

MSE IV.6E : SERICULTURE

Credits: 3 (1L + 0T + 1P)

Contact Hrs per Week: 3 hrs

Exam. Duration: 2 hrs

Max. Marks: 100

C1+C2: 50

C3: 50

Objectives

To understand the importance of sericulture

- To provide the hands-on experience in sericulture practices
- To enhance the skill of practicing silk production
- To appreciate the modern technology employed in sericulture practices

COURSE CONTENT:

Unit I: Introduction to Silkworm Practices

Sericulture: Definition, history and present status

Silkworms: Types of silkworms, their food plants and distribution

Non-Mulberry Silkworm: Tasar (*Antherea*): Distribution, life cycle, food plant and marketing

Muga silkworm: Distribution, Food plants and Life cycle, marketing

Eri Silkworm: Distribution, life cycle and food plants, marketing.

Prospectus of Sericulture in India : Sericulture industry in different states, employment

Central Silk Board (CSB): Role of Central Silk Board and Directorate of Sericulture in extension and development.

Moriculture: Salient features and economic importance of the genus *Morus*; Anatomy of mulberry leaf, stem and root

Soil: Physical and chemical properties; Soil nature; Soil moisture; Climatic conditions: Temperature, photoperiod, humidity and rainfall

Unit II: Silkworm Taxonomy And Distribution

Classification and Taxonomic characters: Phylum, class, order, family, genus and species;

Moultinism and voltinism: Univoltine, bivoltine and multivoltine races; Distribution and Races; Geographical distribution in the world and India;

Life cycle: Egg, larvae, pupa and adult, life span

Unit III: Silkworm Morphology

Egg: External and internal morphology and colour change;

Larvae: Mouth parts, legs, prolegs, spiracles, eyes, claspers and integumentary hair and sexual markings;

Pupa: Male and Female Morphology and sexual dimorphism;

Adult: Mouth parts, antenna, wings, external genitalia.

Silk glands: Structure, development and mechanism of silk synthesis

Endocrine glands: Endocrine glands in larva and pupa; Hormonal control on metamorphosis, diapause, silk synthesis. Pheromone: sex attractants and their role in mating.

Unit IV: Silkworm Rearing Technology and Diseases

Rearing: Rearing appliances, Rearing trays, ant-wells, rearing stands and racks, paraffin papers, rubber foam pads, net, chopsticks and feathers; Mountages

Disinfectants appliances: Disinfect ants - Formalin, bleaching powder, RKO, Disinfectant appliances: Sprayers and dusters

Seed: Collection of disease-free layings (DFLs), cards, loose eggs, incubation; Hatching and Brushing: Uniform hatching and Brushing methods for I instar larvae

Basic concepts of silkworm diseases: Viral and Protozoan diseases (Nuclear polyhydrosis virus (NPV); *Nosema bombycis* (Pebrine disease) and Preventive measures

Bacterial diseases: Bacterial septicemia (*Bacillus sp.*); Fungal Diseases (white muscardine (*Beauveria bassiana*),

Silkworm pests: Tachinid Fly (Uzifly), Dermistid beetles; Vertebrate and other silkworm pests and their control.

References

2. Silkworm Rearing Techniques in the Tropics, Dr. S. Omura, Japan International Cooperation Agency, 1980.
3. Muga Silk Industry by S. N. Choudhary, Directorate of Sericulture and weaving, Govt. of Assam, 1982.
4. Studies on soils of India, S. V. Govind Rajan and H. G. Gopala Rao (1970), Vikas Publ. House Pvt. Ltd., New Delhi.
5. Boraiah, G. (1986) Mulberry Cultivation. Lectures on Sericulture.
6. Manual on Sericulture; Food and Agriculture Organisation Rome 1976.
7. Appropriate Sericultural Techniques Ed, by M. S. Jolly Director, CSR & TI, Mysore.
8. Handbook of Silkworm Rearing: Agriculture and Technical Manual-1, Fuzi Pub. Co. Ltd., Tokyo, Japan 1972.
9. A Guide for Bivoltine Sericulture: K. Sengupta, Director, CSR & TI, Mysore 1989.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives

1. To provide the hands-on experience in sericulture practices
 - To enhance the skill of practicing silk production
 - To appreciate the modern technology employed in sericulture

COURSE CONTENT:

1. Preparation of a map showing extension of sericulture in the world.
1. Preparation of a map showing extension of sericulture in India.
2. Graphical representation of cocoon and silk production by various silkworms in India.

3. Moriculture: a) Soil sampling and analysis of pH and moisture content. b) External morphology of root, stem and leaf. c) Methods of propagation by cutting.
4. Morphology ó Egg, last instar larva, pupa, adult, sexual dimorphism, mouthparts, antennae, legs, prolegs, wings.
5. Anatomy ó Dissection of silk gland of larva and adult.
6. Study of appliancesô Types of trays and racks, types of mountage, Cellule, humidity and temperature devices, dusters and sprayers.
7. Life cycle of Silkworm
8. Silk productsô Silk wastes, spun yarn and other byproducts.
9. Single cocoon reelingô determination of average filament length and denier
10. Visit to various sericulture department/centres.
11. Collection of mulberry disease sample and preservation.
12. Study of mulberry fungi, viruses and bacteria causing diseases.

PROFESSIONAL EDUCATION COURSES

MSE IV.7: LEARNING AND TEACHING

Credits: 4 (3L+ 1T +0P)
Contact hrs per week: 5
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives:

The student teacher will be able to:

- Gain an understanding of the process of learning.
- Understands the Conditions Essential for Facilitating Learning and Retention.
- Apply the Principles and Strategies of Major Approaches to Learning in Classroom Environment.
- Understands the Process of Effective Teaching and Qualities of Effective Teachers.
- Understands various Approaches to Teaching and will be able to apply them in the relevant situations.
- Understands the Principles and Strategies for Creating Conducive Classroom Environment.
- Appreciates the role of a teacher as leader, organizer, a facilitator & a humane reflective practitioner.
- Realize the difficulties in learning and teaching.

COURSE CONTENT

Unit I : Concept and Nature of Learning

Factors Associated with Learning

Maxims of Learning and their Educational Implications

Approaches to Learning(Concept, Associated Concepts Basic Principles and Educational Implications)-Habitual Learning, Associative Learning (Classical and Instrumental Conditioning), Spatial Learning/Cognitive Maps, observational Learning, Learning by Insight, Information Processing Approach, Humanistic Approach, Constructivist Learning Approach

Types of Learning-Concept Learning, Skill Learning, Verbal Learning, Learning of Principles and Problem Solving (Meaning, Nature, Stages, Principles and Approaches/Strategies)

Unit II: Understanding Components of Learning

Attention-Meaning, Factors Influencing Attention, Strategies for Enhancing Attention;

Perception-Meaning, Laws of Perceptual Organization (Gestalt Psychologists' View) and Educational Implications.

Process of Memory- Sensory Registration, Retention(Storing), Recognition, Recall; Factors Influencing Retention; Strategies for Enhancing Memory.

Transfer of Learning- Concept, Types, Theories; Strategies for Enhancing Positive Transfer of Learning

Achievement Motivation- Concept, Intrinsic and Extrinsic Motivation; Strategies for enhancing Achievement Motivation in Students.

Unit III: Understanding the process of Teaching-Learning

Teaching as a Profession

Teaching as an Art and Science.

Understanding the Process of Teaching as a Profession

Identifying the need and importance of classroom teaching-learning

Reflective teaching/practice

Skillful teaching

Applying the knowledge of Maxims of Teaching

Role of teacher in identifying classroom related problems

Unit IV: Teacher and Teaching as a profession

Various Approaches to Teaching: Behaviourist, Cognitivist, Constructivist, Connectionist, Participatory, Cooperative, Collaborative, Personalized, and Holistic

Teacher as a Facilitator and Guide/Philosopher/Friend

Teachers' commitment towards fulfilling Felt Need of Learners

Professional Characteristics of Teacher in Classroom Management.

Skills & Competencies of a Teacher Communication: Meaning, mode: input/process/output

Basic Model of Communication: Sender, Message, Medium, Receiver & Reach; Factors facilitating communication

Effective Classroom Management-Principles and Strategies

Leadership Qualities in Teachers

Practicum

Conducts Projects on ó

Identifying the Learning Difficulties of Students in Different School Subjects and the Possible Reason for them;

Providing Remedial Instruction to the Students with Learning Difficulties;

Study the Qualities of Effective Teachers through oMServation, interview, case study etc.,

Visiting Model Schools and Prepare Reports

MSE IV.8 : DRAMA AND ART EDUCATION

Credits: 4 (3L+ 1T +0P)
Contact hrs per week: 5
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives

The student teacher will be able to:

- Understand the efficacy of different art forms in education
- Understand the use of Drama as a strategy
- Use Role play technique in the teaching learning process.
- Understand the importance of dramatic way of presentation.
- Integrate singing method in teaching learning process.
- Understand various Dance forms and their integration in educational practices.
- Use art of drawing and painting in teaching learning process.
- Develop creativity through different creative art forms.

COURSE CONTENT

Unit I : Drama and its Fundamentals

Creative writing ó Drama writing, Drama as a tool of learning, Different Forms of Drama Role play and Simulation, Use of Drama for Educational and social change (Street play, Dramatization of a lesson), Use of Drama Techniques in the Classroom: voice and speech, mime and movements, improvisation, skills of observation, imitation and presentation

Unit II: Folklore Music (Vocal & Instrumental)

Sur, Taal and Laya (Sargam), Vocal - Folk songs, Poems, Prayers, Singing along with *Karaoke*, Composition of Songs, Poems, Prayers, Integration of *Vocal & Instrumental* in Educational practices

Unit III: The Art of Dance

Various Dance Forms - Bharat Natyam, Kathakali, Kuchipudi, Yakshagana- Folk dance and various other dances; integrate movement and rhythm
Integration of Dance in educational practices
(Action songs, *Nritya Natika*)

Unit IV: Drawing and Painting

Colours, Strokes and Sketching- understanding of various means and perspectives, Different forms of painting- Worli art, Madhubani art, Glass painting, Fabric painting and various forms of painting, Use of Drawing and Painting in Education -Chart making, Poster making, match-stick drawing and other forms, Model making ó Clay modeling, Origami, Puppet making, Decorative ó Rangoli, Ekebana, Wall painting (Mural), Kalameshuthu or any other local art

Transactional Strategies

Lecture cum Discussion for each Unit (Unit 1 to 4) followed by simulated/ authentic practices, Workshop schedule, Slide / Film show, Project work, Demonstration, Simulation, Group work and field trips involving meetings with folk singers and other skilled practitioners will especially form part of the transaction scheme. In addition to the above any one or more of the following:

Practicum

Suggestive List:

1. Developing a script of any lesson in any subject of your choice to perform a Play / Drama.
2. Developing a script for the street play focusing on 'Girls' education and Women empowerment.
3. Preparing a pictorial monograph on 'Various folk dance of South India.
4. Preparing a pictorial monograph on 'Various Classical Dance forms in India'.
5. Preparing a calendar chart on 'Various Musical Instruments in India'.
6. Develop an Audio CD based on newly composed Poems of any Indian language.
7. Preparing some useful, productive and decorative models out of the waste materials.
8. Visit the Faculty of Performing Arts in your city and prepare a detailed report on its multifarious functioning.
9. Development a Review of a theatre programme if possible
10. Organize a competition on some Decorative / Performing Art forms in the school during your School Internship programme and prepare a report on it.
11. Organizing a workshop on some selected Creative Art forms in the school during your School Internship programme and prepare a report on it.

*** In addition, school and community based activities may be organized with provisions for visits to innovative centres of pedagogy and learning, innovative schools, educational resource centres, etc. Action research based on teaching learning and school and community could be conducted.**

Evaluation Strategies

Sessional, practicum, unit test project work related presentations.

MSE IV.9 : School Attachment Programme 2

Credits : 2

Duration : 2 weeks

Marks: *100

C1 + C2:50

C3: 50

Objectives:

- To familiarize student teachers with classroom processes and skills employed in teaching-learning process
- To familiarize the student teachers with different types of schools existing in the community.

COURSE CONTENT:

- The student teachers will observe minimum 3 classes of regular teachers for understanding the skills and strategies used in teaching by them.
- The student teachers will visit different types of schools such as Government, Government aided and private schools to study their governing norms, regulations and participation in the community.
- The student teachers will visit the schools run by community/NGO or other organizations like minority run schools, schools in SC/ST dominated areas, schools in slum areas, special and inclusive schools and submit the report.

Evaluation:* All assessments are internal

C1 ó Report 1

C2 ó Report 2

C3 ó PPT

FIFTH SEMESTER

Core Course 1 E : Physics

MSE V.1 : ATOMIC AND MOLECULAR PHYSICS

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable students to apply the basic knowledge of classical and quantum mechanics at the atomic and molecular level.

COURSE CONTENT:

Unit I: Atomic Physics-I

The Electron: Determination of e/m of an electron by Thomson method, Determination of charge of an electron by Millikan's oil drop method.

Atomic Spectra: Inadequacy of Bohr atomic model, correction due to finite mass of the nucleus, Rydberg constant in terms of reduced mass, Excitation and Ionization potentials, Franck-Hertz experiment, Bohr-Sommerfeld Model of atom, relativistic mass correction, vector model of an atom, Electron spin, space quantisation, magnetic moment of an electron due to its orbital motion. Stern-Gerlach experiment and its theory.

Unit II: Atomic Physics-II

Spin-orbit interaction and Fine structure of spectral lines. Quantum numbers and selection rules. Pauli's exclusion principle. Electronic configuration of atoms. Valence electron and a brief mention of L-S and J-J coupling for multi electron atoms. Fine structure lines of Sodium Zeeman effect. Explanation of Zeeman effect on the basis of vector model of atom, Expression for Zeeman shift and experimental details. Mention on anomalous Zeeman effect, A qualitative mention of Paschen α Back and Stark effects.

Unit III : Molecular Spectra

Molecular formation, the molecular ion, H_2 α molecule. Salient features of molecular spectra. Rotation, vibration and electronic spectra of molecules, associated quantum numbers and selection rules. Theory of pure rotation and rotation- vibration spectra, Raman and Infrared (IR) spectra, simple applications. UV-Visible, Fourier Transform IR, Nuclear Magnetic resonance (NMR) and Laser Raman spectra of organic molecules and their interpretations.

Unit IV: X-Rays

Electromagnetic spectrum, production of X-rays, X-ray spectra, Continuous X-ray spectra Characteristic X-ray. Duane and Hunt limit. Moseley's law and its significance, X-ray

energy levels. Bragg's law and Bragg spectrometer. A brief mention of different types of crystals. Structures of NaCl and KCl crystals. Compton Effect, Expression for Compton Shift. X-ray diagnostics and imaging

10. H. E. White, Atomic Spectra, MacGraw-Hill, 1954.

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. Franck-Hertz experiment.
2. Study of sodium lines using discharge tubes.
3. Study of hydrogen lines using discharge tubes.
4. Study of helium lines using discharge tubes.
5. Dissociation energy of Iodine.
6. Hartmann's formula for wavelength.
7. Benzene IR spectrum.
8. Rydberg Constant & Solar Spectrum
9. Excitation of Brass spectrum using Arc method
10. Rutherford model & Simulation technique.
11. Zener diode characteristics.
12. Transistor characteristics and transfer characteristics in Common Base configuration-current gain.
13. Transistor characteristics and transfer characteristics in Common Emitter configuration-current gain.

14. CE Transistor Amplifier-Frequency response.
15. Basic operational amplifier.
16. Energy gap of a semiconductor.
17. Bi-prism experiment.
18. Resolving power of grating.
19. Current balance experiment- the effects of a magnetic field on a current carrying conductor.
20. Resolving power of a telescope.

Core Course 2E Chemistry

MSE V.2 : TRANSITION ELEMENTS, COORDINATION COMPOUNDS AND CHEMICAL KINETICS

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

- To develop an understanding of Principles of Chemical Kinetics and Surface Chemistry.
- To explain the properties of d and f block elements and their compounds in terms of their electronic configuration and bonding.
- To understand the properties of coordination compounds in terms of bonding theories.

COURSE CONTENT:

Unit I: d-block and f-block elements

To relate the electronic configuration to the properties and structure of transition metals and their compounds. Characteristic properties of d-block elements.

Properties of the elements of the first transition series, their binary compounds and complexes illustrating relative stability of their oxidation states, coordination number and geometry.

Chemistry of Elements of Second and Third Transition Series

General characteristics, comparative treatment with their 3d-analogues in respect of ionic radii, oxidation states, magnetic behaviour, spectral properties and stereochemistry. Powder metallurgy ó extraction of tungsten. Position of lanthanides and actinides in the periodic table, lanthanide contraction and its consequences, spectral and magnetic properties of lanthanides, separation of lanthanides and actinides. General properties of actinides:

Extraction of Thorium, Uranium and Plutonium from burnt nuclear fuels.

Unit II : Coordination Compounds

To apply theories that explain certain properties and structure of transition metal complexes.

Werner's coordination theory and its experimental verification, nomenclature of coordination compounds, isomerism in coordination compounds, valence bond theory of transition metal complexes. Limitations of VBT. Elementary treatment of crystal field theory, splitting of d-orbitals in square planar, tetrahedral and octahedral complexes, factors affecting crystal field parameters, Explanation of magnetic behavior and color of complexes using CFT, effective atomic number concept. Metal carbonyl, 18 electron rule, Preparation, structure and reactions of $\text{Ni}(\text{CO})_4$, $\text{Fe}(\text{CO})_5$ and $\text{V}(\text{CO})_6$, nature of bonding in metal carbonyls.

Unit III: Chemical Kinetics

Understanding the factors that influence a chemical reaction and rationalising them on the basis of known theories of reaction rates. Chemical kinetics and its scope, rate of a reaction, factors influencing the rate of a reaction ó concentration, temperature, pressure, solvent, light, catalyst. Concentration dependence of rates, mathematical characteristics of simple chemical reactions ó zero order, first order, second order, pseudo order, half life and mean life. Determination of the order of reaction ó differential method, method of integration, method of half-life period and isolation method. Radioactive decay as a first order phenomenon.

Effect of temperature on rate of reaction, Arrhenius equation, concept of activation energy, Simple collision theory based on hard sphere model, transition state theory (equilibrium hypothesis). Expression for the rate constant based on equilibrium constant and thermodynamic aspects.

Unit IV : Surface Phenomena

Adsorption: Introduction-Absorption and adsorption (definition, examples and differences) types of adsorptions-physical and chemical (definition, examples and differences between them), factors influencing the adsorption of gases on solids. Adsorption isotherms: definition, Mathematical expression for Freundlich and Langmuir's adsorption isotherms. applications of adsorptions.

Catalysis: Definition, general characteristics, action of catalytic promoters and inhibitors. Homogeneous catalysis (definition and examples), Heterogeneous catalysis (definition and examples) mechanism of heterogeneous catalysis (based on adsorption theory) enzyme catalysis (definition and examples) Mechanism of enzyme catalysed reaction (lock and key mechanism)

5. Principles of Physical Chemistry Puri, Sharma and Pathania.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To understand the kinetics of chemical reactions
- To familiarise with the analysis of ores
- To prepare and analyse inorganic complexes
- To study the adsorption phenomena

COURSE CONTENT:

1. Iodination of Acetone by titration and Colorimetry.
2. Acid Hydrolysis of Ester
3. Reaction between Potassium Peroxydisulphate and Potassium Iodide.
4. Base Hydrolysis of an Ester by Titration and Conductometry
5. Iodine clock reaction
6. Solvolysis of Tertiary Butyl Chloride by Titrimetry, conductometry and pH metry
7. Inversion of Cane Sugar
8. Colorimetric study of kinetics of oxidation of Indigo carmine by Chloramine-T.
9. To study the adsorption of acetic acid on activated charcoal
10. To determine the relative strength of Hydrochloric acid and sulphuric acid by studying the kinetics of hydrolysis of ethyl acetate.
11. To study kinetically the reaction rate of decomposition of iodine by hydrogen peroxide.
12. Determination of Copper by colorimetric method using ammonia as the complexing agent.
13. Determination of Ferric ion by colorimetric method using potassium thiocyanate as the complexing agent.
14. Estimation of Manganese in pyrolusite by volumetric method
15. Preparation of a complex: potassium trioxalato aluminate(III) trihydrate or potassium trioxalato cobaltate(III)
16. To determine the rate constant for the inversion of sucrose using polarimeter.

1. Advanced practical inorganic chemistry by Gurdeep Raj, Goel Publication House, Meerut-India.
2. Systematic Experiments in chemistry by Arun Sethi, New age International Pvt.Ltd, New Delhi.

Core Course 3E : Mathematics

MSE V.3 : MULTIVARIATE CALCULUS & VECTOR CALCULUS

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable the students to understand the concepts of multi-variate calculus and vector calculus, and also to compute the areas of plain regions, surfaces and volume of solids.

COURSE CONTENT:

Unit I:

Definition of a line integral and basic properties, Evaluation of line integrals, Definition of double integral, Conversion to iterated integrals, Evaluation of Double integral, change of variables, Surface areas. Definition of a triple integral, Evaluation, Volume as a Triple integral.

Unit II:

Improper integrals of the first and second kinds, Convergence, Gamma and Beta functions, Connection between Beta and Gamma functions, Application to Evaluation of Integrals, Duplication formula, Sterling formula.

Unit III:

Quadratic Curves, surfaces, sphere, cylinder, cone, Ellipsoid, Hyperboloid, Paraboloid, Ruled surfaces.

Unit IV:

Vectors, Scalars, Vector field, Scalar field, Vector differentiation, The Vector Differential operator del , gradient, curl, Vector integration, The Divergence theorem of Gauss, Stokes's Theorem, Green's Theorem in plane.

PROFESSIONAL EDUCATION COURSES

MSE V.4 : ASSESSMENT OF LEARNING

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

This course is designed to help student teachers to:

- * Understand the nature of assessment and evaluation and their role in teaching- learning process.
- * Understand the importance of assessment in continuous and comprehensive manner
- * Plan assessment tasks, techniques, strategies and tools to assess learner's competence and performance in curricular and co-curricular areas,
- * Devise marking, scoring and grading procedures,
- * Analyse, manage and interpret assessment data.
- * Devise ways of reporting on student performance
- * Develop the skills of reflecting-on and self-critiquing to improve performance.

COURSE CONTENT:

Unit I: Introduction to Assessment & Evaluation

- (a) Concept of test, measurement, Assessment, examination, appraisal and evaluation in education and their inter relationships.
- (b) Purpose and objectives of assessment/ Evaluation- for placement, providing feedbacks, grading promotion, certification, diagnostic of learning difficulties.
- (c) Importance of assessment & evaluation for Quality Education ó as a tool in Pedagogic decision making (writing instructional objectives, selection of content, teaching learning resources, methodology, strategies & assessment procedures followed).
- (d) Forms of assessment : -
 - (i) (Formative, Summative, diagnostic; prognostic, placement; Norm referenced; Criterion referenced based on purpose)
 - (ii) (Teacher made tests Standardized tests: based on nature & scope)
 - (iii) (Oral, written, performance: based on mode of response)
 - (iv) (Internal, External, self, peer, & teacher, group Vs individual- based on context)
 - (v) Based on nature of information gathered (Quantitative, Qualitative)
 - (vi) CCE, school based assessment ; Standard Based- based on Approach
- (e) Recent trends in assessment and evaluations:
 - Assessment for learning, assessment of learning and assessment as learning; Relationship with formative and summative, Authentic assessment.
 - Achievement surveys- State, National and International; Online assessment; On demand assessment/ evaluation.
 - Focus on Assessment and Evaluation in Various Educational commissions and NCFs

Unit II: Developing Assessment Tools, Techniques and Strategies -I

- (a) Concept of Cognitive, Affective, Psychomotor domain of learning
- (b) Relationship between educational objectives, learning experiences and evaluation.
- (c) Revised taxonomy of objectives (2001) and its implications for assessment and stating the objectives-
 - Knowledge dimensions:- factual, conceptual, procedural and meta-cognition.
 - Cognitive, Affective, Psychomotor domains ó Classification of objectives
- (d) Stating objectives as learning out comes: General, Specific.
- (f) Construction of achievement tests- steps, procedure and uses (Teacher made test/Unit Tests)
 - Constructing table of specifications & writing different forms of questions ó(VSA, SA, ET & objective type, situation based) with their merits and demerits; assembling the test, preparing instructions, scoring key and marking scheme; and question wise analysis
- (g) Construction of diagnostic test ó Steps, uses & limitation; Remedial measures- need types and strategies
- (h) Quality assurance in tools ó Reliability: Meaning & Different methods of estimating reliability (Test-retest; equivalent forms, split- half); Validity: Meaning & Different methods of estimating reliability (Face, content, construct), Objectivity and Practicability/ Usability
- (i) Inter dependence of validity, reliability and objectivity

Unit III: Developing Assessment Tools, Techniques and Strategies -II

- (a) Concept of CCE, need for CCE its importance; relationship with formative assessment and problems reported by teachers and students
- (b) Meaning & construction of process-oriented tools- Interview; Inventory; observation schedule; check-list; rating scale; anecdotal record;
- (c) Assessment of group processes-Nature of group dynamics; Socio-metric techniques; steps for formation of groups, criteria for assessing tasks; Criteria for assessment of social skills in collaborative or cooperative learning situations.
- (d) Promoting Self assessment and Peer assessment ó concepts and criteria
- (e) Portfolio assessment ó meaning, scope & uses; developing & assessing portfolio; development of Rubrics

Unit IV: Analysis, Interpretation, Reporting and Communicating of student's performance

- a) Interpreting student's performance
 - (i) Descriptive statistics (measures of central tendency & measures of variability, percentages, rank correlation)
 - (ii) Graphical representation (Histogram, Frequency Curves)
- (b) Grading ó Meaning, types, and its uses
- (c) Norms ó Meaning, types, and its uses
- (d) Reporting student's performance ó Progress reports, cumulative records, profiles and their uses, Portfolios, Using descriptive Indicators in report cards
- (e) Role of feedback to stake holders (Students, Parents, Teachers) and to improve teaching ó learning process; Identifying the strengths & weakness of learners.

Sessional Works

1. Discussion on existing assessment practices in schools and submitting the report.
2. Constructing a table of specification on a specific topic (subject specific)
3. Constructing a unit test using table of specifications and administering it to target group and interpreting the result.
4. Construction of any one of the process oriented tools and administering it to group of students & interpreting it.
5. Analysis of question papers:teacher madeandvarious Boards
6. Analysis of report cards-State and Central (CMSE)
7. Analysis of various education commission reports and NCFs for knowing various recommendations on Assessment and Evaluation

MSE V.5 : Pedagogy of Physical Science 1

Credits: 4 (2L+ 2T +0P)

Contact hrs per week: 6

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

Student teachers will be able to

- Explain the nature of science.
- Specify the goals and objectives of science teaching.
- Review the contributions of major scientists.
- Explore several methods of teaching science.
- Apply various theories science learning and analyze the implications for teaching science.
- Review the science curriculum, syllabus, and text books.
- Explore constructivist practices in teaching of science.
- Create unit plans, lesson plans in an artistic and scientific way.
- Explore the inter-relation between science and other subjects.

COURSE CONTENT:

Unit I: Nature of Science

Nature and scope of science -Scientific method, how science works.

Science as a process and product. Science as a way of thinking: inquiry, observation, problem-solving, rational thinking, reasoning, science as an empirical body of knowledge. Structure of knowledge: facts, concepts, principles, generalizations, theories.

Historical development of physical science with illustrations from topics such as structure of atoms, laws of chemical combinations, stoichiometry, equivalent mass, models of the universe, nature of light, electricity and magnetism etc.

Contributions of Indian and international figures in science to the knowledge domain of physical science.

Basic branches of physical science and applications of physical science to human life. Evolution of Physical Science as a knowledge field; science and technology; science and society;

Correlation between science and other subjects, role of science teacher.

Unit II:

a. Aims and learning objectives of Physical Science

Aims of teaching physical science in the school curriculum.

Development of process skills of science, scientific attitude and temper by learning Physics and Chemistry as experimental sciences.

Nurturing curiosity, creativity and aesthetic sense.

Science and society relating physical science with the natural and social environment and technologies relating science to daily life

Values through science teaching-open mindedness, objectivity, truthfulness, critical thinking,

logical thinking, development of problem solving skill, social learning.
Ethics of using the knowledge of science and technology.

b. Physical Science Curriculum

Recommendations of major commissions in India and policies on science teaching.
The school science curriculum with regard to NCF 2005: major themes in secondary school science.
Brief study of famous curricular reform projects such as Nuffield, STEM, PSSC, Chemical Bond Approach, CHEMSTUDY etc.
Comparison of international secondary schools science syllabus- Singapore, Oxford, CIE (Cambridge).

Unit III: Pedagogical shift, Approaches and Strategies of learning Physical Science

Role of prior knowledge in constructing new knowledge (Ausubel), Piaget's theories of learning (schema- disequilibrium).
Development of concepts in Science- Real-life as the basis of conceptions; personal vs. verified knowledge of science. Conceptions, alternate concepts, and misconceptions in science, naïve concepts.
Teaching concepts and generalizations: inductive approaches, using advance organizers, problem solving approach, investigatory approach, project method, cooperative learning method.
Vygotsky's theories of role of language and context in learning.
Van Glasersfeld's theory. Development of constructivist practices in science teaching, 5E learning model, 7E model, conceptual change model of teaching, challenges in using constructivism in the classroom.

Approaches in teaching Science : Cooperative and Collaborative learning approach, problem solving approach, concept mapping, experiential learning, cognitive conflict, inquiry approach, analogy strategy.
Facilitating learning: Teacher's role as a facilitator, grouping students, multiple learning experiences, discussing and negotiating ideas, scaffolding, consolidating students' ideas, questioning-techniques and strategies, higher order and metacognitive questioning.
Maintaining positive learning environment.
Catering to children with varied needs and abilities.
Scope and importance inclusiveness in science class room.
Gender and Science
Role of learner: each learner as unique individual, involving learner in learning process, role of learner in negotiating and mediating learning, encouraging learner to raise and ask questions.

Unit IV: Planning for Physical science Teaching-learning

Importance of planning, unit plan and lesson plan.
Anderson and Krathwohl's revised Bloom's taxonomy: knowledge domains and cognitive processes, action words. Types of knowledge- factual, conceptual, procedural and metacognitive knowledge.
Identification and organization of concepts.
Elements of physical science lesson plan: learning Objectives, introduction, development, assessment, extended learning, assignment.

Designing learning experiences, pre-existing knowledge, selecting approach/strategy, arrangement of teaching learning materials, group learning, formation of groups, organizing activities.

Planning the lesson by using ICT applications and laboratory materials.

Reflective planning; unit plan; developing lesson plans on different topics and through various approaches taking examples from upper primary, secondary and higher secondary stage (physical and chemical changes, redox reaction, light, magnetic effect of electric current, etc.).

Important skills required to teach in Constructive mode.

Sessional Activities:

- Presentation on historical development of science concepts with a view to understand the nature of science.
 - Pedagogical analysis (units for pedagogic analysis: any unit from VIII, IX or X physical science textbook).
 - Drawing concept-maps for secondary level concepts.
 - Presentation on the contributions of Physicists and Chemists to physical science.
 - Readings on curriculum initiatives in secondary science with a special reference to NCF 2005.
 - Comparison of different science curricula.
- Lab demonstration/exploration of science experiments.
 - Exploring common mis-concepts in Physical Science by observing science classes or interviewing science teachers or using VIII and IX textbooks.
 - Stating learning objectives for teaching a topic in science.
 - Demonstration of different methods of teaching of Physical Science.
 - Experimentation of different methods of teaching of Physical Science.

Practicum on teaching skills in integrated and Constructivist form in the Block hours allotted.

MSE V.6 : Pedagogy of Mathematics 1

Credits: 4 (2L+ 2T +0P)
Contact hrs per week: 6
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives:

On completion of the course the students will have

- * understanding of nature of mathematics and its branches
- * ability to analyse the relationship of mathematics within itself and with other subjects
- * ability to categories mathematical knowledge into factual, conceptual, procedural and meta cognitive knowledge
- * Appreciates the contributions made by Indian and other country mathematicians contribution
- * ability to apply logical reasoning and problem solving ability in solving various mathematical problems

UnitI: Knowledge about Mathematics

Nature of mathematics- abstractness, preciseness, brevity, language and symbolism; Nature of mathematical propositions; Quantifiers- necessary and sufficient conditions(one and two way); structure of mathematics- undefined terms, defined terms, definitions, axioms, postulates and theorem; mathematical theorem and its variants- converse, inverse and contra positive; Pure and Applied mathematics; branches of mathematics- Arithmetic, algebra, geometry and their diversities; mathematization through- observation, conjecturing, hypothesing, testing and verifying; creation of conceptual knowledge and its importance; creation of procedural knowledge- derivation of laws/ theorems/ generalizations in mathematics; relationship of mathematics among different branches of science; relationship within and among branches of mathematics; Contribution of Indian and other Mathematician- Aryabhata, Bhaskara, Ramanujam, Guass, Euclid, Descarte, Cantor, Pythagarous; Organization of Mathematical content- horizontal and vertical linkage (within and between classes IX and X); linkage between upper primary, secondary and senior secondary mathematics.

Unit II: Aims and objectives of teaching Mathematics

Aims of mathematics- Cultural, disciplinary, moral, social and utilitarian aims; General objectives of teaching mathematics Vis-a-Vis the objectives of secondary education; Major shifts in classroom teaching (societal and technological influence); characteristics of a good instructional objectives; Writing specific objectives of different content categories in mathematics; Unit plan and Lesson plan-its importance and writing unit plan and lesson plan for mathematics lessons using the format.

Unit III: Strategies for learning mathematical concepts

Nature of concepts, types of concept, process of concept formation; Moves in teaching concepts- a) Exemplar moves- giving examples and non-examples (with or without reasoning); comparing and contrasting ; giving counter example b) Characterization move- definition, stating necessary and/or sufficient condition; concept Attainment Model (Bruner); Advance Organizer Model (Ausubel); Planning and implementation of strategies for teaching various mathematical concepts(secondary level maths)
Important skills required to teach in Constructivist mode.

Unit IV: Teaching of Generalization

Teaching by exposition- Moves in teaching generalization:- Introductory move, focus move, objective move, motivation move, assertion move, application move, interpretation move, justification move; Planning for expository strategies of teaching generalization.
Teaching by guided discovery- nature and purpose of learning by- discovery, inductive, deductive, guided discovery strategies; maxims for planning and conducting discovery strategies; planning strategies involving either induction or deduction or both.

Sessional work:

Analysis of secondary level mathematics text books to identify various categories of mathematical knowledge presented and its horizontal and vertical linkage among 8, 9 and 10 standard text books.

Analysing the structure of mathematics present in selected chapter/unit.

Writing a unit plan for selected unit

Writing of specific instructional objectives for selected unit

Writing a lesson plan on selected content area

Writing a plan for teaching a concept of a generalization using the appropriate moves to teach them.

Practicum on teaching skills in integrated and constructivist form to be carried out in Block hours allotted.

MSE V.7 :School Attachment Programme - 3

Credits : 2

Duration : 2 weeks

Marks: *100

C1 + C2:50

C3: 50

Objectives:

The student teachers will

- Understand learners coming from diverse backgrounds
- Analyze the availability of physical and learning facilities which function as the curriculum resources at secondary level.
- Analyze the relevance of principles of curriculum organization and transaction to actual implementation process of curriculum in schools

Course Content

The student teachers will perform the activities listed below and prepare reflective diary and the reports on the tasks performed separately level wise. They will present their reports in the seminar organized after the completion of school attachment programme.

During this phase student teachers are expected to begin developing their own understanding about facilities available in school, learners and their learning context, curriculum transactions in school. Student teachers gain understanding being into actual school environment by observation, gathering information and interaction with students, teachers and school Head.

The following tasks centered on school, learner contexts and teacher context are suggested to be carried out by student teachers in this phase.

- Analyze how the curriculum proposed at the national /state levels are translated into class room practices by observing teacher's classes of any one subject
- Identity the resources and facilities used by the teacher for teaching a lesson and interact with teacher to identify the resource mobilization.
- Study of the availability of facilities and resources catering to curriculum transaction at upper primary and secondary levels - labs, library, activity rooms, learning resources, art and craft resources and resources for physical education and yoga
- Study of the facilities and scope for inclusiveness in school environment
- Observation of classes to understand the learning processes ; Study the learners coming

from diverse back grounds and their interaction in classrooms - social context of learners; Individual differences; learning facilities for Inclusive children

- Observation of learners in various contexts (participation in school activities, play ground, lunch time, participatory role in school functioning, maintenance of class room and school surroundings, responsibilities taken in various club activities etc.)

Records to be submitted for assessment

- Report on the analysis of school and the class room practices in realizing the curricular expectations evolved at national/state level.
- Report on availability and utility of resources in school.
- Report on learners diversities.

Evaluation:* All assessments are internal

- C1 ó Report 1
- C2 ó Report 2
- C3 ó PPT

SIXTH SEMESTER

Core Course 1F : Physics

MSE VI.1 : CLASSICAL & QUANTUM MECHANICS AND SPECIAL THEORY OF RELATIVITY

Credits: 4 (3L+ 0T +1P)
Contact hrs per week: 5
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives: To enable students to understand the essentials of classical mechanics, quantum mechanics, quantum statistics and relativity.

COURSE CONTENT:

Unit I: Lagrangian formulations of Classical Mechanics

Constraints- sclerenomic and rheonomic constraints, holonomic and non holonomic constraints, Generalized co-ordinates and velocities, Principle of virtual work, D'Alembert's principle, Euler- Lagrange equations, Cyclic co-ordinates, Conservation laws and symmetry properties, applications of Lagrangian formulation (simple pendulum). Canonical momenta & Hamiltonian of a system. Hamilton's equations of motion. Hamiltonian for a harmonic oscillator.

Unit II: Special Theory of Relativity

Galilean transformation, Earth as an inertial frame of reference, Constancy of speed of light, Ether hypothesis, Michelson-Morley experiment, Postulates of Special Theory of Relativity, Lorentz transformations. Simultaneity and order of events. Length contraction, Time dilation, Relativistic transformation of velocity, frequency and wave number. Relativistic addition of velocities. Variation of mass with velocity. Massless Particles. Mass-energy Equivalence. Relativistic Doppler effect. Relativistic Kinematics. Transformation of Energy and Momentum.

Unit III: Origin of Quantum Theory

Qualitative discussions on inadequacies of Classical Physics – black body radiation and photoelectric effect, Planck's hypothesis and explanation of black body radiation, Einstein's explanation of photoelectric effect with derivation, Wave-particle duality, de Broglie's hypothesis of matter waves, concept of group velocity and phase velocity and their relationship, experimental evidence for matter waves – Davisson and Germer experiment, electron diffraction experiment. Uncertainty Principle.

Unit IV: Development and application of Schrodinger Equation

Wave function, interpretation of wave function, postulates of quantum mechanics, probability

density, Eigen functions and eigen values, expectation values, Normalization of wave functions, development of time dependent and time independent Schrodinger wave equation, operator method of deriving Schrodinger equation. Applications of Schrodinger wave equation on one dimensional infinite potential well, finite potential well, phenomenon of tunneling, one dimensional harmonic oscillator, hydrogen atom (only qualitative discussion).

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. Stefan's constant.
2. Planck's constant using LED's (3no.s).
3. Absorption spectra.
4. Photoelectric effect.
5. Variation of resistance with temperature of copper wire (10 mts).
6. Laser Diffraction.
7. Laser-wavelength using transmission grating.
8. Photo conductivity using LDR.
9. Photovoltaic cells.
10. Numerical aperture of an optical fibre by semiconductor laser.
11. BG Absolute Capacity.
12. BG-High resistance by leakage method
13. BG Mutual inductance

14. e/m of electron.
15. Verification of inverse square law for light using photodiode.
16. Diffraction of light. Determination of wavelength λ .
17. Characterization of photo diode.

Core Course 2F Chemistry

MSE VI.2 : ORGANIC CHEMISTRY – II

Credits: 4 (3L+ 0T +1P)
Contact hrs per week: 5
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives:

To develop an understanding of the chemistry of Functional groups and mechanism of Organic Reactions.

COURSE CONTENT:

Unit I: Alcohols and Phenols

Monohydric alcohols: Nomenclature, methods of formation (reduction of aldehydes, ketones, carboxylic acids and esters). Hydrogen bonding, Acidic nature. Reactions of alcohols (oxidation, esterification, dehydration).

Dihydric alcohols: Nomenclature, methods of formation (from alkenes and alkyl dihalides), chemical reactions of vicinal glycols-oxidative cleavage [$\text{Pb}(\text{OAc})_4$ and HIO_4] and Pinacol-pinacolone rearrangement.

Trihydric alcohols: Nomenclature and methods of formation (from alkenes and alkenals), chemical reactions of glycerol (with nitric acid, oxalic acid and HI).

Phenols: Nomenclature, structure and bonding, Preparation of phenol, resorcinol and 1 and

2- naphthols (one method each). Physical properties and acidic character of phenol. Comparative acidic strengths of alcohols and phenols, resonance stabilization of phenoxide ion. Reactions of phenols: Electrophilic aromatic substitution, acylation and carboxylation. Mechanisms of Fries rearrangement, Claisen rearrangement, Gatterman synthesis, Houben-Hoesch reaction, Lederer-Manasse reaction and Reimer-Tiemann reaction.

Unit II: Carbonyl Compounds

Aldehydes and Ketones

Nomenclature and structure of carbonyl group. Synthesis of aldehydes and ketones with particular reference to the synthesis of aldehydes from acid chlorides, synthesis of aldehydes and ketones using 1,3-dithianes, synthesis of ketones from nitriles and from carboxylic acids. Physical properties. Mechanism of nucleophilic addition to carbonyl group with particular emphasis on benzoin, aldol, Perkin and Knoevenagel condensations. Use of acetals as protecting group. Baeyer-Villiger oxidation of ketones, Cannizzaro reaction. MPV, Clemmensen, Wolff-Kishner, LiAlH_4 and NaBH_4 reductions. Halogenation of enolizable ketones. An introduction to σ , β unsaturated aldehydes and ketones.

Carboxylic Acids and their Derivatives

Nomenclature, structure and bonding. Preparation of carboxylic acids α by oxidation, using Grignard reagents and hydrolysis of nitriles. Physical properties, acidity of carboxylic acids, effect of substituents on acid strength. Reactions of carboxylic acids: HVZ reaction, synthesis of acid chlorides, esters and amides. Reduction of carboxylic acids. Mechanism of decarboxylation. Methods of formation and chemical reactions α hydroxy acids α malic, tartaric and citric acids.

Unsaturated monocarboxylic acids: Methods of formation and chemical reactions

Dicarboxylic acids: Methods of formation and effect of heat and dehydrating agents.

Carboxylic acid derivatives: Structure and nomenclature of acid chlorides, esters, amides and acid anhydrides. Preparation of carboxylic acid derivatives, chemical reactions. Mechanism of esterification and hydrolysis (acid, base conditions).

Unit III: Organic synthesis via Carbanions

Synthesis of ethyl acetoacetate by Claisen condensation and diethyl malonate. Acidity of α hydrogens, alkylation of diethyl malonate and ethyl acetoacetate. Synthetic applications of malonic ester: dicarboxylic acids α succinic acid and adipic acid; β , γ α unsaturated acids α crotonic acid and cinnamic acid; barbituric acid.

Synthetic applications of acetoacetic ester: dicarboxylic acids α succinic acid and adipic acid; β , γ α unsaturated acids α crotonic acid and cinnamic acid; antipyrine, uracil and acetyl acetone. keto-enol tautomerism of ethyl acetoacetate. Alkylation of 1,3-dithianes, Alkylation and acylation of enamines.

Unit IV: Organic Compounds of Nitrogen

Nitro Compounds: Introduction, Preparation of nitroalkanes and nitroarenes. Chemical reactions of nitroalkanes. Mechanism of nucleophilic substitution in nitroarenes and their reductions in acidic, neutral and alkaline media. Picric acid.

Aliphatic and Aromatic amines: Structure and nomenclature of amines, Preparation of alkyl and aryl amines (reduction of nitro compounds, nitrites), reductive amination of aldehydic and ketonic compounds. Gabriel-phthalimide reaction, Hofmann bromamide reaction. Reactivity, physical properties, stereochemistry of amines. Separation of a mixture of primary, secondary and tertiary amines (Hinsberg's method). Structural features effecting basicity of amines. Amine salts as phase transfer catalysts. Reactions of amines, electrophilic aromatic substitution in aryl amines, reactions of amines with nitrous acid. Synthetic transformations of aryl diazonium salts and azo coupling.

3. Organic Chemistry John McMurry 9th Edition 2016.
4. Organic Chemistry J. Clayden, N. Greeves and S. Warren 2nd Edition 2012 Oxford University Press.

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objective:

- To develop basic skills of separation of organic compounds and evolve a scheme of analysis of organic compounds based on properties of functional groups for identification
- To develop skills of separation techniques

COURSE CONTENT:

1. Qualitative organic analysis

1. Separation of organic mixtures containing two solid components using water, NaHCO_3 , NaOH
2. Analysis of an organic compound: Detection of extra elements (N, S and X) and functional groups (phenolic, carboxylic, carbonyl, esters, carbohydrates, alcohols, amines, amides, nitro and anilides) in simple organic compounds. Identification of organic compound based on functional group analysis, determination of physical constant (mp / bp).

2. Chromatographic Techniques

(i) Thin Layer Chromatography

- (a) Determination of R_f values and identification of organic compounds:
- (b) Identification of plant pigments by thin layer chromatography
- (c) Preparation and separation of 2,4-dinitrophenylhydrazones of acetone / 2-butanone

using toluene : light petroleum (2:3 ratio)
(d) Separation of mixture of dyes

(ii) Paper Chromatography

Determination of R_f values and identification of organic compounds:

- (a) Separation of mixture of amino acids
- (b) Separation of mixture of D-galactose and D-fructose using n-butanol:acetic acid:water 4:5:1) ; Spray reagent: anilinehydrogenphthalate

(iii) Column Chromatography

Separation and identification of ortho and para nitro anilines

Core Course 3F Mathematics

MSE VI.3 : GROUPS AND RINGS

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

By the end of the semester the students will be able to develop understanding of the abstract concepts of groups and rings, and special classes of rings and to appreciate modern mathematical concepts.

COURSE CONTENT:

Unit I:

Groups, Examples, Properties and types, Sub-groups. Cyclic groups and properties, Cosets, Lagrange's theorem and its Consequences, Dihedral groups, Normal subgroups, Quotient groups.

Unit II:

Homomorphism and Isomorphism of groups, Kernel of a Homomorphism, , Fundamental theorem of Homomorphism, Cauchy's theorem for abelian groups, Permutation group, Alternating Group, Cayley's Theorem.

Unit III:

Rings, Integral Domains, Division Rings, Fields, Properties, Field of quotients. Ideals, Quotient rings Maximal, Prime and Principal ideals, Principal ideal ring, Divisibility in an Integral domain, Units and Associates.

Unit IV:

Homomorphism of a ring, Kernel, Isomorphism, Fundamental theorem of Homomorphism, Polynomial rings, Divisibility, Irreducible polynomials, Division Algorithm, Greatest Common Divisor, Euclidean Algorithm, Unique Factorisation Theorem, Eisenstein's Criterion of irreducibility.

PROFESSIONAL EDUCATION COURSES

MSE VI.4 : CRITICAL UNDERSTANDING OF ICT

Credits: 4 (3L+ 0T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

On completion of the course the students will be able to:

- Appreciate the historical, current and future trends in ICT and its implications to education
- Explain the meaning of ICT and its application in Education
- Demonstrate an understanding of the computer hardware and software fundamentals
- Use various digital hardware and software for creating resources and providing learning experiences
- Use a word processor, spread sheet, drawing and presentation software skillfully and intelligently to produce various teaching learning resources for educational use
- Use internet technologies efficiently to access remote information, communicate and collaborate with others
- Model collaborative knowledge construction using various web 2.0 tools and technologies
- Design and develop technology integrated learning experiences using ICT tools
- Develop skills in using various e-learning and e-content tools and technologies
- Plan, develop, and use multimedia based learning content using open source authoring

software

- Use ICT for designing learning experiences using innovative pedagogical approaches
- Explain the role of ICT in authentic and alternative assessment
- Understand the social, economic, security and ethical issues associated with the use of ICT
- Appreciate the scope of ICT for improving the personal productivity and professional competencies
- Appreciate the use ICT in improving educational administration
- Explain the emerging trends in information and communication technology

COURSE CONTENT:

Unit I: ICT and Education

Information and Communication Technology: meaning and nature. Learning theories and its implications for ICT integration in education. National ICT policy, curriculum and schemes
Historical account of the development of various educational media (audio, print, video, storage, display, projection)

Role of technology in emerging pedagogical practices. Visual literacy, media literacy, and new media literacy

Computer hardware fundamentals, computer network-LAN, WAN and Internet. Software ó meaning and types: proprietary software and open source software, System software and application software

Emerging Trends in ICT and its educational applications: Augmented reality, e-books and rhizomatic learning, learning analytics, ubiquitous computing and mobile learning, Game based learning, cloud computing and software as service, 3D printing, and marker space

Unit II: E-content and e-resources

Educational applications of word processing, spreadsheet, presentation, and drawing tools ó diagrams, concept maps, timelines, flow charts.

Reusable Learning Objects (RLO), e-content standards, authoring tools- open source and proprietary alternatives

Multimedia: meaning and types, multimedia tools-audio editing, video editing, screen casting, graphic editing, basics of animation, and creating interactive media. Evaluation of multimedia resources.

Open Educational Resources ó Meaning and importance, various OER initiatives, creative common licensing

Locating internet resources ó browsing, navigating, searching, selecting, evaluating, saving and bookmarking

Use of digital still and video camera, digital sound recorder, scanner, printer, interactive white board, visualizer, and multimedia projector for creating and using multimedia resources

Unit III: ICT and Pedagogy

Techno pedagogical content knowledge (TPCK). Approaches to integrating ICT in teaching and learning

Web 2.0 tools for creating, sharing, collaborating, and networking: Social networking, social book marking, blog, wiki, instant messaging, online forums/discussion groups and chats, and media streaming.

E-learning: concept, types, characteristics, e-learning tools and technologies, Learning Management Systems (LMS)

Subject specific ICT tools for creating and facilitating learning. Designing technology integrated authentic learning designs and experiences
ICT integrated Unit plan ó Web 2.0 for creating constructivist learning environment
Technology for pedagogical innovations: web quest, PBL, virtual tours, MOOC, flipped classroom
Assistive technology for special needs and inclusion: tools and processes, ICT and Universal design for Learning (UDL)

Unit IV: ICT for Assessment, Management, and professional development

ICT and Assessment: e-portfolio, electronic rubrics, online and offline assessment tools ó rubrics, survey tools, puzzle makers, test generators, reflective journal, and question bank.
Use of web 2.0 tools for assessment,

ICT for professional development - tools and opportunities: electronic teaching portfolio, web 2.0 technologies, technology and design based research, ICT for self-directed professional development, web conferencing, role of OER and MOOCs

ICT for personal management: email, task, events, diary, networking. ICT for educational administration: scheduling, record keeping, student information, electronic grade book, connecting with parents and community, school management systems.

Managing the ICT infrastructure: software installation, troubleshooting of hardware, seeking and providing help, storage and backup, updating and upgrading software

Computer security: privacy, hacking, virus, spy ware, misuse, abuse, antivirus, firewall, and safe practices, fare use and piracy

Sessional Work

1. Hands on experience in setting up a desktop PC and working with various input devices, output devices, storage devices, and display devices
2. Using word processor, spread sheet, drawing and presentation software to produce various teaching learning resources and sharing it online
3. Locating internet resources ó navigating, searching, selecting, saving, evaluating(use standard internet evaluation criteria), and bookmarking using social bookmarking
4. Creating digital concept maps, flow charts, timelines, and other graphics for a particular content
5. Creating screen cast video and podcast of a lesson
6. Shooting, editing, and sharing of videos segment on any educational topic
7. Creating account in YouTube/slide share and sharing the video/presentation. View and comment on others contributions
8. Creating account in wikispace/wikipedia/mediawiki and adding/editing content
9. Developing an educational blog in www.blogger.com, www.wordpress.com, or www.edublog.com
10. LMS experience- hands on various features of LMS ó the ICT course may be provided through LMS
11. Enrolling and completing some MOOC courses of interest
12. Creating resources for flipped classroom and Practicing flipped learning in school during internship
13. Evaluating OER resources. Creating and sharing OER materials- may be in NROER
14. Developing technology integrated unit/lesson plan and trying out this in the school during internship
15. Hands on experience on subject specific software tools like Geogebra, PhET
16. Developing a multimedia e-content for a topic using eXe Learning
17. Field visit to the Edusat center and take part in teleconferencing

18. Planning and creating digital rubrics for any topic and create an e-portfolio
19. Organize web conferencing using Skype or any other tools
20. Review of ICT labs (plans and equipments/resources) in school from internet
21. Interview of computer hardware engineer/ICT specialist regarding Hardware planning, evaluation, maintenance and up gradation
22. Readings on emerging ICT trends in education
23. Review of national ICT policy and curriculum
24. Using FOSS tools for timetabling, grade sheet

MSE VI.5: PEDAGOGY OF PHYSICAL SCIENCE 2

Credits: 4 (2L+ 2T +0P)
Contact hrs per week: 6
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives

- Enable the students to write the unit plans and lesson plan as per the norms of NCF 2005.
- Applying the different teaching methods based on a constructivist point of view.
- Enable the students to observe the lesson systematically.
- Selecting the learning resource and effective use of the same.
- Using of ICT in physical science teaching and learning.
- Explore various assessment strategies for evaluating learning in Physical science.
- Explore various professional development opportunities.
- Plan and conduct action research in secondary schools.
- Identify various teaching- learning resources.
- Develop skills of facilitation as they teach in simulated situations.
- Reflecting the methods in the class.

Unit I: Learning Resources in Physical Science

Print resources: Textbook as a learning resource, criteria for evaluation of a textbook, handbooks, teacher resource books, laboratory manuals, science journals and magazines, encyclopedia, newspaper.

Dale's cone of experience and its use in teaching- learning.

Developing and using resources such as charts, models, science kits, posters, science parks.

Science laboratories: designing, management, and safe practices.

Making low-cost equipment from locally available resources, using the immediate environment and the community resources for teaching of physical science.

Exploring and using digital resources: websites, videos, games, simulations, mobile apps, presentations, OER, interactive multimedia resources, e-books, podcasts, digital concept maps, and digital graphics.

ICT integration in physical science teaching: different forms of ICT and its application in science education.

Unit II: Need and Importance of Assessment for Learning Physical Science

Learning standards in science, process and product assessment in Physical Sciences, importance of metacognition and reflection in assessment, importance feedback in facilitating learning.

Meaning of the terms test, examination, measurement, assessment and evaluation in proper context, Continuous and Comprehensive Evaluation (CCE) and its features.

Assessment and evaluation as intertwined process of classroom experiences performance based assessment, planning assessment framework, Learning Indicators (Lis) and its types, developing LIs for activity, presentation, group work, assignments etc.

Recording and reporting of learning evidences ó measurement of students' achievement ó marks and grading.

Unit III: Tools and Techniques Assessment for Learning Physical Science

Tools and technique of assessment-- assessment of written and oral work, project work, laboratory work, field trips, journal writing, concept map; assessment of learners with special needs.

Use of observation, questioning, concept mapping, rating scales, worksheets, reflective journals/diary, peer and self-assessment in physical science.

Use of rubrics, and portfolio assessment in Physical Science, diagnosing learning difficulties and misconception in Physical Science.

Use of ICT in assessment.

Constructing different types test items in Physical Science at different levels of taxonomy, preparation of blue print/table of specification and constructing unit test.

Unit IV: Professional development of Physical Science teachers

Professional competencies of a physical science teacher.

Need for updating content and pedagogical competencies, pre-service and in-service courses and initiatives, agencies to nurture the best teachers, NCERT activities for teachers.

Participation in science fairs, exhibitions, and science club activities

Planning contextual activities- celebration of science day, birthdays of great physicists and chemists, seminars, conferences, online sharing, distance learning, membership to organisations- NSTA, IPA, IAPT, Indian Chemical Society, INSC. NCERT publications and journals

Meaning, nature, scope, designing and implementing innovative approaches to teaching science.

Teacher as a Researcher: meaning of research and its importance, action research versus research, selecting the problem for action research, format of research plan, action research in physical sciences, steps in action research, examples of action research from the primary, secondary, and higher secondary levels.

Sessional Activities:

(Any TEN from the following)

- Design and development of unit test.
- Developing rubrics for laboratory work, assignment, field trip, project etc.
- Facilitating the development of digital portfolio by a couple of school students.
- Designing and implementing science lab experiments.
- Text book analysis for content organization/ validness of curriculum mentioned in NCF 2005.
- Analysis of process skills and planning lessons for developing process skills.
- Identifying, selecting, and evaluating various media for chosen unit.
- Case studies of successful teacher leaders.
- Presentation and discussion on sample action research studies.
- Planning and conducting an action research.
- Debates on various ethical issues.
- Visit to a special school, observation of inclusion strategies in regular classroom.
- Development of teaching portfolio.
- Analysis of teacher competency framework of various organization.
- Study of a science professional organization.
- Review of an action research article/teaching of Physical science related research article.

- Organizing a science exhibition.
- Formation of a science club and conducting various activities.
- School visit to study the CCE practice.
- Conducting field trips to science museum, science park, botanical garden.
- Writing unit plan for at least 2 units of secondary science.
- Writing lesson plan for at least 2 topics of secondary science.
- Classroom Experience 2: Classroom observation for studying teacher's facilitation skills and how student work is distributed (with emphasis on pedagogical aspects-strategies/materials used).
- Preparing and demonstrating low cost/improvised teaching aids based on Class VII, VIII and IX class Physical Science.
- Simulated teaching of class VII-X topics.
- Developing and analysing a Physical Science achievement test.
- Develop an assessment rubric in Physical Science.
- Visit to a Science museum / Science park /Science teacher resource centres.
- Organize a seminar related to Science day. Developing an action research plan for teaching-learning Physical Science.

MSE VI.6 : PEDAGOGY OF MATHEMATICS 2

Credits: 4 (2L+ 2T +0P)
Contact hrs per week: 6
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives:

On completion of the course the students will have

- * understanding of nature of teaching proof and problem solving in mathematics
- * ability to analyse the purposes of teaching algebra and geometry
- * ability to select suitable tools for mathematical construction and measurements
- * Appreciates the usefulness of mathematics in day today activity in various fields
- * adopt different strategies to meet the diversified needs of learners and appreciates the availability of various learning resources in mathematics
- * Decision making ability to use appropriate assessment tools for mathematical assessment

COURSE CONTENT:

Unit I : Teaching of Proof and Teaching of Problem-solving

Meaning and nature of Proof; kinds of proof- direct, proof by mathematical induction, proof by contradiction, proof by contrapositive, proof by cases, proof by counter examples ; planning and teaching of various theorems in mathematics (secondary level)

Problem-solving

Definition of problem, problem solving; Meaning and nature of Problem solving, strategies of problem solving- Means-ends analysis, backtracking, backward movement, heuristics; Polya's Problem solving steps; solving various mathematical problems

Unit II: Teaching of Algebra and Geometry

Introduction of basic ideas of algebra- variable, constant, coefficient, expression, equation; nature and purpose of teaching algebra; Contextualization of practical situation into algebraic expressions or equations(mathematization); solving various algebraic relations problems of secondary level.

Nature of geometry; purpose of teaching geometry; construction of different geometrical figures; Role of geometry in comprehending mathematics as whole; developing skills in selecting, drawing, using appropriate geometrical instruments and its utility in real life situation; scale drawing; topology and its application in mathematics.

Unit III: Meeting diverse needs of learners (Gifted and Slow learners) and Learning resources in mathematics

Gifted child in mathematics- their characteristics, identification and enrichment programmes
slow learners in mathematics- their characteristics, identification and remedial measures;
overcoming dyscalculia and dysgraphia problems in mathematics and their remediation.

Creation of **visual aids**-charts, models, graphs; usage of **graphical tools**- calculator, logo, cabri, geogebra, sketch pad, ready reckoners; selection and integration of tools in relation to content and learning environment; **Audio-visual aids**- animations, film shows; mathematics lab; mathematics club; e-resources and open and free software; **community resources**- library, museum, theatre, knowledgeable person or experts

Unit IV: Assessment of learning in mathematics

Selection of appropriate tools for formative and summative assessment; diagnosing the learning difficulties of learners (Error analysis- procedural errors, conceptual errors, computational errors) and providing remedial measures (Peer tutoring, direct instruction, mentoring); creation of rubric, portfolios, Criterion reference test, Norm referenced test based on set criteria; construction, administration, scoring, interpretation of a unit test and providing feedback to learners.

For all the Pedagogical transactions the following content knowledge (8th, 9th, 10th, 11th, and 12th standard syllabus) to be made use of, and these can be revised as per the change in curriculum of respective state or changes in CMSE syllabus or in NCERT text books.

Arithmetic: Number system, Ratio and Proportion, Fractions, Commercial mathematics and Data handling, sets, Matrices

Algebra: Polynomials, Graphical representations of various equations, trigonometry,

Geometry: Lines and angles; Triangles and its related theorems; polygons; analytical geometry,

Differential calculus; Integration, Trigonometry; graph theory; computing using ICT.

Sessional work:

Selecting any one of the theorem and teaching it by adopting the strategies of teaching proof

Selecting any one kind of problem in mathematics and demonstrate its procedure of solving

Selecting a topic in algebra or in geometry and teaching it using appropriate learning resources

Construction of unit test (administration, scoring, statistical analysis and reporting) on a selected unit

Analysing the errors committed by learners at secondary level, in regular test (FA1 or FA2) and analysing its causes and suggesting various remedial measures for it

MSE VI.7 :School Attachment Programme 4

Credits : 3

Duration : 3

2 weeks SAP + 1 week Community living

Marks: *100

C1 +C2 :50

C3:50

Objectives:

The student teachers will

- Understand the dynamics of class room processes.
- Understand the diversity in learning based on student responses to learning tasks
- Understand the role of planning, preparation and transaction in the teaching learning process.
- Understand the different strategies and approaches used in teaching based on the nature of content and the skills to be developed.
- Analyse the assessment tools and techniques employed with respect to their purpose, learner friendly, and quality.
- Develop lesson plans in the respective subject areas of specialization
- Understand the strategies adopted for developing art and creative sensibilities in learners

Course Content

The student teachers will perform the activities listed below and prepare reflective diary and the reports on the tasks performed separately. They will present their reports in the seminar organized after the completion of school attachment programme.

During this phase student teachers are expected to begin developing their own

understanding about classroom dynamics, diversity in learning, role of planning, preparation, execution by adopting various strategies and approaches along relevant assessment strategies. Student teachers gain understanding being into actual classroom transaction by observation, gathering information and interaction with students, teachers and school Head.

The following tasks centered on classroom transactions are suggested to be carried out by student teachers in this phase.

- Understand the dynamics of classroom processes and multiple roles of teacher & learners.
- Understand the Classroom management strategies employed by the teacher.
- Interact with teachers to understand how unit and lesson planning are done in their subjects
- Understand school policies and practices to address student learning difficulties-remediation, extra study hours etc. - at macro level- across subjects and at micro level within the class room.
- Develop 2 lessons (one lesson in each pedagogy) with the use of learning materials/teaching aids and one unit plan.
- Analyze test- question papers in subjects to understand what is assessed; types of questions/items used; and with reference to the objectives of the unit/lesson
- Reflect on the processes employed in CCE and the observed outcomes.

Records to be submitted for assessment

- Submission of lesson plan in each pedagogy.(one in each pedagogy).
- Observation records (3 lessons) in each pedagogy.(one in each pedagogy)
- Report on analysis of test paper/s.
- Report on class room transactions and learning processes

Community Based Activities:

Objectives

- To develop an awareness and understanding of educational status of the community.
- To create an awareness of the implementation of various programmes of the government related to school education through field experiences and community participation.

Activities

- The student teachers will visit the local community to study the drop out/ out of school children and the modes of alternative education received by them.
- Organize awareness programmes in the selected community on literacy, human rights, gender sensitization, environmental conservation etc through street play, role play and dramatization.
- To interact with community members like zilla parishat members, SDM and PTA members to study about their participation in school development programmes

Evaluation:* all the assessment are internal

- C1 ó Report 1

- C2 ó Report 2
- C3 ó PPT

SEVENTH SEMESTER

DISCIPLINE SPECIFIC ELECTIVE

DSE 1 A : Physics

MSE VII.1 : NUCLEAR AND PARTICLE PHYSICS

Credits: 3 (1L + 1T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable students to apply the basic knowledge of classical and quantum mechanics at the atomic and molecular level.

COURSE CONTENT:

Unit I: Atomic Nucleus

Nuclear structure, Failure of proton-electron hypothesis, neutron, its discovery and properties, Proton-neutron hypothesis, Constituents of nucleus and their Intrinsic properties, Basic properties of nucleus, charge, spin, radii, mass, magnetic moment. Nuclear forces and their characteristics. Yukawa's Theory (Qualitative), Packing fraction and binding energy, average binding energy and its variation with mass number, main features of binding energy versus mass number curve, Nuclear stability, Segre chart.

Unit II: Nuclear Models

Nuclear Models, Liquid drop model approach, semi empirical mass formula and significance of various terms, condition of nuclear stability. Two nucleon separation energies, Fermi gas model (degenerate fermion gas, nuclear symmetry potential in Fermi gas), evidence for nuclear shell structure, nuclear magic numbers, basic assumption of shell model, concept of mean field, residual interaction, concept of nuclear force.

Unit III: Radioactivity

Review: Radioactive decay, Half life, mean life, Activity-decay constant. Radioactive displacement laws. Theory of α decay, α -emission, Gamow factor. Geiger-Nuttall law. Beta decay, energy kinematics for Beta decay, positron emission Beta spectra. Neutrino hypothesis, K electron capture, internal conversion, Gamma decay, pair production, successive disintegration, units of radio activity, radioactive dating, uncontrolled and controlled chain reactions, nuclear fission and fusion. Energy liberated in nuclear fission, energy production in stars, Nuclear reactors.

Unit IV:

Particle Accelerators and Detectors: Cockroftó Walton voltage multiplier, LINAC, Cyclotron, Betatron.

Nuclear Detectors: GM counter, scintillation detector, bubble chamber, principle of semiconductor detector.

Particle Physics: Particles and anti-particles, Classification of particles, Symmetries and Conservation Laws, Qualitative introduction to quarks, Structure of hadrons.

7. D. Griffith, Introduction to Elementary Particles, John Wiley & Sons, 2008.

PRACTICALS

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. GM Counter characteristics.
2. GM Counteró Absorption coefficient.
3. Determination of Half life of Co-60.
4. Simulation experiment on radioactive decay.
5. Verification of inverse square law for beta rays.
6. Verification of inverse square law for gamma rays.
7. Rutherford modeló Simulation technique.
8. Ionization potential of Xenon.
9. Measurement of Mercury spectrum wavelength.
10. Spectrometer-Quartz prism-Refractive indices of quartz for the ordinary and extraordinary rays.
11. LCR Parallel resonance
12. LCR Series resonance.
13. FET characteristics.
14. Hartley oscillator.

DSE 2A Chemistry

MSE VII.2 : ELECTROCHEMISTRY AND PHOTOCHEMISTRY

Credits: 3 (1L + 1T + 1P)**Contact hrs per week: 5****Exam Duration: 2 hrs****Marks: 100****C1 + C2: 50****C3: 50****Objectives:**

- Explain the nature of Electrolytic conduction involving theories of electrolytes.
- Understand the processes that occur at electrodes and in electrolytes and to apply emf methods to study different types of reactions.
- To have knowledge about the commercial cells and their applications
- To obtain information about the basic photophysical and photochemical processes

COURSE CONTENT:**Unit I: Electrochemistry – I**

To study the behaviour and reactions of ions in a variety of environments through the laws that govern them. Electrical transport & conduction in metals and in electrolyte solutions, specific conductance and equivalent conductance, measurement of equivalent conductance, variation of equivalent and specific conductance with dilution.

Migration of ions Kohlrausch law, Arrhenius theory of electrolyte dissociation and its limitations, weak and strong electrolytes, Ostwald's dilution law, its uses and limitations. Debye-Huckel-Onsager's equation for strong electrolytes (elementary treatment only). Transport number, definition and determination by Hittorf method and moving boundary method.

Applications of conductivity measurements : Determination of degree of dissociation, determination of K_a of acids, determination of solubility product of a sparingly soluble salt, conductometric titrations.

Unit II: Electrochemistry – II

Types of reversible electrodes ó gas-metal ion, metal-metal ion, metal-metal insoluble salt, Amalgam and redox electrodes. Electrode reactions, Nernst equation, derivation of cell E.M.F. and single electrode potential, standard hydrogen electrode-reference electrodes ó standard electrode potential, sign conventions, electrochemical series and its significance.

To draw up a scheme for discussing the equilibrium position for an ionic reaction in terms of the electrode potential. Electrolytic and Galvanic cells ó reversible and irreversible cells, conventional representation of electrochemical cells.

EMF of a cell and its measurements. Computation of cell EMF, Calculation of thermodynamic quantities of cell reactions (ΔG , ΔH and K), Chemical cells with and without transport.

Unit III : Electrochemistry – III

Concentration cell with and without transport, liquid junction potential, application of concentration cells, valency of ions, solubility product and activity coefficient, potentiometric titrations.

Definition of pH and pK_a determination of pH using hydrogen, quinhydrone and glass electrodes, by potentiometric methods, polarization, over potential and hydrogen over voltage Power storage, Lead Battery, Ni-Cd cells, Fuel Cells, Hydrogen ó Oxygen cell. Thermodynamic and Kinetic basis of corrosion, methods of inhibition of corrosion

Unit IV : Photochemistry

Discussing the Interaction of radiation with matter, difference between thermal and photochemical processes. Laws of photochemistry: Grothus ó Drapper law, Stark ó Einstein law, Jablonski diagram showing various processes occurring in the excited state, qualitative description of fluorescence, phosphorescence, non-radioactive processes (internal conversion, intersystem crossing), quantum yield, photosensitized reactions ó energy transfer processes (simple examples), Chemiluminescence.

2. Principles of Physical Chemistry Puri, Sharma, Pathania 47th Edition Vishal Publishing Co.
3. Elements of Electrochemistry by Samuel Glasstone and Lewis
4. Principles of Physical chemistry -Marron and prutton

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objectives:

- To study the electrical behaviour of weak and strong electrolytes
- Quantitative estimation of electrolytes by conductometric and potentiometric titration

COURSE CONTENT:

1. To determine the equivalent conductance of a strong electrolyte at several concentrations and verify Onsager's equation.
2. Conductometric titration of a strong acid Vs. strong base, strong base Vs. weak acid, strong base Vs mixture of acids (strong and weak) to determine the concentration of acids in a given solution and in mixture.
3. To determine the concentration of the given acid solution and concentration of acids in a mixture by potentiometric titration using sodium hydroxide solution.
4. Determination of Pka value of a weak acid by potentiometry.
5. Determination of the dissociation constant of a weak acid by conductometry
6. To determine the equivalent conductance of a weak electrolyte at different concentrations and verify Ostwald's dilution law. Also to find out the dissociation constant of a weak electrolyte.
7. To determine the solubility and solubility constant of a weak electrolyte conductometrically.
8. To find the composition of the complex formed between iron(III) and salicylic acid by Job's method.
9. To find out the amount of copper sulphate in the given solution by titrating with standard alkali by conductometry.
10. To determine the amount of FAS in the given solution by potentiometric titration with standard potassium dichromate and potassium permanganate solutions.
11. Estimation of Silver nitrate by potentiometric titration with standard potassium chloride solution.

DSE 3A Mathematics

MSE VII.3 : LINEAR ALGEBRA

Credits: 3 (1L + 2T + 0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable the students to understand and apply the concepts of linear algebra in solving appropriate problems.

COURSE CONTENT:

Unit I:

Vector spaces, Subspaces, Linear Combinations, Linear span, Linear dependence and Linear independence of vectors, Basis and Dimension, Finite dimensional vector space ó some properties. Quotient spaces, Homomorphisms and Isomorphisms of vector spaces, Direct sums.

Unit II:

Inner product spaces, Euclidean vector spaces, Distance, Length, Properties, Cauchy-Schwarz inequality, Orthogonal and orthonormal vectors, Gram Schmidt Orthogonalisation Process, Orthogonal complement.

Unit III:

Matrices of Linear maps, Change of basis and the effect of associated matrices, Kernel and Image of a linear transformation, Rank and Nullity theorems.

Unit IV :

Singular and non-singular linear transformations, Elementary matrices and transformations, Similarity, Eigen values and Eigen vectors, Diagonalisation, Characteristic polynomial, Cayley - Hamilton Theorem, Minimal Polynomial.

References :

4. Brief Survey of Modern Algebra, Brikhoff and Maclane, IBH
5. Linear Algebra by Serge Lang, Addison Wesley Publishing company Inc.
6. Vector Algebra, Shantinarayan and P K Mittal, S Chand and Co. Ltd.
7. Linear Algebra by Larry Smith, Spinger Verlag.
8. Elementary Linear Algebra with Applications, Keith Nicholson, PWS ó Kent Publishing Company
9. Linear Algebra, Surjith Sinth, Vikas Publishing House Pvt. Ltd.
10. Modern Algebra by Vasishta, Krishna Prakashan Media Ltd.
11. Linear algebra ó a geometric approach by Kumaresan. S

PROFESSIONAL EDUCATION COURSES

MSE VII.4 : CREATING AN INCLUSIVE SCHOOL

Credits: 4 (2L+ 2T +1P)

Contact hrs per week: 6

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

The student teacher will be able to:

- Understanding the meaning and significance of inclusive education.
- Appreciate the special needs of Individuals with diverse needs.
- Get Familiarized themselves with the concept of Inclusive Education.
- Understand the nature and needs of different categories of disabled children.
- Understand the concept of Special Education, Integration and Inclusion.
- Understand the different considerations and provisions for facilitating inclusion.
- Understand and Acquire the Skills of Adapting Curriculum to meet the need of the Students with Diverse needs

COURSE CONTENT

Unit I : Basic Concepts and Introduction to Inclusive Education

Meaning of Impairment, Disability and Handicap; Concept of Special Educational Needs and Diverse Needs, Difference between Special Education, Integration and Inclusive Education. Significance of Inclusive Education; Factors Affecting and Promoting Inclusion.

Unit II : Nature and Needs of Diverse Learners-Identification of Diverse Learners in the Classroom

Sensory Impairment: Hearing impairment and Visual impairment

Physical Disabilities: Orthopaedic impairment, Cerebral Palsy, Special Health Problems, Congenital defects; Slow Learners and Under Achievers; Intellectual Disability; Learning disabilities and ADHD; Autism Spectrum Disorders; Multiple disabilities ; Emotional and Behavioural Problems; Gifted and Creative; Socially Disadvantaged, Economically Deprived, Religious and Linguistic Minorities, Inhabitants of Geographically Difficult Areas

Unit III: Preparing Schools for Inclusion-General Considerations and Provisions

Concept of Inclusive School, Competencies and Characteristics of inclusive Teacher

Physical Consideration, Socio-Emotional Considerations, Curricular Considerations

Provision of Assistive devices, equipment and technological support. Special provisions in Evaluation

Unit IV : Inclusive Practices in Classroom

Making learning more meaningful: Responding to special needs by developing strategies for differentiating content, curriculum adaptation and adjustment, lesson planning and TLM.

Pedagogical strategies to respond to needs of individual students: Cooperative learning

strategies in the classroom, peer tutoring, buddy system, reflective teaching, multisensory teaching. Use of ICT suitable for different disabilities.

Practicum

- Collection of data regarding children with special needs.
- Visit to Inclusive Schools and to observe classroom transaction of any one of such school and make a report of the same.
- Identifying one/two pupils with special needs in the primary schools and preparing a profile of these pupils.
- Preparation of teaching aids, toys, charts, flash cards for children having any one type of disability. (Visit to Resource Room)
- Preparation of Lesson Plan, instruction material for teaching students with disability in inclusive school.
- Developing list of teaching activities of CWSN in the school.

Visits to different institutions dealing with different disabilities and observation of their Classroom.

* In addition, school and community based activities may be organized.

MSE VII.5 : HEALTH AND PHYSICAL EDUCATION

Credits: 2 (1L+ 0T +1P)

Contact hrs per week: 3

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

The student teacher will be able to:

- to build a scenario of Health Education in India.
- to develop a Knowledge Base of the Most Common and Uncommon Diseases in India; their Diagnosis & Remediation.
- Prospective Teacher Educators to learn the Techniques Related to Health Risks & Learn How to Fix these.
- Prospective Teacher Educators to study the Health Education Vision & Mission of India.
- To acquire the skills for physical fitness, correct postures, habits and activities for development
- Acquire skills to practice yogasanas and meditation and learn the skills of concentration, relaxation, dealing with stress and strain
- Understand and develop psychological abilities as life skills to deal with growing up issues like HIV and AIDS and prevention of substance issues
- Understand the process of assessment

COURSE CONTENT

Unit I: Health Education Scenario in India

Introduction to the concept of health, significance and importance in the context of ancient and modern Indian perspective

Identity of Educational Institutional Plants: Structure, Infra-Structure and Environment, Time-Space-Personnel-Material Constellation Educational Management System, Emerging Health & Total Quality of the Educational Institutions, Status of Health Education in India from Pre-Natal Education through Higher Education, Yoga & Yog, Health & Hygiene, Clean Toilets, Work & Leisure, Quality of Health ó Role of Education, Administrators, Teachers, Students, Supporters,

Unit II: Tech-related Health Risks

Identification of the technological health hazards ó Smartphone Stress, Acne caused by the Cell Phones, Blackberry Stress Injuries to the Thumb, Radiation from the cell phones, Cell Phone Sickness, Cell Phone & Car Accidents, Allergies & Phones, Crazy Phones, Computers Causing Wrist Pain, Back & Neck Pain, Decreased Sperm Count from the WIFI, Laptop Burns, Laptop Headaches, Sleeping Problems from the Laptops, Decreased attention span from using Face-book, The Internet Causing Anxiety, Headphone Use leading to Accidents, Hearing Loss from Headphones, Visual Impairment, Death from Social Networking, Environmental Degradation, Aggression, Social Crimes--- Evolving Controlling & Regulatory Mechanisms.

Unit III: Approaches to Sound Health

Games, Sports & Athletics.

Physical fitness, strength, endurance and flexibility, its components, sports skills, indigenous and self-defence activities.

Games and sports ó athletics (general physical fitness exercises), games (lead-up games, relays and major games) rhythmic activities, gymnastics and their impact on health.

Fundamental skills of games and sports; Sports for recreation and competition; Rules and regulation of sports; sports ethics; sports awards and scholarships, sportsmanship.

Yoga ó Raja Yoga, Karma Yoga, Bhakti Yoga, Jnana Yoga.

Safety and security ó disasters in and outside schools, ways of prevention, safety from snake and dog bites, animal attacks, prevention and treatment.

Occupational health hazards and its prevention; Commonly-abused substance and drugs and ways of prevention and inhabitation. Safety measures to be taken in Libraries, Laboratories, Classrooms, Halls, Play Fields, Water Tanks, Swimming Pools, Community Pools, Roads Human Development Index (HDI), Health: Vision, Goals and Objectives of Government of India, Experiments on Influence of Surroundings & Thought, Science of Laughter & Smiles, Health observation Programs, Impact of TV Serials.

Role of Institutions (schools, family and sports), health services, policies and major health and physical education-related programme, blood banks, role of media.

Unit IV: First Aid – Principles and Uses

Structure and function of human body and the principles of first aid., First aid equipments.

Fractures-causes and symptoms and the first aid related to them, Muscular sprains cause, symptoms and remedies, First aid related to hemorrhage, respiratory discomfort, First aid related to Natural and artificial carriage of sick and wounded person, Treatment of unconsciousness, Treatment of heat stroke, General disease affecting in the local area and measures to prevent them.

Practicum

Surfing to know the diseases in India.

Preventive & Ameliorative measures for health hazards.

Playing Games.

Athletics.

Yoga.

Reflective Dialogues on Serials, such as, Satyamev Jayate on Health of the People.

Preparation of inventories on myths on exercises and different type of food.

Make an inventory of energy rich food and nutritious food (locally available) indicating its health value.

Make an inventory of artificial food and provide critical oMSErvations from health point of view.

Home remedies as health care.

Role of biopolymers (DNA) in health of child.

Medicinal plants and child health.

Strategies for positive thinking and motivation.

Preparation of first aid kit.

*** In addition, school and community based activities may be organised.**

MSE VII.6 : READING AND REFLECTING ON TEXT

Credits: 2 (1L+ 1T +0P)

Marks: 100

Contact hrs per week: 3

C1 + C2: 50

Exam Duration: 2 hrs

C3: 50

Objectives

The student teacher will be able to:

- Understand the meaning, process, importance and characteristics of reading.
- Understand and apply different levels, types, techniques and methods of reading.
- Acquaint with the skills of reading different types of texts.
- Develop different types of reading skills through various activities and met cognition
- Learn the skills of reading comprehension and to enhance vocabulary.
- Acquaint with the problems of reading across curriculum.

COURSE CONTENT

Unit I: Introduction to Reading

Reading ó Meaning and Process, Importance of Reading across Curriculum, Characteristics of Reading, Developing reading skills. Role of libraries in promoting reading habits

Unit II: Techniques and Methodology of Reading

Levels of reading ó literal, interpretative, critical and creative, Types of reading ó intensive and extensive reading, oral & silent reading, Reading techniques ó skimming and scanning. Methodology of reading

Unit III: Reading the Text

Types of Texts ó Narrative, expository, descriptive, suggestive, empirical, conceptual, ethnography, policy documents, field notes; Importance of Different Texts in Curriculum

Unit IV : Developing Reading Skills and Reading Comprehension

Developing Critical Reading Skills, Developing Reflective Skills, Activities for Developing Reading Skills, Developing Metacognition for Reading, Developing Reading Comprehension Developing Vocabulary for Reading, Problems of Reading

Practicum

- Divide the class in small group and provide different kinds of texts and instruct them to read and reflect according to the nature of text.
- Divide the group and provide one text and suggest students to make different interpretations.
- Design vocabulary games to enhance vocabulary.
- Read the text and provide a five words summary to each paragraph.
- Reading and comprehension exercises.
- Skim through the text and give suitable title to the text.
- Complete given text in stipulated time and summarize it in 6/7 lines with a suitable title.
- Making an oral presentation
- Organising a debate, discussion based on their reading
- Preparation of a poster
- Making a collage
- Displaying appropriate texts/graphic on bulletin board
- Addressing morning assembly during their internship in schools
- Making a power point presentation on selected topic
- Submission of written articles/assignments
- Writing maintaining reflective journals

*** In addition, school and community based activities may be organized with provisions for visits to innovative centres of pedagogy and learning, innovative schools, educational resource centres, etc. Action research based on teaching learning and school and community could be conducted.**

MSE VII.7A Internship in School Subject 1 – Physical Science (SAP-5)

&

MSE VII.7B :Internship in School Subject 2 – Mathematics (SAP-5)

OR

MSE VII.7C : Internship in School Subject 2 – Biological Science (SAP-5)

(Evaluation in each school subject shall be as per the break up shown below and all are internal)*

Credits : 12 (6+6)
Duration : 11 Weeks

Marks: *100
C1 + C2 : 50
C3 : 50

The activity is divided into three phases:

- Pre ó internship - 2 weeks
- Internship - 8 weeks
- Post internship- 1 week

- **Pre internship**

Objectives:

- To facilitate student teachers in designing and executing lessons in each pedagogy.
- To develop in student teachers the skills of observation and evaluating teaching of their peers

Activities

The student teachers will

- plan and teach minimum 3 lessons in each pedagogy
- observe minimum 5 lessons of their peers in each pedagogy
- participate in the mentoring sessions to plan lessons under the guidance of mentors.

- **Internship**

Objectives:

To provide the student teachers with the field experience of getting attached to a school for a long duration and develop professional skills of teaching, participate in various day to day functions of schools, and in organizing various activities.

Activities

- The student teachers will teach 20 lessons (excluding lesson givn during pre-internship) at secondary level in each pedagogy.
- The student teachers will organize various activities- co-curricular and extended subject based in the school.
- The student teachers will participate in various academic and administrative activities including monitoring and supervising students in school conducted tests and examinations.
- The student teachers will diagnose the learning difficulties of students and provide remedial instruction.
- The student teachers will conduct CCE and unit tests and prepare evaluation records

- **Post Internship**

Activities

- Submission of internship records - evaluation records, activity record, observation records, reflective diary

- PPT Presentation of reflections

Evaluation in each pedagogy is as follows:

C1 ó Pre-internship activities

C2 ó Internship records and post-internship presentation

C3 – Internship in teaching

EIGHTH SEMESTER

DISCIPLINE SPECIFIC ELECTIVE

PHYSICS

MSE VIII.1 : SOLID STATE PHYSICS

Credits: 3 (1L + 1T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To enable students to apply the basic knowledge of classical and quantum mechanics for an understanding of physics of nuclei and of solids.

COURSE CONTENT:

Unit I: Crystal Structure

Solids: Amorphous and Crystalline Materials. Lattice Translation Vectors. Lattice with a Basis ó Central and Non-Central Elements. Unit Cell. Miller Indices. Reciprocal Lattice. Types of Lattices. Brillouin Zones. Coordination number, packing fraction for cubic crystals (sc, bcc and fcc). Diffraction of X-rays by Crystals. Bragg's Law.

Unit II:

Elementary Lattice Dynamics: Lattice Vibrations and Phonons: Linear Monoatomic and Diatomic Chains. Acoustical and Optical Phonons. Dulong and Petit's Law, Einstein and Debye theories of specific heat of solids. T^3 law.

Magnetic Properties of Matter: Dia-, Para-, Ferri- and Ferromagnetic Materials. Classical Langevin Theory of dia ó and Paramagnetic Domains. Curie-Weiss Law, Discussion of B-H Curve. Hysteresis and Energy Loss.

Unit III:

Electrical Properties: Free electron model of a metal, solution of one dimensional Schrodinger equation in constant potential, Density of states. Fermi energy, Energy bands in solids, Distinction between metals, semiconductors and insulators. Kronig- Penney model. P and N type Semiconductors. Conductivity of Semiconductors, mobility. Hall effect- Expression for Hall coefficients. Applications of Hall effect.

Dielectrics: Dielectric Properties of Materials: Polarization. Local Electric Field at an Atom. Depolarization Field. Electric Susceptibility. Polarizability. Clausius Mosotti Equation.

Unit IV: Superconductivity

Superconductivity: Qualitative description, Experimental Results. Critical Temperature. Critical magnetic field. Meissner effect. Type I and type II Superconductors, London's Equation and Penetration Depth. Isotope effect. High temperature superconductors Applications

10. H. Ibach and H Luth, Solid-state Physics, Springer, 2009.

PRACTICALS

Exam Duration: 3 hrs

C3: 50 Marks

Objectives:

- To provide training in the broad methodology of science through investigatory type and open-ended laboratory exercises.
- To validate the theoretical basis of the experiments.

COURSE CONTENT:

(A minimum of TEN experiments to be selected from the following)

1. Measurement of susceptibility of a paramagnetic solution (Quinck's Tube Method)
2. To measure the Magnetic susceptibility of Solids.
3. To determine the Coupling Coefficient of a Piezoelectric crystal.
4. Determination of Hall coefficient in semiconductors.
5. Determination of Curie temperature of ferromagnet.
6. Determination of work function of a metal using R-D equation.
7. To measure the Dielectric Constant of a dielectric Materials with frequency.
8. To determine the complex dielectric constant and plasma frequency of metal using Surface Plasmon resonance (SPR).
9. To determine the refractive index of a dielectric layer using SPR.
10. To study the PE Hysteresis loop of a Ferroelectric Crystal.
11. To draw the B- H curve of iron using a Solenoid and determine the energy loss from Hysteresis.
12. To measure the resistivity of a semiconductor (Ge) crystal with temperature by four-probe method (from room temperature to 150° C) and to determine its band gap. Franck-Hertz experiment.
13. Powder XRD pattern of KCl.
14. Powder XRD pattern of NaCl.

15. Powder XRD pattern of CaCl_2 .
16. Solar cell experiment.
17. Frequency resonance of LR circuit.
18. Polarisation by reflection-Brewster's law.

DSE 2B Chemistry

MSE VIII.2 : SPECTROSCOPY, NATURAL PRODUCTS AND HETEROCYCLICS

Credits: 3 (1L + 1T +1P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

To develop an understanding of the

- basic principles of Spectroscopy and apply the principles in the structural elucidation of simple organic compounds.
- chemistry of natural products, dyes and drugs, macromolecules and heterocyclic compounds

COURSE CONTENT:

Unit I : Spectroscopy

UV and Visible spectroscopy: Introduction, absorption laws, instrumentation, formation of absorption bands, types of electronic transitions, chromophores, auxochromes, absorption and intensity shifts, solvent effects, Woodward ó Fieser rules for calculating absorption maximum in dienes and α,β -unsaturated carbonyl compounds.

IR spectroscopy: Introduction, theory of molecular vibrations, vibrational frequency, factors influencing vibrational frequencies, finger print region and applications of IR spectroscopy.

NMR spectroscopy: Introduction, instrumentation, number of signals, position of signals (Chemical shift), shielding and deshielding effects, factors influencing chemical shifts-inductive effect, anisotropic effect and hydrogen bonding. Splitting of signals, spin-spin coupling, chemical exchange and coupling constant.
Structural determination of simple organic compounds using UV, IR and NMR spectral data.

Unit II: Natural Products

Carbohydrates: Introduction, classification and nomenclature. Configuration of monosaccharides. Erythro and threo diastereomers. Interconversions in carbohydrates ó glucose to fructose, fructose to glucose, aldopentose to aldohexose and aldohexose to aldopentose. Epimerisation, mechanism of osazone formation, Formation of glycosides, ethers and esters. Determination of ring size of monosaccharides. Structural elucidation of D(+) glucose. Mechanism of Mutarotation. Constitution of disaccharides - maltose, sucrose and lactose. Introduction to polysaccharides (starch and cellulose) without involving structure determination.

Alkaloids : Introduction, general methods of structural determination, structural elucidation of Conine, Nicotine and piperine

Terepinoids : Introduction, isoprene rule, structural elucidation of Citral and Menthol

Amino acids, Peptides, Proteins and Nucleic acids

Classification, structure and stereochemistry of amino acids. Acid-base behaviour, isoelectric point and electrophoresis. Preparation and reactions of α -amino acids. Classification of proteins. Peptide structure determination - end group analysis, selective hydrolysis of peptides. Solid-phase peptide synthesis. Primary and secondary structures of proteins. Protein denaturation.

Nucleic acids : Introduction, constituents of nucleic acids. Ribonucleosides and Ribonucleotides. The double helical structure of DNA. Types of different RNA and their functions in the synthesis of proteins. Genetic code.

Unit III: Dyes, Drugs and Macromolecules

Dyes: Introduction, Classification of dyes, Colour and constitution (electronic concept), synthesis and uses of Methyl orange, Phenolphthalein, Fluorescein and Indigo.

Drugs: Introduction, classification, structure and synthesis of sulpha drugs- sulphapyridine, sulphathiazole, sulphadiazine and sulphaguanidine, mechanism of action. Antimalarials ó plasmaquin, mepacrine and chloroquin.

Macromolecules: Introduction, Classification, Types of polymerization ó chain polymerization, step polymerization, free radical polymerization, co-polymerisation, Ionic polymerization, Coordination polymerization. Natural and synthetic rubbers ó buna S , butyl

rubber and neoprene. Synthetic fibres ó nylon 6, nylon 6,6, terylene. Conducting polymers ó polypropylenes and polyanilines. Bio-degradable polymers.

Unit IV: Heterocyclic Compounds

Introduction, methods of formation of five membered heterocycles ó furan, thiophene and pyrrole. Molecular orbital picture and aromatic characteristics of pyrrole, furan, thiophene and their chemical reactions with particular emphasis on the mechanism of electrophilic substitution. Six membered heterocycles: methods of formation of pyridine, mechanism of nucleophilic substitution reactions in pyridine derivatives. Comparison of basicity of pyridine, piperidine and pyrrole. Introduction to condensed five and six-membered heterocycles, preparation and reactions of Indole, quinoline and isoquinoline with special reference to Fischer indole synthesis, Skraup synthesis and Bischler-Napieralski synthesis. Mechanism of electrophilic substitution reactions of indole, quinoline and isoquinoline.

2. Organic Chemistry : I L Finar Vol II
3. Application of absorption Spectroscopy to Organic Compounds : John R Dyer
4. Organic Spectroscopy : William Kemp
5. Fundamentals of Molecular Spectroscopy : C N Banwell

PRACTICAL

Exam Duration : 3 hrs

C3 : 50

Objective:

To develop skills of synthesis and Estimation of organic compounds

COURSE CONTENTS:

1. Two step organic synthesis

1. Synthesis of p-bromoaniline from acetanilide
2. Preparation of o-iodobenzoic acid from anthranilic acid
3. Preparation of m-nitrobenzoic acid from methyl benzoate
4. Preparation of Paracetamol
5. Synthesis of Quinoline

2. Quantitative organic analysis

1. Estimation of aniline/ phenol by bromate-bromide method
2. Estimation of glucose by Fehlings method/ Spectrophotometry using 3,5 dinitro salicylic acid
3. Determination of iodine value of an oil by Wjøs method/ Chloramine-T method
4. Determination of saponification value of an ester / oil
5. Estimation of amino acid by formal titration method
6. Estimation of ascorbic acid in Vitamin C tablets by Volumetry

7. Estimation of Paracetamol by titrimetric and spectro photo metric methods.
8. Colorimetric Estimation of proteins by Biuret method

References :

1. Organic synthesis-special techniques V.K. Ahluwalia, 2nd Edition Narosa Publishing House
2. Organic Synthesis A.I. Vogel

DSE 3B Mathematics

MSE VIII.3:COMPLEX ANALYSIS& NUMERICAL ANALYSIS

Credits : 3 (1L + 2T + 0P)

Contact hrs per week: 5

Exam Duration : 2 hrs

Marks: 100

C₁ + C₂: 50

C₃ : 50

OBJECTIVES:

To develop the understanding & application of the concepts of complex analysis in problem solving situations. To enable and apply Numerical methods in solving problems related to real life situations with help of computers, which have become indispensable in modern world.

COURSE CONTENT:

Unit I:

Functions of a Complex Variable, Limits, Continuous Functions, Differentiability, The Cauchy-Riemann Equations, Analytic Functions, Harmonic Functions, Conformal Mappings. Elementary Transformations, Bilinear Transformations, Cross ratio, Fixed Points of Bilinear Transformations.

Unit II:

Complex Integration: Introduction, Definite Integral, Cauchy's Theorem, Cauchy's integral Formula, Higher Derivatives. Power Series: Introduction, Sequences and Series, Sequences and Series of Functions, Power Series, Elementary Functions.

Unit III:

Numerical Methods: Numerical Solutions of Algebraic and Transcendental equations, Bisection Method, Method of false position, Iteration method, Newton-Raphson method. Finite differences, Forward and Backward differences, Weierstrass theorem, Interpolation, Newton-Gregory forward and backward interpolation formulae, Divided differences, Lagrange's interpolation formula.

Unit IV:

Numerical Differentiation: Finding first and second derivatives using interpolation formulae, Difference equations.

Integration: General quadrature formula, Trapezoidal Rule, Simpson's 1/3 rule, Simpson's 3/8 rule, Weddle's rule, Newton-Cotes quadrature formula, Gauss quadrature.

3. Complex Analysis by Serge Lang, Springer Verlag
4. Theory of Functions of a Complex Variable by Shanthinarayan, S. Chand and Co. Ltd.
5. Foundations of Complex Analysis by Ponnuswamy, Narosa Publishing House.
6. An Introduction to the Theory of Functions of a Complex Variable by Copson, OxfordUniversity Press.
7. Complex Variables and Applications by Churchill, Brown and Verhey, McGraw Hill International Book Company.
8. Functions of One Complex Variable by Conway, Narosa Publishing House.
9. Theory and Problems of Complex Variables, Murray R. Spiegel, Schaum Outline Series, McGraw Hill Book Company.
10. Complex Analysis by Armugam, Tangapandi, Somasundaram, Scitech Publications Pvt. Ltd.
11. Numerical Analysis by Guptha, S. Chand and Co. Ltd.
12. Finite Differnece and Numerical Analysis by Saxena, S.Chand and Co. Ltd.
13. Introductory Methods of Numerical Analysis by Shstry, PHI.
14. Numerical Methods for Scientists and Engineers, Grewal, Wiley Eastern Ltd.
15. Higher Engineering Mathematics by Grewal, Wiley Eastern Ltd.
16. Advanced Engineering Mathematics by Kreyszig, Wiley Eastern Ltd.
17. Numerical Calculus by William Edmund Milne, Princeton University Press.
18. Introduction to Numerical Analysis by Hildebrand, Tata McGraw Hill Publishing Ltd.
19. Numerical Analysis by Schield, Schaumø Outline Series.
20. Introduction to Numerical Methods by Peter A. Stark, MacMillan Co. Ltd.

GENERIC ELECTIVE 2

MSE VIII.4 : INDIAN CONSTITUTION AND HUMAN RIGHTS

Credits 2 (2L+0T+0P)

Contact Hours per week: 2

Exam duration: 2 Hrs

Max. Marks: 100

C1+ C2: 50

C3: 50

Objectives:

On completion of this course, the student teacher will be able to

- know the importance, preamble and salient features of Indian Constitution
- appreciate the significance of Fundamental Rights, Duties and Directive Principles of State Policy.
- develop an understanding of the strength of the Union Government.
- understand the functioning of the State Government for the unity and the strength of the Democracy.
- know the importance of local self-Government and Panchayati Raj Institutions in India.
- know the meaning, significance, the growing advocacy of Human Rights.

Transaction Mode:

Through Lectures, Group discussions, Interactive sessions, field activities and use of Education Technology.

COURSE CONTENT:**Unit I: Meaning and Importance of the Constitution**

Preamble, Salient features, Constituent Assembly and the Spirit of the Indian Constitution.

Unit II: Fundamental Rights, Duties and Directive Principles

Fundamental Rights, Fundamental Duties, and the Directive Principles of the state policy of the Indian Constitution.

Unit III: Union, State and Local Self Governments

Union Government: Parliament, the President and Prime Minister: State Government: Governor and the Council of Minister: Judiciary: Functions and Powers: Panchayat Raj System.

Unit IV: Human Rights

Origin and Development of Human Rights, Growing Advocacy and Declining Trends of Human Rights, Rights of Scheduled Casts, Scheduled Tribes, Minorities, Children and Women, Human Rights Defenders, Human Rights Violation and Human Rights Organizations.

PROFESSIONAL EDUCATION COURSES

MSE VIII.5 : KNOWLEDGE AND CURRICULUM

Credits: 4 (2L+ 2T +0P)

Contact hrs per week: 6

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives:

This course is designed to help student teachers to

- Understand the concept and the need for curriculum in schools.
- Explore the influences of the knowledge categories, social, cultural, economic and the technological aspects in shaping the present school curriculum and the text books.
- Analyze the principles employed in sequencing the school curriculum and the syllabus at different levels.
- Identify various learning sites and resources operating as curriculum supports in the system.
- Analyze the multiple roles of schools in implementation of curriculum.
- Discuss the roles and responsibilities of curriculum stakeholders.
- Analyse the role of teachers in operational sing the curriculum.
- Examine the processes and criteria commonly used to evaluate curriculum in pursuit of improvement.
- Explore the evaluation approaches adopted to revise the curriculum at the national and state levels.
- Analyze the national curriculum frameworks for necessary reforms proposed and their implications at school level.
- Develop an image of oneself as a curriculum informant, designer, agent, and evaluator.

COURSE CONTENT:

Unit I: Concept and the nature of curriculum

- a) Meanings of curriculum; different perspectives of curriculum; need for curriculum in schools.
- b) Educational policy reforms leading to curriculum reforms; Relationship between curriculum framework, curriculum, syllabus and text books- their significance in school education.
- c) Meaning and concerns of core curriculum-its need and significance in Indian context; Meaning and concerns of Hidden curriculum and spiral curriculum and their relevance to learning.
- d) Types of curriculum: subject-centered, activity-centered, environmental centered, and community-centered and their relevance.

Unit II: Foundations of Curriculum Development

- a) **Forms of knowledge & Curriculum:** Forms of knowledge and structure of a Discipline, and their characterization in different school subjects; Logical grammar of different school subjects

- b) **Nature of learner & learning:** Nature of learner - needs and interests, and different perspectives on learning (behaviourists, cognitivists and social constructivists) and their implications to curriculum development
- c) **Socio –cultural:** Importance of society-school relationships ; Societal factors that affect the curriculum ; Multiculturalism, multilingual aspects, and societal aspirations; Social reconstruction, social efficiency, inequality in educational standards, need for common goals and standards;
- d) **Technological determinants :** Science and technological advancements, Using the resources of the information society in curriculum development
- e) **Some of the critical issues:** environmental concerns, gender concerns .inclusiveness, value concerns, social sensitivity, and globalization.

Unit III: Process of curriculum Development

- a) Understanding shifts in emphasis in approach to curriculum; from subject centered and behaviouristic learning to integrated approach involving development of perspectives, activity centered and constructivist orientation;
- b) **Behaviouristic orientation:** Formulating aims and objectives ó (general, specific - subject wise and level wise); Selecting content and learning experiences ó Principles involved; Organizing the content and learning experiences- Principles (continuity, sequence and integration: organizing elements- concepts, skills, and values); breadth of coverage and depth of understanding; applicability and relevance to school curriculum planning
- c) **Constructivists orientation:** curriculum embedded in real life contexts; authentic learning in real life contexts leading to knowledge construction; applicability and relevance to school curriculum planning

Unit IV Curriculum Implementation and Curriculum evaluation

- a) Operationalising curriculum into learning situations; Planning and converting curriculum into syllabus and curriculum engagement activities.
- b) Role of teachers in operationalising curriculum in generating dynamic curricular experiences through i) flexible interpretation of curricular aims ii) concept mapping iii) contextualization of learning v) selecting varied experiences and long range and daily planning, choice of resources, planning assessment etc.
- c) Planning and use of curricular materials: Text book; teachers hand book, source book, work book, manuals, and other learning materials such as kits, AV and software materials..
- d) School culture and climate in implementing the curriculum.
- e) Supports to curriculum engagement: available infrastructure and curriculum sites and resources (library, laboratory, playground, neighbourhood etc); Use of community resources in curriculum engagement .
- f) Role of external agencies ó National, Regional and State in developing the learning supports (including training of teachers) for curriculum implementation.
- g) Meaning of curriculum evaluation; Need for curriculum evaluation
- h) Process of curriculum evaluation and renewal: collecting opinions and views on school curriculum and text books from different stakeholders; studentsø attainability of curricular standards as one of the criterion; evaluation of the discrepancies observed between anticipated and observed inputs, transactions and outputs; critical analysis of text books ;evaluation of other curricular materials;
- i) Role of National, Regional and State bodies in empowering the teachers in evaluating curriculum

Sessional Work:

- Review of national curriculum frame works and write a report for presentation and discussion
- Analysis of teachers' handbooks, text books, workbooks, source books followed by Presentations.
- Readings of certain curriculum reviews and articles bearing significance to the course outlined and reflections on them

MSE VIII.6 : GUIDANCE AND COUNSELLING

Credits: 4 (3L+ 1T +0P)

Contact hrs per week: 5

Exam Duration: 2 hrs

Marks: 100

C1 + C2: 50

C3: 50

Objectives

The student teacher will be able to:

- appreciate the nature, purpose and need for guidance and counselling;
- sensitise the student-teachers with the need and relevance of Guidance and counselling.
- demonstrate an understanding of educational, vocational and personal guidance
- develop an understanding of the process of Guidance and Counselling
- understand the process of organization of guidance services in schools
- develop capacity of applying the techniques and procedures of guidance and counselling
- describe various testing and non- testing techniques
- develop the skill of administration and interpretation of psychological tests
- understand the concept and importance of career development.
- analyse the role of the teacher in the provision of Guidance and Counselling
- know the qualities required for good Counsellor

COURSE CONTENT

Unit I: Meaning and Nature of Guidance

Guidance: Concept, aims, objectives, functions and principles.

Need & Procedure for (Educational, Psychological and Social) guidance.

Purposes and Principles of organization of different guidance Services

Organization of guidance services at Secondary Level: Need and Importance

Group Guidance: Concept, Need, Significance and Principles, Organization of Guidance programs in schools.

Role of Guidance Personnel in organization of guidance services in School : Counsellor, Career Master, Psychologist, Doctor, Teacher Counsellor, Head of the Institution, Teacher, Social Worker

Unit II: Meaning and Nature of Counselling

Counselling: Meaning and nature; Difference between Guidance & Counselling; Principles and approaches of counselling, Individual and Group Counselling; Skills in Counselling- Skills for Listening, Questioning, Responding, & Communicating, Listening Attentively to the concerns of the counselee, Negotiating Self Discovery, Decision Making, Problem Solving etc and values such as Patience, Empathy etc.; Methods and Process of Counselling Academic, Personal, Career and Behaviour problems of students with special needs, viz. socio-emotional problems of children with disabilities and deprived groups such as SC, ST and girls, need for Counselling; Professional Ethics and Code of Conduct ; Qualities and Qualifications of an effective Counsellor

Unit III: Tools and Techniques of Guidance

Testing and Non-Testing Techniques for Studying and Appraisal of students : a) Testing Techniques: Intelligence/Mental Ability tests, Aptitude Tests, Attitude Scales, Interest inventories, and Personality Tests, b) Non-testing Techniques: Interview, Observation and Case Study, c) Tools-Questionnaire, Anecdotal Record, Cumulative Record Cards, etc,

Role of the teacher in Assessment and Testing.

Unit IV: Career Guidance and Counselling

Educational and Career Information in Guidance and Counselling: Meaning, Importance, collection, types, classification of occupational information; Dissemination of Occupational Information: Class talk, career talk, Group discussion, Preparation of Charts and Poster, Career Exhibition, Career conference; Guidance for gifted, slow learner, socio-economically disadvantaged children; Career development: Meaning and Importance; Teacher's role in Career planning, Vocational training and placement opportunities for CWSN. Broad outline with respect to the emerging courses and career options available in India; Guidelines for Establishment of Guidance Cell or Career Corners in Schools

Suggestive List of Activities:

- Group Guidance-Preparation of Class Talk and One Career Talk
- Visit to different Guidance Centre
- Design a checklist/Questionnaire to collect information on students and classify them under educational, psychological or social problem.
- Preparation of Cumulative Record
- To prepare a Case study and Analysis of Case study
- Administration, Scoring & interpretation of at least two tests: One Mental Ability Test and One Aptitude Test
- Job Analysis of a Counsellor
- Preparation of list of problem behaviours based on observation. Detailed study of the Guidance and Counselling Services available in a given School
- Prepare a Chart and Poster for dissemination of Career Information
- Familiarise and write a report of any one of the Personality Tests used in Guidance and Counselling

MSE VIII.7 : VALUE AND PEACE EDUCATION

Credits: 2 (1L+ 1T +0P)
Contact hrs per week: 3
Exam Duration: 2 hrs

Marks: 100
C1 + C2: 50
C3: 50

Objectives

The student teacher will be able to:

- Understand the need and importance of education for peace and values.
- Understand the nature, characteristics and types of human values.
- Understand the five core values of Truth, Righteous conduct, Peace, Love and Non-Violence.
- Appreciate the developments in Peace Education in India and Abroad.
- Understand various methods, techniques and approaches of value development.
- Appreciate the preamble to the constitution and values inherent in it.
- Understand various models of value education.
- Appreciate the importance of living together and imbibe in their attitude and behaviour.

COURSE CONTENT

Unit I: Concept, Meaning and Nature of value

Concept and meaning of value and Peace:

Indian and Western perspectives on value and Peace.

Reflections of great Indian thinkers on values and Peace(Gandhiji, Swami Vivekananda, Sri Aurobindo, Rabindratha Tagore, J. Krishnamurthi)

Understanding Peace in the individual, Social, National and International context

Nature and characteristics of values

Sources and selection of values -culture and human needs

Unit II : Concept, Meaning and Nature of Peace

Historical development of Peace education in India and in the world

Preamble to the Indian Constitution and values inherent in it

Exposition of the five human values of Truth, Righteous Conduct, Peace, Love and Non-Violence with illustrations from life and literature.

Creation of United Nations, UNESCO, UNICEF and their role in promoting value and Peace Education.

Unit III : Concept and need for Value-based Education and Education for Peace

Concept of value based education and Education for Peace with special reference to peace to Indian view of life;

Paradigm shift from Peace education to Education for Peace.

Need for and importance of value based education and Education for Peace in the present scenario.

Recommendations of Sri Prakasha Committee (1959) on value education.

Recommendations of Parliamentary Committee of HRD on Values Education (1996-90) headed by Shri S.B. Chauhan.

National Focus Group Report on Education for Peace (2005).

Curriculum development and Models of Value Education.

Models of value education; Rationale building model, the consideration model, valuing process and clarification model.

Aims and objectives of Value Based education and Education for Peace in the curriculum.

Integration of human values with all (school) academic subjects.

Unit IV :Pedagogy of Value Education and Education for Peace

- Approaches and Techniques of teaching human values:-
 - Direct approach: value based Story-telling, Group activities (dramatization, literary activities, games and sports, service activities), Counselling, organizing value based co-curricular activities.
 - Indirect Approach; Incidental Approach with illustrations
 - Integrated approach: Integration into curricular, co-curricular activities and subjects (with illustrations of integration from Language, Mathematics, science and social science , art and aesthetics , Yoga and health education,
- Teacher as Role Model.
- Role of school ambience and environment in development of values.

Practicum

- Develop / compile stories with values from different sources and cultures, organize value based co-curricular activities in the classroom and outside the classroom, develop value based lesson plans, integrating values in school subjects.
- Study of any Model of integrated value education ó case study of models expressed by Sri Sathya Sai, J. Krishnamurti, etc.
- Visit to Ramakrishna Institute of Moral and spiritual Education

In addition, school and community based activities may be organised.

Evaluation Strategies

1. Reflective reading based presentations.
2. Unit tests.
3. Quiz based evaluation
4. Seminar presentation
5. Submission of case reports on violation of peace as reported through mass-media.

NINTH SEMESTER

MSE(C)-IX.1 METHODS OF CHEMICAL ANALYSIS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit - I

Analytical Chemistry - Meaning and analytical prospective, scope and function: Analytical problems and their solutions, trends in analytical methods and procedures.

Language of analytical chemistry - Analysis, determination and measurement. Techniques, methods, procedures and protocols. Classifying analytical techniques. selecting an analytical method - accuracy, precision, sensitivity, selectivity, robustness and ruggedness. Scale of operation, equipment, time and cost. Making the final choice

Basic laboratory operations, Sampling, weighing, drying, dissolving, Acid treatment, Flux treatment, Difficulties in using fluxes, Decomposition of organic matter, Requirement for suitability of reaction for use in chemical analysis, Rules of work in analytical laboratory, General rule for performing quantitative determinations (volumetric, gravimetric), Safety in analytical laboratory, Rules of fire prevention, Prevention of accidents and First aid.

Acid-base titrations in non-aqueous media: Role of solvent in acid-base titrations, solvent systems, differentiating ability of a solvent, some selected solvents, titrants and standards, titration curves, effect of water, determining the equivalence point, typical applications determination of carboxylic acids, phenols and amines.

Unit-II

Standardization and calibration: Comparison with standards-direct comparison and titrations. External standard calibration-the least squares method, regression equation, regression coefficient. Internal standard methods and standard-addition methods. Figures of merit of analytical methods-sensitivity and detection limit, linear dynamic range.

Obtaining and preparing samples for analysis: Importance of sampling, designing a sample plan-random, judgement, systematic-judgement, stratified and convenience sampling. Type of sample to collect-grab and composite samples. Insitu sampling. Size of sample and number of samples. Implementing the sampling plan-solutions, gases and solids. Bringing solid samples into solution-digestion and decomposing.

Unit III

Titrimetric analysis: An overview of titrimetry. Principles of titrimetric analysis. Titration curves. Titrations based on acid-base reactions - titration curves for strong acid and strong base, weak acid and strong base and weak base and strong acid titrations. Selecting and evaluating the end point. Finding the end point by visual indicators, monitoring pH and temperature. Quantitative applications ó selecting and standardizing a titrant, inorganic analysis - alkalinity, acidity and free CO₂ in water and waste waters, nitrogen, sulphur ammonium salts, nitrates and nitrites, carbonates and bicarbonates.

Precipitation titrations: Titration curves, feasibility of precipitation titrations, factors affecting

shape - titrant and analyte concentration, completeness of the reaction, titrants and standards, indicators for precipitation titrations involving silver nitrate, the Volhard, the Mohr and the Fajan's methods, typical applications.

Complexometric titrations: Complex formation reactions, stability of complexes, stepwise formation constants, chelating agents, EDTA - acidic properties, complexes with metal ions, equilibrium calculations involving EDTA, conditional formation constants, derivation of EDTA titration curves, effect of other complexing agents, factors affecting the shape of titration curves - completeness of reaction, indicators for EDTA titrations - theory of common indicators, titration methods employing EDTA - direct, back and displacement titrations, indirect determinations, titration of mixtures.

Unit IV

Precipitation : Desirable properties of gravimetric precipitates. Formation of gravimetric precipitates. Conditions for quantitative precipitation. Contamination in precipitates. Methods for removing impurities in precipitates. Organic precipitants (oxine, cupferron, dimethyl glyoxime) in chemical analysis. Precipitation from homogeneous solution.

Errors and treatment of analytical data: Limitations of analytical methods ó Error: determinate and indeterminate errors, minimization of errors. Accuracy and precision, distribution of random errors, the normal error curve. Statistical treatment of finite samples - measures of central tendency and variability: mean, median, range, standard deviation and variance. Student's t-test, confidence interval of mean. Testing for significance - comparison of two means and two standard deviations. Comparison of an experimental mean and a true mean. Criteria for the rejection of an observation - Q-test. Propagation of errors: determinate errors and indeterminate errors.

MSE(C)-IX.2 CONCEPTS AND MODELS OF INORGANIC CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I

Structures and energetics of ionic crystals: Introduction, radius ratio rules, structures of some ionic crystals, MX (NaCl, CsCl, ZnS) and MX₂ (fluorite, rutile, -cristobalite and cadmium iodide) types. The perovskite and spinel structures. Thermodynamics of ionic crystal formation. Lattice energy, Born-Landè equation, Born-Haber cycle and its applications, Kapustinskii equation. Applications of lattice energetics. Covalent character in ionic bonds and solubility of ionic solids.

Structures and energetics of inorganic molecules: Introduction, Energetics of hybridization. VSEPR model for explaining structure of AB, AB₂E, AB₃E, AB₂E₂, AB₃E₃, AB₂E₃, AB₄E₂, AB₅E and AB₆ molecules. M.O. treatment for homonuclear and heteronuclear diatomic molecules. M.O. treatment involving delocalized π -bonding (CO₃²⁻, NO₃⁻, NO₂⁻, CO₂ and N₃⁻). M.O. correlation diagrams (Walsh) for triatomic molecules.

Unit II:

Chemical Periodicity: Review of periodic properties.

Metallic bonding: Characterization of metallic states, VB approach, band theory, conductors, insulators, semiconductors, defects in solids.

Modern concept of acids and bases: Lux-Flood and Usanovich concepts, solvent system and leveling effect. Hard-Soft Acids and Bases, Classification and Theoretical backgrounds.

Non-aqueous solvents: Classification of solvents, Properties of solvents (dielectric constant, donor and acceptor properties), Reactions studied in liquid ammonia, anhydrous H₂SO₄, HF, liquid SO₂, BrF₃ and N₂O₄. Super acids.

Unit III:

Chemistry of main group elements: Diborane and its reactions, polyhedral boranes (preparation, properties, structure and bonding). Wade's rules, carboranes and borazines.

Inorganic chains, rings and cages of boron and carbon.

Silicates: Structure, classification - silicates with discrete anions, silicates containing chain anion, silicates with layer structure, silicones with three dimensional net work and applications.

Silicones: General methods of preparation, properties. Silicone polymers - silicone greases, silicone resins, silicone rubbers and their applications.

Heterocyclic inorganic ring system: Sulphur-nitrogen ring, nitrogen-phosphorous ring.

Phosphonitrilic or phosphazine polymers: Preparation, properties, structure and applications.

Interhalogen compounds and pseudohalogens.

Noble gas compounds: Preparation and structure of noble gas compounds (oxides and fluorides).

Unit IV:

Lanthanides: Correlation of electronic structures, occurrence and isolation, lanthanide contraction and its consequences, separation - Chemistry of separation of Np, Pu & Am from

U & fission products. Oxidation states and general properties ó Comparison with d-block elements, Lanthanide contraction and its significance, Coordination compounds of lanthanides - Spectral and magnetic characteristics of lanthanides, Uses: lanthanides as shift reagents, high temperature super conductors.

Actinides: Occurrence and preparation of elements, Isolation of the elements: thorium and uranium, enrichment of uranium for nuclear fuel, uranium hydrides, oxides and chlorides.

Chemistry of trans-uranium elements.

MSE(C)-IX.3 : STEREOCHEMISTRY AND ORGANIC REACTION MECHANISM

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit-I

Stereoisomerism: Review of Projection formulae [Fly wedge, Fischer, Newman and Sawhorse], enantiomers, diastereoisomers, racemic mixture and their resolution, configurational notations of simple molecules, DL and RS configurational notations.

Stereoselectivity: Stereoselective reactions, diastereoselective reactions, stereospecific reactions, regioselective & regiospecific reactions.

Optical Isomerism: Conditions for optical isomerism, optical isomerism due to chiral centres and molecular dissymmetry, allenes and biphenyls, criteria for optical purity.

Geometrical isomerism: Geometrical isomerism due to C=C, C=N and N=N, E,Z conventions, determination of configuration by chemical methods.

Conformational Isomerism: Elementary account of conformational equilibria of ethane, butane and cyclohexane.

Conformational analysis: Conformation of cyclic compounds such as cyclopentane, cyclohexane and decalins. Conformational analysis of 1,2-, 1,3-, 1,4-disubstituted cyclohexanes. Effect of conformation on the course and rate of reactions.

Unit-II:

Structure and reactivity: Acids and Bases, Structural effects on acidity and basicity, hydrogen bonding, Resonance, inductive and hyperconjugation effects.

Reaction Intermediates: Formation, structure, stability, detection and reactions of carbocations (classical and non-classical), carbanions, free radicals, carbenes, nitrenes, nitrile ylides and arynes.

Substitution reactions: Mechanism of nucleophilic substitution reactions-Kinetics, Mechanism and stereochemical factor affecting the rate of SN1, SN2, SNi reactions, neighboring group participation.

Aromatic nucleophilic substitution: SN₁, SN₂ and benzyne mechanisms, Bucherer reaction.

Aromatic electrophilic substitution: Mechanism of nitration, halogenation, sulphonation, Friedel-Crafts alkylation and acylation with evidences, Mannich reaction, chloromethylation and Vilsmeier-Haack reaction.

Unit III:

Reaction Mechanism I: Classification of reactions, meaning and importance of reaction mechanism.

Determination of reaction mechanism by kinetic and non-kinetic-methods:

Kinetic Method: Mechanistic implications from rate laws, the transition state theory, ambiguities in interpreting kinetic data, solvent effect, ionic effect, isotopic effect, solvent isotopic effect, substituent effect, steric effect, linear free energy relationships ó Hammett equation and Taft treatment.

Non-kinetic methods; Energy profile diagram, identification of products, testing possible intermediates, trapping of intermediates, cross over experiments, isotopic labeling, stereochemical studies, limitations.

Aromaticity: Concept of aromaticity, Huckelø rule, Polygon rule, annulenes.

Unit IV:

Reaction Mechanism II: Mechanism of Addition reactions: Addition to C-C multiple bonds involving electrophiles, nucleophiles and free radicals. Markownikoffø rule and anti-Markownikoffø rule, Hydroboration and its application.

Typical additions to carbonyl compounds: Addition of hydrides, water, alcohol, thioalcohol, bisulphate, HCN, Grignard reagents and amino compounds.

Mechanism of reactions of carboxylic acids and their derivatives: Mechanism of ester hydrolysis, formation and hydrolysis of amides, decarboxylation mechanisms.

Mechanism of electrophilic substitution reactions-Kinetics, mechanism and stereochemical factor affecting the rate of SE1 & SE2.

Elimination reactions: Mechanism and stereochemistry of E1, E2, E1cb reactions, cis elimination, Hofmann and Saytzeff eliminations, competition between elimination and substitution, Chugaev reaction.

MSE(C)-IX.4 : CHEMICAL THERMODYNAMICS AND STATISTICAL THERMODYNAMICS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I:

Concept of Entropy and Free-energy, Entropy as a measure of unavailable energy. Entropy change during spontaneous process. Helmholtz and Gibbs energies as criteria of spontaneity and equilibrium, their variations with P, V and T. Maxwell's relations and their applications. Partial molar properties: Determination of partial molar volume by density measurement and by intercept method. Chemical potential and its significance, its variation with pressure and temperature. Formulation of Gibbs-Duhem equation, derivation of Duhem-Margules equation and its applications.

Unit II:

Fugacity: Determination of fugacity of gases, variation of fugacity with pressure and temperature. Activity and activity coefficient, variation of activity with pressure and temperature. Determination of activity coefficient by: vapour pressure, depression in freezing point, solubility measurement and emf methods.

Thermodynamics of dilute solutions: Raoult's law and Henry's law. Ideal and non-ideal solutions. Thermodynamic derivation of cryoscopy, ebullioscopy and osmotic pressure, determination of molecular weights using these methods. Donnan membrane equilibrium-thermodynamic treatment using chemical potential.

Heat capacity of solids: Einstein and Debye models of heat capacity of solids, Debye characteristic temperature and its significance.

Phase rule: Recapitulation of the terms: phase, component and degrees of freedom and Gibbs phase rule. Application of phase rule to the system of two components involving the formation of continuous series of solid-solutions-Roozeboom's classification. Systems of three components: Formation of one pair, two pairs and three pairs of partially miscible liquids.

Unit III:

Non-equilibrium thermodynamics: Basic principles of non-equilibrium thermodynamics, rate laws, second law for open system, law of conservation of mass, charge and energy, phenomenological equations for single and coupled flows. Onsager reciprocity relation. Theorem of minimum entropy production. Curie-Prigogine principle. Application of non-equilibrium thermodynamics: thermoelectricity, electrokinetic phenomenon and expression for streaming potential, electro-osmotic pressure difference, streaming potential using linear phenomenological equations and to biological membrane system-qualitative insight.

Unit IV:

Statistical thermodynamics: Basic definitions, probability, Phase spaces, micro and macro states, thermodynamic probability, statistical weight, ensemble, principle of equipartition of energy, Maxwell-Boltzmann distribution equation, partition function, translational, rotational and vibrational partition functions, evaluation of molar entropies, entropy of monatomic gas(Sackur-Tetrode Equation). Evaluation of internal energy, enthalpy, Helmholtz and Gibbs free energies, equilibrium constants, partition functions of atoms and diatomic molecules.

Distribution equations: Bose-Einstein and Fermi-Dirac. Free energy function and its use in evaluating the equilibrium constant, entropy of water and hydrogen.

MSE(C)-IX.5 : LAB I - ANALYTICAL PRACTICAL – I**Credits : 2(0L+0T + 2P)****Contact Hrs per week : 4****Exam. Duration: 4 Hrs****Max.Marks :100****C1 + C2:50****C3:50****COURSE CONTENT:**

Quantitative Analysis: (Any ten of the following experiments)

1. Determination of iron in haematite ore using cerium(IV) solution (0.02M) as the titrant, and gravimetric estimation of insoluble residue.
2. Estimation of calcium and magnesium carbonates in dolomite using EDTA titration, and gravimetric analysis of insoluble residue.
3. Determination of manganese dioxide in pyrolusite using permanganate titration.
4. Quantitative analysis of copper-nickel in alloy/mixture:
5. Copper volumetrically using KIO_3 .
6. Nickel gravimetrically using DMG
7. Determination of lead and tin in a mixture: analysis of solder using EDTA titration.

- 8 Complexometric determination of calcium and lead in a mixture.
- 9 Quantitative analysis of chloride and iodide in a mixture:
10. Iodide volumetrically using KIO_3
- 11 Total halide gravimetrically.
- 12 Determination of chlorate in commercial samples by iodometric method.
- 13 Determination of borax by neutralization titration.
10. Gravimetric analysis of molybdenum with 8- hydroxyquinoline.
11. Titrations of amino acids with HClO_4 in CH_3COOH medium.

MSE(C)-IX. 6 : LAB II - PHYSICAL CHEMISTRY PRACTICAL – I (Any ten out of the following suggested experiments)

Credits : 2(0L+0T + 2P)

Contact Hrs per week : 4

Exam. Duration: 4 Hrs

Max.Marks :100

C1 + C2:50

C3:50

COURSE CONTENT:

1. Study of kinetics of hydrolysis of an ester using $\text{HCl}/\text{H}_2\text{SO}_4$ at two different temperatures, determination of rate constants and energy of activation.
2. Study of kinetics of reaction between $\text{K}_2\text{S}_2\text{O}_8$ and KI , first order, determination of rate constants at two different temperatures and E_a .
3. Conductometric titration of a mixture of HCl and CH_3COOH against NaOH .
4. Conductometric titration of a mixture of HCl , CH_3COOH and CuSO_4 against NaOH .
5. Potentiometric titration of KI vs KMnO_4 solution.
6. Determination of dissociation constant of a weak acid by potentiometric method.
7. Potentiometric titration of AgNO_3 vs KCl .
8. To obtain the absorption spectra of coloured complexes, verification of Beer's law and estimation of metal ions in solution using a spectrophotometer.
9. Spectrophotometric titration of FeSO_4 against KMnO_4 .
10. Determination of heat of solution of benzoic acid by variable temperature method (graphical method).
11. Thermometric titration of hydrochloric acid with a NaOH .
12. Determination of molecular weight of a compound using Beckmann's cryoscopic method using benzene or/and water as solvent.
13. Potentiometric titrations of (a) Fe(II) vs V(V) .
14. Kinetics of photodegradation of indigocarmine (IC) using TiO_2 as photocatalyst and study the effect of $[\text{TiO}_2]$ and $[\text{IC}]$ on the rate of photo degradation.
15. Conductometry óTo determine the degree of hydrolysis and hydrolysis constant of aniline hydrochloride.

16. Conductometric titration of potassium iodide with mercuric perchlorate.
17. Determination of the molecular weight of a polymer material by viscosity measurements (cellulose acetate/methyl acrylate).

MSE(C)-IX.7 FOUNDATIONS OF HIGHER SECONDARY EDUCATION

Credits : 3(2L + 1T+0P)

Contact Hrs per week : 4

Exam. Duration: 2 Hrs

Max.Marks :100

C₁ + C₂ : 50

C₃ : 50

Objectives:

- Understand the concept of Education and its Epistemological premises
- Analyses the Discipline categories and their Logical distinctions
- Understands Education as a Discipline and its contribution to curriculum courses
- Analyses the societal problems and the necessity for Peace Education in schools
- Explores the possible sources of value conflicts , crisis among Higher secondary learners and teacher's role in helping to resolve value conflicts
- Analyses various perspectives and thoughts on Peace and Peace Education
- Analyses the role of Education in a Pluralistic society like India and a need for culture-specific pedagogy in School Education
- Reflects on the social discriminations , inequalities and the oppressed groups, as a teacher, as well as a member of the society and develops responsible attitude and commitment
- Understands the school as a sub system of society and its responsibilities in reflecting the cultural and social ethos in its aims and functions
- Examines the concerns and issues of contemporary Indian Society and their bearing upon Education

Transaction Mode:

Lectures followed by Discussions; Group Discussions; Seminars; Collaborative Presentations; Assignments

COURSE CONTENT:

Unit I :

Education as a critical concept and criteria of educative process; Knowledge and disciplines; Logical distinction between Scientific and Mathematical Knowledge; Education as a discipline; Multidisciplinary nature of education; Concept and nature of value and value education; Factors contributing to value development; Value shifts; Need for education for peace; Value crises in adolescent learners; Methods of resolving value conflicts; Human rights; Role of education in promoting peace; Use of curricular and co-curricular areas in promoting peace as a value; Rationality as a value to be developed in learners.

Unit II :

Styles of learning and thinking ó implications for understanding the adolescent learner; Sociocultural factors influencing learning.

The process of adult learning ó cognitive changes (Praget and Elkind); role of feedback and incentives; learner's experience in the construction of knowledge.

Personality and development of self; The intra and interpersonal realm ó self perception, self-defeating behaviour, self presentation, impression and management, self-monitoring; search for identity (Erikson), time of turmoil.

Mental health and management ó Issues and concerns; adjustment and adjustment mechanisms; role of teacher in management.

Unit III :

Characteristic of Indian society : Multicultural, Multilinguistic and Multireligion system and role of senior Secondary Teacher

Socialization and acculturation, etc. influence on personality development in education.

Modernisation, its attributes and effect on present system of education.

Democratic values, equality and social justice, its importance in classroom teaching at higher secondary level.

Unit IV : Issues and Concerns of Senior Secondary Education

Gender equality, Inclusive Education for Children with Diverse Needs. Environmental Concerns, Sustainable Education, Quality Teacher Education, Globalization and its Effect over Education System.

TENTH SEMESTER

MSE(C)-X.1 : SPECTROSCOPY I

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit-I:

Basic concepts and Introduction:

Properties of electromagnetic radiation: Wave property- interference, diffraction.

Particle property- Photoelectric effect. Regions of the electromagnetic spectrum, energies corresponding to various kinds of radiation. Interaction of electromagnetic radiation with matter (absorption, emission, transmission, reflection, dispersion, polarisation and scattering).

General applications.

Electronic spectroscopy:Molecular electronic absorption spectroscopy(UV-Visible)
Electronic spectra of diatomic molecules, electronic transitions, selection rules, assignment of transition band intensities, substituent and solvent effect, charge transfer transitions, Application to organic and inorganic molecules.

Photoelectron spectroscopy:

Basic principles; Photo-electric effect. ionisation process, Koopman's theorem. Photoelectron spectra of simple molecules, ESCA, chemical information from ESCA. Instrumentation.

Auger electron spectroscopy, basic ideas.

Unit-II:

Vibrational spectroscopy:

Infrared spectroscopy-Vibrational energy levels, infrared spectra of diatomic and polyatomic molecules, Normal modes of vibration, force constant, selection rules, anharmonicity, the vibration-rotation spectroscopy.

Infrared spectra of simple molecules and coordination compounds, changes in infrared spectra of donor molecules upon coordination (N,N-dimethylacetamide, urea, DMSO, pyridine N-oxide, ammine, cyano, cyanato and thiocyanato complexes), mono and multinuclear carbonyl complexes, nitrosyls, phosphine and arsine complexes. Change in spectra accompanying change in symmetry upon coordination (NO₃⁻, SO₄²⁻, NO₂⁻ etc), hydrogen bonding, instrumentation including FTIR.

Raman spectroscopy:

Theory, relation with IR spectroscopy, resonance Raman stimulated hyper and inverse Raman effects. Experimental techniques, structure determination from IR and Raman spectra.

Unit-III

NMR Spectroscopy: Magnetic properties of nuclei (magnetic moment, g factor, nuclear spin), effect of external magnetic field on spinning nuclei, Larmor precession frequency, resonance conditions, population of nuclear magnetic energy levels, relaxation processes, relaxation time. Chemical Shift: Standards employed in NMR, factors influencing chemical shift: electronegativity, shielding and deshielding, van der Waals deshielding magnetic anisotropy,

H-bonding, diamagnetic and paramagnetic anisotropies, spin-spin coupling, chemical shift values and correlation for protons bonded to carbon and other nuclei, Instrumentation. Chemical shift equivalence and magnetic equivalence, effects of chiral centre, Karplus curve-variation of coupling constants with dihedral angle. Complex NMR Spectra: Simplification of complex spectra-isotopic substitution, increased magnetic field strength, double resonance and lanthanide shift reagents; Nuclear Overhauser Effect (NOE), variable temperature probe, FT-NMR,

Spectroscopy and advantages.¹³C-NMR Spectroscopy: Comparison of ¹H-NMR and ¹³C-NMR, multiplicity-Proton decoupling-Noise decoupling-Off resonance decoupling-Selective proton decoupling - Chemical shift, application of CMR. NMR of ¹⁹F, ³¹P, ¹¹B and ¹⁵N Applications of NMR: Structural diagnosis, conformational analysis, keto-enol tautomerism, H-bonding. Two dimensional NMR Spectroscopy: COSY, NOESY, MRI.

Unit-IV

Electron Spin Resonance Spectroscopy: Basic principles, hyperfine couplings, the g -values, factors affecting g -values, isotropic and anisotropic hyperfine coupling constants, Zero Field splitting and Kramer's degeneracy. Measurement techniques and Applications to simple inorganic and organic free radicals and to inorganic complexes.

NQR Spectroscopy: Quadrupolar nuclei, electric field gradient, nuclear quadrupole coupling constants, energies of quadrupolar transitions, effect of magnetic field. Applications.

Mössbauer spectroscopy: The Mössbauer effect, chemical isomer shifts, quadrupole interactions, measurement techniques and spectrum display, application to the study of Fe²⁺ and Fe³⁺ compounds, Sn²⁺ and Sn⁴⁺ compounds, nature of M-L bond, coordination number and structure), detection of oxidation states and inequivalent Mössbauer atoms.

MSE(C)-X.2 : ADVANCED INORGANIC CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit-I:

Molecular symmetry and group theory: Symmetry elements and symmetry operations. Concept of a group, definition of a point group. Classification of molecules into point groups. Subgroups. Schoenflies and Hermann-Mauguin symbols for point groups. Multiplication tables (C_n, C_{2v} and C_{3v}). Matrix notation for the symmetry elements. Classes and similarity transformation.

Representation of groups: The Great Orthogonality theorem and its consequences.

Character tables (C_{2v}, C_{2h} and C_{3v}). Symmetry and dipole moment.

Preparation of coordination compounds: Introduction, Preparative methods of simple addition reactions, substitution reactions and oxidation-reduction reactions, Geometries of metal complexes of higher coordination numbers (2-12).

Stability of coordination compounds: Stepwise and overall formation constants, trends in stepwise stability constants, factors influencing the stability of metal complexes with reference to the nature of metal ion and ligands, the Irving-William series, chelate effect. Determination of stability constants of metal complexes by spectrophotometric and polarographic methods.

Unit II:

Crystal field theory: Salient features of CFT, d-orbital splitting in octahedral, tetrahedral, square planar and tetragonal complexes, Jahn-Teller distortions. measurement of $10 Dq$ and factors affecting it. Spectrochemical series, Evidences for metal-ligand covalency.

Molecular Orbital Theory: MO energy diagrams for octahedral, tetrahedral and square planar complexes without and with pi-bonding.

Electronic spectra: Introduction, selection rules and intensities, electronic spectra of octahedral and tetrahedral complexes, Term symbols for d_n ions, Orgel and Tanabe-Sugano diagrams, electronic spectra of octahedral, tetrahedral and square complexes, charge-transfer spectra.

Magnetic properties: Introduction, Magnetic susceptibility and its measurements (Gouy's and Faraday's methods), Spin and orbital contributions to the magnetic moment, the effect of temperature on magnetically dilute (diamagnetic and paramagnetic) and non-dilute compounds (ferromagnetic, antiferromagnetic) compounds.

Unit-III

Reactions and Mechanisms: Introduction Substitution reactions- Inert and labile compounds, mechanisms of substitution. Kinetic consequences of Reaction pathways-

Dissociation, interchange and associative. Experimental evidence in octahedral

substitution- Dissociation, Associative mechanisms, the conjugate base mechanism, the kinetic chelate effect. Stereochemistry of reactions Substitution in trans and its complexes, isomerization of chelate rings. Substitution reactions of square-planar

complexes- Kinetics and stereochemistry of square-planar substitutions, evidence for

associative reactions, explanations of the trans effect. Inner-sphere and outer-sphere electron transfer mechanisms.

Unit IV:

Metal-metal bonding: Evidences and factors favoring of M-M bonding, Wade-Mingos-Lauher rules, bi, tri, tetra, penta and hexa nuclear metal clusters.

Photochemical reactions: Prompt and delayed reactions, d-d and charge transfer reactions, transitions in metal-metal bonded systems. Photochemical reaction channels, Intramolecular photoreactions, Photodissociation and photoionization, Photoisomerization, Intermolecular photoreactions, The coordination compound specificity. Ligand field photochemistry, Photochemistry from LC or LLCT states, Photosensitized reactions, energy storage.

MSE(C)-X.3 : SYNTHETIC ORGANIC CHEMISTRY AND CHEMISTRY OF NATURAL PRODUCTS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit-I:

Reduction: Catalytic hydrogenation (homogeneous and heterogeneous-catalysts), reduction of functional groups- Wilkinson catalyst. Baker's yeast, LiAlH_4 , NaBH_4 , metal dissolving reactions (Birch reduction). Leuckert reaction (reductive amination), Meerwein-Ponndorf-Verley reduction, Wolf-Kishner reduction. Clemmensen reduction.

Oxidation: Oxidation with chromium and manganese compounds (CrO_3 , $\text{K}_2\text{Cr}_2\text{O}_7$, PCC,

PDC, Sarret reagent, Jones reagent, MnO₂, KMnO₄, ozone, peroxides and peracids, lead tetra acetate, periodic acid, OsO₄, SeO₂, NBS, chloramine-T, Sommelet oxidation, Oppenauer oxidation

Unit-II

Reactions and Reagents in Organic synthesis: Use of following reagents in organic synthesis and functional group transformations: Lithium diisopropylamide (LDA), Gilman reagent, dicyclohexyl carbodiimide (DCC), dichloro dicyano quinone (DDQ), trialkyl silyl halides, phase transfer catalyst, Fenton's reagent, Ziegler-Natta catalyst, diazomethane, epoxidation, Stark enamine reaction, Phosphorus ylides & Wittig reaction, 1, 3- dithiane anions-Umpolung reaction, sulphur ylides & reactions with aldehydes and ketones, Peterson reaction-synthesis of alkenes.

Unit-III

Protecting groups: Protection of hydroxyl, carboxyl, carbonyl and amino groups. Illustration of protection and de-protection in synthesis.

Aldol and related reactions: Keto-enol tautomerism, mechanism and synthetic applications of aldol condensations, Claisen reaction, Perkin reaction, Knoevenagel, benzoin, Darzens Glycidic ester condensation, Cannizzaro reaction, Tschenko reaction. Michael addition.

Introduction to disconnection approach: Basic principles and terminologies used in disconnection approach. One group C-X and two group C-X disconnections.

Unit IV:

Chemistry of Natural Products

Alkaloids: Introduction, classification, isolation and general methods of structural elucidation, biological importance. Structural elucidation and synthesis of Atropine, Papaverine and Quinine.

Terpenoids: Introduction, classification and general methods of structural elucidation, biological importance. Structural elucidation and synthesis of alpha- terpineol, alpha- Pinene and Camphor.

Steroids: Introduction, Structural elucidation and synthesis of Cholesterol and Ergosterol. Biological importance of bile acids, estrone, progesterone, testosterone, androsterone and corticosterones.

MSE(C)-X.4 : QUANTUM , NUCLEAR AND RADIATION CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I : Quantum Chemistry

A brief survey of: black body radiation, photoelectric effect, Compton effect, Uncertainty principle, de Broglie's concept, Bohr's theory hydrogen atom. Concept of operators (operator-operand), Algebra of operators, commutative and non-commutative operators, linear operator, Laplacian operator, Hamiltonian operator, Eigen value, eigen function, class Q function, turnover rule. Wave equation for stretched strings, Shrodinger equation to a free particle and to a particle trapped in a potential field (one dimension and three dimensions).

Degeneracy, wave equation for hydrogen atom, separation and solutions of R, Phi and theta equations. Application of Schrodinger equation to rigid rotator and harmonic oscillator. Approximate methods-Necessity of approximate methods, perturbation method-first order and second order correlation, application to He-atom(first order correlation only)-calculation of first ionization and binding energy.

Unit II: Nuclear chemistry

Radioactive decay-General characteristics, decay kinetics, parent-daughter decay- growth relationships, determination of half-lives, mention various nuclear models, discussion on shell-model, liquid-drop model, collective model.Nuclear stability-binding energy, proton-neutron ratio, magic number, packing fraction, nuclear stability with respect to beta decay. Theories of alpha, beta and gamma decays. Nuclear reactions- Bethe's notation, types of nuclear reations-specific nuclear reactions, Photonuclear reactions, fission and fusion reactions, Oppenheimer-Phillipe process, spallation reactions, conservation in nuclear reactions, reaction cross-section.

Units of radioactivity-Curie, Bequrel and related calculations. Preparation of artificial radioisotopes by bombardment, radiochemical separation techniques- carrier, solvent extraction and ion-exchange.Szirald-Chalmers reaction. Nuclear power reactors-basic features and components of power reactors. An introduction to breeder reactor.

Unit III : Radiation Chemistry

Introduction, units, interaction of electromagnetic radiation with matter, G-value, LET of radiation, dosimetry,Fricke and cericsulphate dosimeters.Radiolysis-cysteine and biphenyl. Radioisotopes as tracers, use of isotopic tracers in the elucidation of reaction mechanism, structure determination and solubility sparingly soluble substances. Carbon-14 dating, isotope dilution, neutron activation analysis, radiometric titrations. Medicinal applications of isotopic tracers.Hazrds of radiochemical work and radiation protection.

Radiation detection and measurement: Experimental techniques in the assay of radioisotopes, gas-filled detectors-ionization chamber, proportional and Geiger-Muller counters-G.M. plate, dead time and its determination. coincidence loss, scintillation counters, solid state detectors.

Unit IV : Photochemistry

Introduction to photochemistry- quantum yield and its determination, factors affecting quantum yield. Actinometry- uranyl oxalate and ferrioxalate actinometers, acetone and diethylketone actinometers. Term, symbol and significance. Photosensitization: by mercury, dissociation of Hydrogen iodide. Photochemical kinetics of decomposition of acetaldehyde, formation of HCl. Photodegradation: Photocatalyst-ZnO, TiO₂: principle and application of ZnO/TiO₂ in photodegradation of dyes (IC), pesticides(DDT) and in industrial effluents, effect of photodegradation COD value.

MSE(C)-X.5 : LAB III - ORGANIC PRACTICAL – I

Credits : 2(0L+0T + 2P)
Contact Hrs per week : 4
Exam. Duration: 4 Hrs

Max.Marks :100
C1 + C2:50
C3:50

COURSE CONTENT:

1. Preparation of o-chlorobenzoic acid from phthalic anhydride
2. Preparation of p-nitroiodobenzene from para nitroaniline.
3. Preparation of m-nitroaniline from nitrobenzene
4. Preparation of p-aminoazobenzene from aniline
5. Preparation of sym-tribromoacetanilide from aniline
6. Preparation of anthranilic acid from phthalic anhydride
7. Preparation of benzidine from nitrobenzene
8. Preparation of m-nitrobenzoic acid from methyl benzoate
9. Preparation of 2-phenyl indole using phenyl hydrazine
10. Preparation of benzilic acid from benzoin

MSE(C)-X.6 : LAB IV - INORGANIC PRACTICAL – I (Any ten out of the following suggested experiments)

Credits : 2(0L+0T + 2P)
Contact Hrs per week : 4
Exam. Duration: 4 Hrs

Max.Marks :100
C1 + C2:50
C3: 50

COURSE CONTENT:

A. Qualitative Analysis:

Semimicro qualitative analysis of mixtures containing TWO anions and TWO cations and ONE of the following less common cations: W, Mo, Ce, Ti, Zr, V and Li.

B. Inorganic Synthesis: (Any five of the following experiments)

1. Preparation of Chloropentammine cobalt(III) chloride and Estimation of chloride in a complex by potentiometric or ion-exchange method
2. Synthesis and characterization of tris-triphenyl phosphine copper(II)nitrate. Estimate copper.
3. Preparation of cis- and trans- dichlorobis(ethylenediammine) cobalt(III)chloride. Record the UV-Vis spectra and compare it with cis-form.
4. Preparation of hexaammine cobalt(III) chloride and estimate cobalt ion.
5. Synthesis of bis-dichlorotriphenyl phosphine nickel(II).
6. Determination of magnetic susceptibility of any two compounds/complexes by Gouy method.
7. Determination of the composition of iron-phenanthroline complex by:
(a) Jobø method and
(b) Mole ratio method
8. Determine the stability constant of iron-phenanthroline by Turner-Anderson method.
9. Preparation and kinetics of the acid hydrolysis of potassium trisoxalato cobaltate(III) trihydrate.
10. Preparation of tris(oxalato)ferrate(III) and estimate the metal ion.
11. Preparation of hexaammine nickel(II) chloride.
12. Preparation of the EDTA complex of Mn(II).
13. Estimate the chloride ion in a given complex by silver nitrate titration after ion-exchange separation.

MSE(C)-X.7 : TEACHING OF CHEMISTRY

Credits: 3 (2L+1T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C₁ + C₂ : 50
C₃ : 50

Objectives:

The student teacher will be able to

- Understand the nature and scope of Chemistry
- Understand the different pedagogical approaches to teaching of Chemistry
- Plan learning designs based on problem situations, inquiry and projects
- Explore the use and relevance of different learning resources and materials in teaching of Chemistry
- Study the facilities and materials available in chemistry labs for teaching chemistry at higher secondary level

- Familiarize with different types of curricular projects in Chemistry, their purpose and themes
- Analyse the text books and other instructional materials with reference to the content, its organization, learning experiences and other characteristics
- Prepare tools for assessing learning of chemistry

COURSE CONTENT:

Unit I: Aims, Objectives and Approaches to Teaching/Learning Chemistry

Chemistry as a pure and experimental science; processes of scientific method; applied disciplines of chemistry; objectives of teaching chemistry at +2 level based on the aims of education as reflected in NCF-2005; Criteria of selecting learning objectives-integration of process skills and learning attainments, promoting scientific temper and creativity as the other aims of teaching/learning chemistry; Approaches to teaching/learning chemistry: Investigatory approach, Inquiry method, Problem solving, Problem Based Learning, Projects, Demonstration Cum Discussion, Discovery and Guided Discovery learning, Inductive and deductive methods, and concept attainment approaches, Cooperative and collaborative learning, Self learning methods, ICT integrated approaches for teaching/learning Chemistry. (The above listed approaches will be illustrated drawing specific examples from content at +2 level followed by group work), Identification of teacher qualities to enhance scientific temper and creativity and suitable approaches to develop these in learners.

Unit II : Planning for Teaching/Learning of Chemistry

Pedagogical Analysis: Meaning and importance, identification of content categories-facts, concepts, principles, generalizations, laws and theories, pedagogical analysis of content reflecting STS links and social concerns and issues if any, writing learning objectives, identification of learning experiences for teaching different content categories; Preparation of lessons for teaching/ learning of chemistry: Components-Learning objectives, learning concepts, connecting to prior knowledge, learning resources, sequential learning experiences: Designing learning episodes and activities, grouping of learners, designing of group tasks, teachers' questions, scaffolding with the present knowledge, black board work, use of ICT and other learning resources, review and assignments.

Suggested topics for pedagogic analysis

1. Laws of Chemical Combinations
2. Mole Concept and Molar Masses
3. Electronic Configuration of Elements and their Periodic Properties
4. Laws of Chemical Equilibrium and Factors affecting equilibrium
5. Acids, bases and salts
6. Electrical & Magnetic properties of Solids
7. Types of Solutions and Colligative properties
8. Galvanic cells, Electrolytic cells and Electrolysis
9. Rate of Chemical reaction and Factors influencing rate of reaction
10. Isomerism in Co-ordination compounds
11. **Redox reactions in terms of electron transfer**
12. Nomenclature of Organic compounds
13. Concepts in Organic Reaction Mechanism
14. Chemical reactions of Alcohols / Phenols / Carbonyl compounds

Unit III

Instructional and Curricular Resources

Chemistry Text books, lab manuals, journals on Chemistry Education, Teacher manuals, work sheets, Teaching Learning Aids, Laboratory work, multimedia and web based resources

Lab as a resource: Evolution of practical work in Chemistry and its purpose; Demonstration of content specific experiments on topics related to +2 content, Set of experiments in the lab to illustrate process skills related to learning of chemistry; Planning, designing and demonstrations of experiments, Recent trends and issues in practical work

Curricular Resources: Study of curricular projects at the State/ National/Inter National Levels in Chemistry; Critical analysis of CBSE syllabus and text books in Chemistry based on the validities enumerated in NCF-2005.

Unit IV : Assessment in Learning Chemistry

Tools and techniques of assessment in chemistry learning: Open ended questions, short answers and objective type questions.

Assessment of Practical Work: Criteria for observing the practical work, skills in observation and recording the observations; interpreting the results of practical work, ability to plan practical procedures and techniques of solving problems and manipulative skills. **Assessment of attitude towards practical work:** Set of exercises, course work, oral questioning. **Assessment of project work;** Self assessment; Peer assessment; Planning for Portfolio assessment in chemistry.

ELEVENTH SEMESTER

MSE(C)-XI.1 : SOLID STATE CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I:

Solid State Chemistry: Fundamentals of X-ray crystallography, law of interfacial angles, laws of symmetry, Miller indices, Bravais lattice, X-ray diffraction, Bragg's equation, Bragg's X-ray spectrometer, experimental methods-rotating crystal, powder samples, indexing of powder photographs. Atomic scattering factor, structure factor, Fourier synthesis and electron density diagrams. Electron diffraction of gases, experimental technique, scattering-intensity curves, Weir equation (no derivation), determination of bond lengths and bond angles. Imperfections in atomic packings: types of imperfections, point defects-Schottky and Frenkel defects. Line defects-dislocation types and dislocation theory. Plane defects and non-stoichiometry. Imperfections and physical properties: electrical, optical, magnetic, thermal and mechanical properties.

Unit II:

Metals, insulators and semiconductors, electronic structures of solids: Band theory, band structure of metals, insulators and semiconductors. Intrinsic and extrinsic semiconductors, electrons and holes, temperature dependence of conductivity in semiconductors. Properties of semiconductors, electrical conductivity in both n- and p-type extrinsic semiconductors. Concept of Fermi energy, Fermi energy in intrinsic and extrinsic semiconductors. Junction properties: Metal-metal junctions, metal-semiconductor junctions, p-n junctions, junction transistor action-n-p-n junctions.

Unit III:

Optical properties of semiconductors: absorption spectrum, photoconductivity, photovoltaic effect, luminescence. Magnetic properties of solids-classification of magnetic materials. Magnetic susceptibility and experimental determination. Variation of magnetic susceptibility with temperature for different magnetic materials. Magnetic properties of mixed oxides with reference to spinel structure. Magnetisation of ferro magnetic materials-Hysteresis and magnetic domains. Superconductors: Introduction, basic experimental facts: critical temperature and zero resistivity, Meissner effect, critical magnetic field and its variation with temperature. Classification of type-I and II superconductors, specific heat, isotope effect. Basic concepts of BCS theory. High T_c superconductors and their applications.

Unit IV:

Chemistry of nanomaterials: Definition, synthesis of nanomaterials-Laser ablation, chemical vapour transport (CVT) and sol-gel methods. Metal oxide nanoparticles with supercritical water and precursor method. Synthesis of metal oxides and its composite nanoparticles by solvo-thermal and hydrothermal methods. Synthesis by micro-oven technique (electromagnetic radiation). Carbon nanotubes, wires and its composites. Magnetic, electrical and electronic and catalytic applications of nanoparticles. Uses of nanomaterials in renewable energy. Synthesis of organic nanoparticles(L-lysine, L-alanine etc). Nanorods-structural and electron transport properties. Inorganic and organic porous gels, effect of temperature and pH on properties of nanoparticles.

3. New Direction in Solid State Chemistry-CNR Rao and J. Gopalakrishnan, Cambridge University Press.
4. Principles of the Solid State-H. V. Keer, Wiley Eastern.
5. Brian L. Cushing, Vladimir L. Kolesnichenko and Charles J. O'Connor. Chemical Reviews, 2004, 104, 3893-3946.

MSE(C)-XI.2 : ORGANOMETALLICS, CATALYSIS & FRONTIERS IN INORGANIC CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:**Unit-I:**

Fundamental concepts: Introduction, Classification of organometallic compounds by bond type, Nomenclature, the Effective atomic number rule, complexes that disobey the EAN rule, common reactions used in complex formation.

Organometallics of transition metals: Preparation, bonding and structures of nickel, cobalt, iron and manganese carbonyls. Preparation and structures of metal nitrosyls in organometallics. Ferrocene and ruthenocene: Preparation, structure and bonding. Complexes containing alkene, alkyne, arene and allyl ligands: preparation, structure and bonding. The isolobal principles.

Unit-II:

Homogeneous catalysis - Industrial Applications: Alkene hydrogenation, hydroformylation, The Wacker process, Monsanto acetic acid process and L-DOPA synthesis, alkene oligomerizations, water-gas shift reactions.

Heterogeneous catalysis - Commercial Applications: Alkene polymerization: Ziegler-Natta catalysis, Fischer-Tropsch carbon chain growth.

Alkene metathesis, hydroboration, arylation or vinylation of olefins (Heck reaction).

Biological and Medicinal Applications: Organomercury, boron, silicon and arsenic compounds

Zeolites as catalysts for organic transformation: Uses of ZSM 6 5(hydroboration, Arylation or vinylation of olefins/Heck reaction).

Unit III:

Nanomaterials, nanoscience and nanotechnology

Fundamentals-Terminology and history, novel optical properties of nanomaterials.

Characterization and fabrication: Characterization methods. Top-down and bottom-up fabrication. Solution based synthesis of nanoparticles. Vapour-phase synthesis of nanoparticles. Synthesis using frameworks, supports and substrates.

Artificially layered materials: Quantum wells and multiple quantum wells. Solid state superlattices. Artificially layered crystal structures.

Self-assembled nanostructures: Self-assembly and bottom-up fabrication. Supramolecular chemistry and morphosynthesis. Dimensional control in nanostructures.

Bioinorganic nanomaterials: DNA and nanomaterials. Natural and artificial nanomaterials-Biomimetics. Bionanocomposites.

Inorganic-organic nanocomposites: Uses and design strategies. Polymer nanocomposites.

Unit IV:

Zeolites: Introduction, types of zeolites, manufacture of synthetic zeolites and applications.

Inorganic fibers: Introduction, properties, classification, asbestos fibers, optical fibers, carbon fibers, Applications.

Ceramics: General information, classification of ceramic products, composition and raw materials, Applications of clay ceramic products.

Inorganic pigments: General information and economic importance,

White pigments ó titanium dioxide pigments, zinc oxide pigments.

Colored pigments ó Iron oxide, chromium oxide, mixed-metal oxide pigments and ceramic colorants.

Corrosion protection pigments, luster pigments, luminescent pigments, magnetic pigments.

9. Industrial Inorganic Chemistry ó 2nd edn. K.H. Buchel, H.H. Moretto and P. Woditsh, Wiley- VCH (2000).

MSE(C)-XI.3 SPECTROSCOPY II

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I:

UV-VIS and IR Spectroscopy: Quantitative aspects of Absorption-Beer's law. Terminology associated with absorption measurements. Limitations of the law: Real, chemical, instrumental and personal. Theory of molecular absorption. Vibration rotation fine structure of electronic spectra. Types of absorption bands C-T & ligand field. Empirical rules for predicting the wavelength of maximum absorption Olefins, conjugated dienes, cyclic trienes and polyenes- unsaturated aldehydes and ketones-benzene and substituted benzene rings. Basic components of instrumentation, single and double beam designs. Applications: Qualitative and quantitative analysis of binary mixtures, measurement of dissociation constants of acids and bases, determination of molecular weight, photometric titrations, determination of stoichiometry and stability of the complexes and kinetic studies.

IR Spectroscopy: Introduction, Instrumentation, samples handling, Modes of vibrations, Hooke's Law, Characteristic group frequencies and skeletal frequencies. Finger print region, Identification of functional groups- Alkenes, Aromatics, Carbonyl compounds (aldehydes and ketones, esters and lactones), halogen compounds, sulphur and phosphorus compounds, amides, lactams, amino acids and amines. Factors affecting group frequencies and band shapes - conjugation, resonance and inductance, hydrogen bonding and ring strain. Tautomerism, Cis-trans isomerism. Applications of IR spectra.

Unit II:

NMR Spectroscopy: Magnetic properties of nuclei (magnetic moment, g factor, nuclear spin), effect of external magnetic field on spinning nuclei, Larmor precession frequency, resonance conditions, population of nuclear magnetic energy levels, relaxation processes, relaxation time, line width and other factors affecting line width.

Chemical Shift: Standards employed in NMR, factors influencing chemical shift: electronegativity, shielding and deshielding, van der Waals deshielding magnetic anisotropy, H-bonding, diamagnetic and paramagnetic anisotropies, spin-spin coupling, chemical shift values and correlation for protons bonded to carbon and other nuclei, Instrumentation.

Chemical shift equivalence and magnetic equivalence, proton exchange reactions, effects of chiral centre, stereochemistry-hindered rotation, Karplus curve-variation of coupling constants with dihedral angle. Application of nmr in structural diagnosis, conformational analysis, keto-enol tautomerism and H-bonding. Structural studies using C-NMR and FT-NMR, application of NMR to other nuclei, two dimensional NMR.

Unit III:

Mass spectrometry: Principles, instrumentation, different methods of ionization. EI, CI, FD and FAB, Ion separators-single focusing separator with magnetic diffraction, double focusing analyzer, time-of-flight separator and quadrupole analyzer, Mass spectra of molecular ion, base peak, metastable peak. General rules for fragmentation pattern. Nitrogen rule and

McLafferty rearrangement. Mass spectral fragmentation of Organic compounds (acids, ester, hydrocarbons, halogenated hydrocarbons, alcohols, carbonyl compounds, amines and heterocyclic compounds).

Composite Problems. Problems involving the application of the above spectroscopic techniques (UV-Visible, IR, NMR and Mass) for structural elucidation of organic molecules.

Unit IV:

Microwave and Raman Spectroscopy: Classification of molecules based on rotation of linear, symmetric, spherical and asymmetric top molecules (HCl, HCN, H₂O, BCl₃, CH₄ and CH₂=CH₂). Pure rotation spectra of diatomic molecules of rigid rotor model, energy levels, rotational quantum number and the selection rule. Effect of non-rigid rotation. Determination of moment of inertia and bond length of diatomic molecules using rotational spectra. Effect of isotopic substitution on rotation spectra. Relative intensities of the spectral lines. Rotation spectra of polyatomic molecules (BCl₃ and CH₃F). Moment of inertia expression for linear and non-linear molecules. Microwave spectrometer, Principles of determination of bond length and moment of inertia from rotational spectra. Stark effect in rotation spectra and determination of dipole moments.

Basic principles of ESR spectroscopy, general rules for the interpretation of spectra, zero field splitting and Kramer's degeneracy, factors affecting the magnitude of g -value. Double resonance - ENDOR, ELDOR. Applications of study of free radicals, structure determinations and analytical applications.

8. NMR spectroscopy-Powai

MSE(C)-XL4 : ELECTROCHEMISTRY AND SURFACE CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I:

Electro Chemistry Arrhenius theory of strong and weak electrolytes and its limitations, Debye-Huckel theory of strong electrolytes, Debye Huckel-Onsager equation, Debye-Huckel limiting equation for activity coefficients, Debye-Huckel equation for appreciable concentrations. A brief survey of Helmholtz- Perrin, Gouy-Chapman and Stern electrical double layer (No Derivation). Liquid junction potential and its determination. Transport Number: Determination of transport number by Hittorf method and e.m.f method. True and apparent transport numbers. Abnormal transport numbers, effect of temperature and concentration on transport number.

Unit II:

Irreversible electrode process: Introduction, reversible and irreversible electrodes reversible and irreversible cells. Polarization, over voltage-ohmic over voltage, concentration over voltage activation over voltage, experimental determination of over voltage. Equations for concentration over potential, diffusion current ó stationary current, potential curves, thickness of diffusion layer, diffusion controlled current ó potential curves at a dropping mercury electrode, polarography, half wave potential, application in qualitative and quantitative analysis. Energy barrier and electrode kinetics, Butler- Volmer equation, Tafel equation. Hydrogen over voltage and Oxygen over voltage. Effect of temperature, current density and pH on over voltage.

Unit III:

Surface Chemistry: Different types of surfaces. Examination of surfaces using ESCA, Auger, SEM and STM. Properties of surface phase. Thermodynamics of surface. Surface tension of solutions. Gibbs adsorption equation and its verification. Surfactants and miscelles. Surface films: Different types. Surface pressure and surface potential, and their measurements and interpretation.

The gas-solid inter phase: Types of adsorption. Theory of adsorption. The Langmuir theory-kinetic and statistical derivation. Multilayer adsorption- the BET theory and Harkins-Jura theory. Adsorption from solutions on solids. Langmuir and classical isotherms. Chemisorption-differences with physical adsorption. Adsorption isotherms. Adsorption with dissociation. Adsorption with interaction between adsorbate molecules. Measurement of surface area of solids: Harkins-Jura absolute method, entropy method, and the point B method. Use of Langmuir, BET and Harkins-Jura isotherms for surface area determination.

Unit IV

Electrokinetic Phenomena: Electrophoresis - principles of free electrophoresis, zone electrophoresis, gel electrophoresis and its applications in qualitative and quantitative study of proteins. Determination of isoelectric point of a protein. Electro osmosis and streaming potential and its biological significance. Biological significance of Donnan membrane phenomenon. Micelles and its involvement during digestion and absorption of dietary lipids.

Diffusion of solutes across biomembranes and its application in the mechanism of respiratory exchange. Salting In and Salting out of proteins. Osmotic behaviour of cells and osmoregulation and its application in the evolution of excretory systems of organisms. Effect of temperature and pH on the viscosity of biomolecules (albumin solution). Significance of viscosity in biological systems - mechanism of muscle contraction, detection of intrastrand disulfide bonds in proteins, polymerization of DNA and nature of blood flow through different vessels. Effect of temperature, solute concentration (amino acids) on surface tension. Biological significance of surface tension - stability of Alveoli in lungs, interfacial tension in living cells (Danielli and Davson model). Application of sedimentation velocity and sedimentation equilibrium method for molecular weight determination of proteins.

MSE(C)-XI.5 : LAB V ORGANIC PRACTICAL – II

Credits : 2(0L+0T + 2P)
Contact Hrs per week : 4
Exam. Duration: 4 Hrs

Max.Marks :100
C1 + C2:50
C3:50

COURSE CONTENT:

A. Qualitative organic analysis:

Separation of binary mixtures, identification of components of binary mixture through preliminary investigations, elements detection, solubility behavior, functional group analysis and determination of physical constants. Preparation of suitable solid derivative for each component for confirmation.

B. Quantitative Analysis:

1. Estimation of keto group by haloform or oxime method.
2. Estimation of esters by base hydrolysis
3. Estimation of nitrogen by Kjaldhal's method.
4. Estimation of Glycine by Sorensen's method.

MSE(C)-XI.6 : LAB VI - ANALYTICAL PRACTICAL – II
(Any ten out of the following suggested experiments)

Credits : 2(0L+0T + 2P)
Contact Hrs per week : 4
Exam. Duration: 4 Hrs

Max.Marks :100
C1 + C2:50
C3:50

COURSE CONTENT:

1. Determination of calcium in limestone by redox, acid-base and complexation titrations.
2. Determination of vitamin C in orange juice by titration with cerium (IV) and with 2, 6-dichlorophenol indophenol.
3. Determination of aluminium and magnesium in antacids by EDTA titration.
4. Analysis of a copper-nickel alloy sample for copper and nickel by EDTA titration using masking and selective demasking reactions.
5. Determination of saccharin in tablets by precipitation titration.
6. Determination of iodine value and saponification value of edible oils.
7. Determination of ascorbic acid in goose berry/bitter gourd by titrimetry / spectrophotometry using N-bromosuccinimide (NBS).
8. Determination of sulphha drugs by potentiometry using NaNO₂ and iodometric assay of penicillin.
9. Polarographic determination of copper and zinc in brass.
10. Determination of iron in mustard seeds and phosphorus in peas by spectrophotometry.
11. Spectrophotometric determination of titanium using hydrogen peroxide.
12. Spectrophotometric determination of iron using thiocyanate/1,10-phenanthroline.
13. Spectrophotometric determination of nickel in steel using DMG.

MSE(C)-XI.7 : INTERNSHIP PROGRAMME 2 (Senior Secondary Level)

Credits : 4

Duration: 4 Weeks

Max. Marks: 100

C₁ + C₂ : 50

C₃ : 50

Objectives:

To provide field experience to the students to develop competencies and skills required for effective classroom teaching at the senior secondary level; class management; evaluation of student learning; organization of cocurricular activities; to enable students to develop proper professional attitudes, values and interests; to establish a closer professional link between RIE Mysore and schools in the region.

COURSE CONTENT:

The course is organized into activities distributed over two phases.

Phase 1 : Internship (3 weeks)

Phase 2 : Post-Internship and Critical Reflection of Internship Experience

Activities:

- Student teachers will teach 12 lessons (including 2 practicals) at Senior Secondary level
- Student teachers will observe a minimum of 5 lessons of their peers
- The student teachers will organize various activities- co-curricular and extended subject based in the school.
- The student teachers will participate in various academic and administrative activities including monitoring and supervising students in school conducted tests and examinations.
- The student teachers will diagnose the learning difficulties of students and provide remedial instruction.
- The student teachers will conduct CCE and unit tests and prepare evaluation records
- The student teachers will carry out action research project, analyse and write the report

(C1 : Observation, Evaluation and Activity Records; C2 : Action Research Report & Post-Internship Activities; C3 : Teaching)

TWELFTH SEMESTER

MSE(C)-XII.1 : INSTRUMENTAL METHODS OF CHEMICAL ANALYSIS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I:

Fundamentals of chromatography: General description, definition, terms and parameters used in chromatography, classification of chromatographic methods, criteria for selection of stationary and mobile phase-nature of adsorbents, factors influencing the adsorbents, nature and types of mobile phases and stationary phases.

Thin-layer chromatography (TLC): Definition, mechanism, efficiency of TL plates, methodology selection of stationary and mobile phases-preparation of plates, spotting, development, identification and detection, applications.

Gas chromatography (GC): Principle, comparison of GSC and GLC, instrumentation columns packed and tubular, study of detectors-thermal conductivity, flame ionization, electron capture and mass spectrometry, factors affecting separation, applications.

High pressure liquid chromatography (HPLC): Apparatus, pumps, column packing, characteristics of liquid chromatographic detectors-UV and fluorescence detectors, advantages and applications.

Affinity chromatography: Definitions, separation mechanism-matrices, matrix activation, role of spacer arms and applications.

Ion-exchange chromatography(IEC): Definitions, requirements for ion-exchange resin, synthesis and types of ion-exchange resins, resin properties, ion-exchange capacity, resin selectivity and factors affecting the selectivity, applications of IEC.

Exclusion chromatography: Theory and principle of size exclusion chromatography, experimental techniques for gel-filtration chromatography (GFC) and gel-permeation chromatography (GPC), materials for packing-factors governing column efficiency, methodology and applications.

Unit II

Solvent extraction: definition, types, principle and efficiency of extraction, sequence of extraction process, synergistic, masking agents, techniques-batch and continuous extraction, applications.

Capillary electrophoresis: Overview, types, the basis for electrophoretic separations, migration rates and plate heights, electroosmotic flow, instrumentation, capillary zone electrophoresis, capillary gel electrophoresis.

Supercritical fluid chromatography: Properties of supercritical fluids, instrumentation and operating variables, applications.

Coulometry: Principle, constant current and controlled potential coulometry. Applications.

Amperometry: Principle, titrations, advantages and limitations, Applications.
Voltammetry: Fundamentals of voltammetry. Cyclic voltammetry: Principles and applications.
Stripping analysis: Stripping voltammetry-basic principles, electrodes used for stripping analysis, apparatus for stripping analysis, applications.

Unit III:

Flame photometry and Atomic absorption spectrometry: Energy level diagrams-atomic absorption spectra. Flame characteristics. Flame atomizers and electrothermal atomization. Comparison of spectral interferences, chemical and physical interferences in flame photometry (FP) and atomic absorption spectrophotometry (AAS). Use of organic solvents. Quantitative techniques-calibration curve procedure and the standard addition technique. Typical commercial instruments for FP and AAS. Applications. Qualitative analysis and quantitative evaluations. Relative detectabilities of atomic absorption and flame emission spectrometry. Inductively coupled plasma optical emission spectrometry-theory, advantages and applications

Molecular luminescence spectrometry: Theoretical basis for fluorescence and phosphorescence. Singlet and triplet excited states. Variables affecting luminescence-quantum efficiency, transition types, structure and structural rigidity, temperature and solvent effects, effect of pH, dissolved oxygen and concentration effect. Excitation spectra vs emission spectra. Fluorescence instrumentation-fluorometers and spectrofluorometers. Sensitivity and selectivity. Modification necessary to measure phosphorescence. General scope of applications of luminescence.

Light-Scattering methods: Nephelometry and turbidometry- Principles, instrumentation and applications

Unit IV:

Radio analytical methods:

Radioactivity tracers-Principles and applications, isotopic dilution analysis, direct, inverse, special analytical applications, radiometric titrations, Neutron activation analysis- principle, instrumentation, applications and limitations.

Radio chromatography, radio immunoassay.

Thermal methods of analysis: Introduction, thermogravimetric analysis (TGA)-types of thermogravimetric analysis, principles. Factors affecting the results-heating rate, furnace, instrument control/data handling. Applications-purity and thermal stability, evaluation of correct drying temperature, analysis of complex mixture and determination of kinetic parameters of thermal degradation.

Differential thermal analysis (DTA): Theory-variables affecting the DTA curves. Differences between TGA and DTA. General principles. Instrumentation. Applications-analysis of the physical mixtures and thermal behaviour study. Determination of melting point, boiling point and decomposition point.

Differential scanning calorimetry (DSC): Basic principle. Differences between DTA and DSC. Instrumentation-power compensated DSC, heat flux DSC. Applications-Studies of thermal transitions and isothermal crystallization. Pharmaceutical industry for testing the purity of the samples. Thermomechanical analysis. Dynamic mechanical analysis.

MSE(C)-XII.2 : BIO-INORGANIC CHEMISTRY

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit- I:

Classification of elements: Essential, trace metals and their biological roles.

Structural and molecular biology: Introduction, The structural building blocks of proteins, the structural building block of nucleic acids. General features of DNA- metal complex interaction.

A brief overview of molecular biology- Replication and Transcription, Translation.

Bioenergetics: Introduction, Redox reactions in metabolism, the central role of ATP in metabolism. Kinetic stability of ATP, Mitochondrial flow of electrons from NADH to O₂. Oxidative phosphorylation and respiratory chain.

Sodium and potassium-Channels and Pumps: Introduction, Ionophores, Transport across membranes. Potassium and sodium channels, The sodium-potassium ATPase.

Biochemistry of calcium: Introduction-comparison of Ca²⁺ and Mg²⁺. Biological roles of calcium, binding sites of calcium and proteins, storage of calcium, calcium in muscle contraction, calcium in blood clotting process.

Unit II:

Metal ion transport and storage:

Iron storage and transport: Transferrin, ferritin and gastroferrin. Iron transport in microbes: siderophores.

Oxygen transport and oxygen uptake proteins: Properties of dioxygen(O₂): Thermodynamic and kinetic aspects of dioxygen as an oxidant, activation of dioxygen through complexation with metal ions.

Haemoglobin (Hb) and Myoglobin (Mb) in oxygen transport mechanism: Introduction to

porphyrin system, substituent effects on porphyrin rings, functions of Hb and Mb.
Characteristics of O₂-binding interaction with Hb and Mb. Model compounds for oxygen carriers. Hemerythrin and Hemocyanin.
Chlorophyll and its role in photosynthesis

Unit III:

Electron transport proteins and redox enzymes: Iron δ sulfur proteins (rubredoxins and ferredoxins) and cytochromes including cytochrome P450. Catalase and peroxidase: Structure and reactivity. Superoxide dismutase: Structure and reactivity. Molybdenum containing enzymes: Aspects of molybdenum chemistry, Xanthine oxidase, aldehyde oxidase, nitrogenase.

Non-redox metalloenzymes - Structure and reactivity : Carboxypeptidase-A, Alcohol dehydrogenase and carbonic anhydrase.

Vitamin B12 and Coenzymes: Structural feature, names of different forms, chemistry of cobalamin, biochemical functions of cobalamins, model compounds. Special characteristics of B12 Coenzyme.

Unit IV:

Therapeutic uses of Metals - Metals in Medicine: Introduction, Metals and human biochemistry, general requirements.

Disease due to metal deficiency and treatment: Iron, zinc, copper, manganese, sodium, potassium, magnesium, calcium and selenium.

Metal complexes as drugs and therapeutic agents; Introduction, antibacterial agents, antiviral agents, metal complexes in cancer therapy, Metal complexes for the treatment of rheumatoid arthritis, vanadium diabetes, Metal complexes as radio diagnostic agents.

Treatment of toxicity due to inorganics: General aspects of mechanism of metal ion toxicity, (i)-Mechanism of antidote complex with poison, rendering it inert: arsenic, lead, mercury, iron, copper.

(ii) Antidote accelerated metabolic conversion of poison to non-toxic product: cyanide and carbon monoxide.

MSE(C)-XII.3 : HETEROCYCLICS, MOLECULAR REARRANGEMENTS, GREEN CHEMISTRY, SYNTHETIC DRUGS AND ANTIBIOTICS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit – I:

Chemistry of heterocyclic compounds: Nomenclature of heterocyclic systems, Principles of heterocyclic synthesis involving cyclisation and cycloaddition. Three and four membered heterocycles ó synthesis and reactions of aziridines, oxiranes, thiiranes, azetidines, oxetanes and thietanes. Synthesis and reactions of heterocycles with one hetero atom ó furan, thiophene, pyrrole, pyridine, indole, quinoline, isoquinoline, pyrones, coumarin and chromones. Synthesis and reactions of heterocycles with more than one hetero atom ó pyrimidines, purines, oxazole and isoxazole.

Unit-II

Molecular rearrangements: Introduction. Carbon-to carbon migrations: Pinacol-pinacolone, Wagner-Meerwein, Benzidine, Demjanov, Benzilic acid, Favorskii, Fries, Claisen rearrangement.

Carbon-to nitrogen Migrations: Hofmann, Curtius, Lossen, and Beckmann rearrangement.

Miscellaneous rearrangements: Sommelet-Hauser, Wittig, Baeyer-Villiger rearrangement.

Unit III: Green Chemistry

Introduction, Green Chemistry Principles, Presidential Green Chemistry Challenge Awards (PGCCA), designing green synthesis ó choice of starting materials, choice of reagents, choice of catalysts including phase transfer catalysts, choice of solvent. atom economy, green oxidizing agents, microwave induced synthesis, ultrasound assisted synthesis, synthesis using bio-catalysts, synthesis in aqueous phase, synthesis in solid state, applications of green chemistry in daily life and Environmental pollution and health hazards.

Unit IV:

Drugs & Antibiotics:

Synthetic Drugs: Synthesis of antipyretics: antipyrine, aminopyrine, novalgin and phenacetin. Synthesis of anticoagulants: dicoumarol, tromexan, warfarin and phenindione. Synthesis of anaesthetics: -eucaine, benzocaine, procaine and xylocaine.

Antibiotics: Structural elucidation and synthesis of Chloromycetin and Penicillin, Structure of streptomycin and terramycin (without elucidation) and their pharmaceutical importance.

MSE(C)-XII.4 : CHEMICAL KINETICS

Credits: 4 (4L+0T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C1 + C2 : 50
C3 : 50

COURSE CONTENT:

Unit I :

Kinetics of complex reactions: Parallel, consecutive and reversible reactions. Determination of order of reaction. Arrhenius equation, energy of activation and its experimental determination. Simple collision theory-mechanism of bimolecular reaction. Lindemann's theory, Hinshelwood's theory for unimolecular reaction. Activated complex theory of reaction rate, classical thermodynamic treatment, partition function, statistical thermodynamic treatment.

Unit II:

Kinetics of reactions in solution-Salt effects, effect of dielectric constant (single sphere and double sphere model), effect of pressure, volume and entropy change on reaction rates. Cage effect with an example. Kinetics of heterogeneous reactions - Langmuir's theory, unimolecular and bimolecular surface reactions.

Unit-III:

Fast Reactions: Study of kinetics by flow techniques, equation for contact time, stopped flow and continuous flow methods. Relaxation method, equation for relaxation time, temperature jump and pressure jump methods, flash photolysis, pulse radiolysis and shock tube method. Potential energy surface, theoretical calculation of energy of activation. Chain reactions: Rice-Herzfeld mechanism for the thermal decomposition of acetaldehyde, Kinetics of explosive reactions, explosion limits (H₂ and O₂ reaction). Kinetics of

autocatalytic and oscillatory chemical reactions, oscillatory chemical reaction of oxidation of malic acid by bromate ion catalyzed by Ce (III). Catalyzed and uncatalyzed reaction: Ru(III) catalyzed oxidation reaction of primaryamines by chloramine δ T in HCl medium.

Unit IV:

Kinetic methods of analysis: Analytical uses of reaction rates relative basis of reaction rate methods, rate laws-first and second order reactions relative rates of reactions, analytical utility of first or pseudo first order reactions, determination of reaction rates, types of kinetic methods-differential methods, integral methods, multicomponent analysis-neglect of reaction of slow-reacting component, logarithmic extrapolation method, reaction rate method, applications-catalyzed reactions, measurement methods for catalyzed reactions, micro determination of inorganic species like iodide, selenium, cobalt & mercury in complex materials, determination of organic species, non-catalytic reactions. Applications of enzyme-catalysed reactions for the analysis of substrates-stoichiometric and rate methods, determination of urea, uric acid, blood glucose, galactose and blood alcohol, determination of enzymes-LDH, GOT and GPT.

A brief outline of IR, UV, NMR, Mass spectroscopy as tools for kinetic study.

MSE(C)-XII.5 : LAB VII - INORGANIC PRACTICAL – II (Any ten of the following suggested experiments)

Credits : 2(0L+0T + 2P)

Contact Hrs per week : 4

Exam. Duration: 4 Hrs

Max.Marks :100

C1 + C2:50

C3:50

COURSE CONTENT:

1. Anion exchange chromatographic separation of zinc and magnesium followed by EDTA titration of the metals.
2. Separation and determination of chloride and bromide on an anion exchanger.
3. Thin layer chromatographic separation of amino acids.
4. Thin-layer chromatographic separation of nitro anilines on fluorescent sheets.
5. Determination of chloride concentration in water by capillary electrophoresis.
6. Analysis of artificial sweeteners and additives in beverages by HPLC.
7. Determination of caffeine in beverages by HPLC.

8. Determination of manganese in steel by extraction-free spectrophotometry and molybdenum in steel by extractive spectrophotometry.
9. Extractive spectrophotometric determination of lead or zinc.
10. Analysis of brackish water for chloride content by a) spectrophotometry (mercuric thiocyanate method), b) conductometry (silver nitrate) and c) potentiometry (silver nitrate).
11. Analysis of a ground water sample for sulphate by titrimetry (EDTA) and turbidimetry.
12. Conductometric titration of sodium acetate with HCl and NH₄Cl with NaOH.
13. Determination of fluoride in drinking water/ground water by spectrophotometry (alizarin red lake method).
14. Analysis of a soil sample for
 - a) calcium carbonate and organic carbon by titrimetry.
 - b) calcium and magnesium by EDTA titration.
15. Analysis of a soil sample for
 - a) Available phosphorus by spectrophotometry.
 - b) Nitrate-nitrogen/nitrite nitrogen/ammonia nitrogen by spectrophotometry.
 - c) sodium and potassium by flame photometry.
16. Analysis of blood for
 - a) cholesterol by spectrophotometry
 - b) bicarbonate by acid-base titration

MSE(C)- XII. 6 : LAB VIII - PHYSICAL CHEMISTRY PRACTICAL – II
(Any ten out of the following suggested experiments)

Credits : 2(0L+0T + 2P)
Contact Hrs per week : 4
Exam. Duration: 4 Hrs

Max.Marks :100
C1 + C2:50
C3:50

COURSE CONTENT:

1. Determination of thermodynamic parameters for the kinetics of decomposition of diacetone alcohol by NaOH.
2. Spectrophotometric kinetics of oxidation of indigocarmine by chloramine-T (CAT) (a) Determination of order of reaction w.r.t. [CAT] (b) Effect of pH and determination of order of reaction w.r.t. [H⁺].
3. Kinetic study on Ru(III) catalysed reaction between primary amine and CAT (a) Determination of order of reaction w.r.t. [Ru(III)], (b) Determination of order of reaction w.r.t. [H⁺], (c) Determination of E_a and thermodynamic parameters.
4. Kinetics of saponification of ethyl acetate by conductivity method and study the effect of dielectric constant of the medium (using CH₃OH).
5. Study of photolysis of uranyl oxalate: (a) determination of intensity of light source (b) study of photocatalysis of oxalic acid.
6. Determination of rate for the photolysis of CAB solution.
7. Determination of half-life of 40K.
8. Study of salt effect on solubility and determination of activity coefficient.
9. Determination of pK_a value of an indicator (bromophenol blue).
10. Spectrophotometric analysis of a mixture of (a) CuSO₄ and K₂CrO₄.
11. Study of complex formation between ferric salt and salicylic acid.
12. Determination of half wave potential of metal ions in a mixture (Mn²⁺, Pb²⁺ and Cu²⁺).
13. Estimation of a metal ion in solution by polarographic method.
14. Amperometric titration of lead nitrate against potassium chromate/potassium dichromate.
15. Coulometric titrations - NaOH vs HCl.

MSE(C)-XII.7 : RESEARCH IN CHEMISTRY EDUCATION

Credits: 3 (2L+1T+0P)
Contact Hrs per week : 4
Exam. Duration: 2 Hrs

Max.Marks :100
C₁ + C₂ : 50
C₃ : 50

Objectives:

The present research in Chemistry Education is concentrated around Using new methodologies, technology, learning tools and assessment techniques. The goal of this course is to present the contemporary perspectives in Research in Chemical Education and to find solutions to problems in class rooms from the reform initiative.

The student teacher will be able to:

- understand the current reform movements in Chemistry Education
- critically Examine the areas of research in Chemistry Education
- familiarize the Student teachers with the concept and methods in Action Research.
- encourage teachers to take up research as a measure of Professional Development

Unit I:Trends in Research in Chemical Education.

Diversity in Research; Areas of research; Transition from behaviorist to constructivist model; Developmental, experimental and correlation studies with examples; A comparison of Studies in India and other countries; Implications to classrooms; vision of Science Education Research- Policy Perspectives in India.

Unit II: Action Research and Investigatory Projects in Chemistry

Meaning, scope, some typical Action Research Studies; Steps involved and role of the teacher; as an indicator of professional growth. Planning Investigatory projects and studying its effectiveness in learning. Teacher as a reflective practitioner.

Unit III: Professional Development in Chemistry Education

Chemical Abstracts and Current Contents; Chemical Education Journals relating to school Education(School Science Review, Journal of Chemical Education, Journal of Research in Science Teaching, Chemistry Education, NCERT journals); Format of reporting in different journals; Online surfing and Internet browsing-Web resources in Chemical Education; Online journals, Virtual laboratories, Wikipedia, Patenting and copy right rule; Acknowledging the source.

Unit IV: Supporting Agencies for Researching Teachers

Role of National and state agencies in NCERT, RIEs, SCERT, ERIC, IASE in conducting In-service programmes,conferences, monitoring capacity building and evaluating the functions of them.; financing agencies for research in Chemistry Education; Seminars, conferences and paper presentations through in NSTA, Indian Chemical society, Indian Science Congress, NSTC, NCERT and other organizations; Teacher autonomy as a researcher
