ENGLISH
UNIT TEST
Class 8A

_Maximum Marks-20

Time: 40mins

I Short Answers (Answer any 3):

(1 from poem compulsory)

(3 x 3 = 9)

1. How did Jody bring fawn back home?
2. What did Doc Wilson mean when he said "Nothing in world ever comes quite free"?
3. Why was Mill wheel afraid to leave Jody alone?
4. What is a bargain? What attempts does a man make to strike a bargain?
5. What message does Tagore's poem convey? What does he try to highlight?

II Write any 2 proverbs:

(2 x 1 = 2)

III Convert the following into reported speech:

(4x1=4)

1. Penny said, "Do you really want it son?"
2. Mill Wheel said, "Will he ride back with me?"
3. Bob is annoying me
4. I can easily pass the test

VI Write down the meanings:

(5x1 = 5)

1. Balked
2. Hoist
3. Sleek
4. Chariot
5. Wandered

I.

1. (i) Picked up fawn into his arms
(ii) Kept fawn down, took rest
(iii) Fawn followed him

2. (i) Penny must pay back to Doc.
(ii) He killed for his own gain
(iii) Bringing up fawn

3. (i) Mill wheel did not want to leave Jody alone
(ii) He was afraid, Jody might be lost
(iii) He could be bitten by snake

4. (i) Bargain - agreement in which parties promise to do something for each other
(ii) King - power - counts for nothing
Man - coin - power counts for nothing
Girl - Beauty - fades away
(iii) Strikes bargain with little child for no price

5. Freedom is more desirable than power
gold or beauty

Employee - slave or servant offers services
on payment

Playing with child - freedom

II Any 2 proverbs of their choice

- III
1. Penny asked his son if he really wanted the fawn
 2. Mill-wheel enquired if Jody would side back with him
 3. She/he said Bob was annoying her/him
 4. She/he said she/he could easily pass the test

- IV
1. unwilling
 2. Pull up higher.
 3. Smooth & Shiny
 4. King's vehicle
 5. walk / move aimlessly

ENGLISH.

Class Interval	Frequency (f_i)	Class mark. (x_i)	$f_i x_i$
0 - 5	01	02.5	2.5
5 - 10	13	07.5	97.5
10 - 15	10	12.5	125
15 - 20	07	17.5	122.5
	$\sum f_i = 31$		$\sum f_i x_i = 347.5$

Frequency distribution table for mean.

$$\text{Mean} = \frac{\sum f_i x_i}{\sum f_i} = \frac{347.5}{31} = \boxed{11.20}$$

Class Interval	Frequency (f_i)	Cumulative frequency (C_f)
0 - 5	01	01
5 - 10	13	14
10 - 15	10	24
<u>15 - 20</u>	07	31
Median class 15 - 20	$\sum f_i = 31$	

Frequency distribution table for median.

$$N/2 = 31/2 = 15.5$$

So Median class = 15 - 20

Here, $l = 15$, $n = 31$ & 24 $f = 07$

$$\text{Median} = l + \left(\frac{n/2 - C_f}{f} \right) h$$

$$= 15 + \left(\frac{31/2 - 24}{10} \right) 5$$

$$= 15 + \left(\frac{15.5 - 24}{10} \right) 5$$

$$= 15 + (-3.5)$$

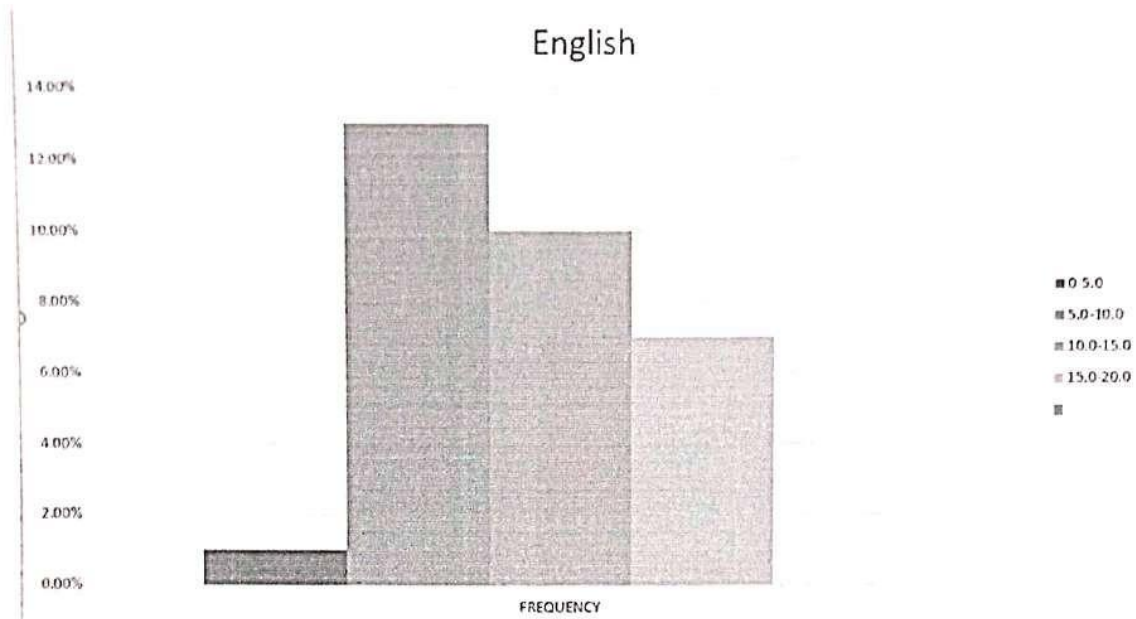

$$\boxed{\text{Median} = 11.5}$$

$$\text{Mean} = 11.20 \quad \text{Median} = 11.5 \quad \text{Mode} = 9$$

$$\text{Mean} > \text{Median} > \text{Mode}$$

Graph is positively skewed.

INTERPRETATION

From the above graph it is clear that there are more number of students who have secured more than 13 i.e., between the range (5-10)

It may indicate that :

- Paper was difficult
- Teaching wasn't efficient

I would go for the following interpretation:

- The paper was difficult and there were 16 questions to be answered
- I would disagree with the latter part which suggests that teaching wasn't effective ,though it may be true for some students as all the students were quite interactive during the classes and I would still like to improve my performance where majority of the students would score more than the average.

SCIENCE UNIT TEST

tit:- Light, Shadows and Reflections

date:- 03/01/22

Total marks: 25

Time duration: 45 min

$$\frac{1}{2} \times 1 = \frac{1}{2}$$

I Choose the correct answer:-

1. Which of the following is a non-luminous body?
a) Sun b) stars c) moon d) Fire flies
2. Light travels in _____
a) circular path b) straight path c) zig-zag d) All of these
3. The colour of the shadow is _____
a) black b) blue c) white d) yellow
4. Which of the following is not always necessary to observe a shadow?
a) Sun b) Screen c) Source of light d) Opaque object

II Fill in the blanks:-

$$3 \times 1 = 3$$

- a) _____ objects allow light to pass through them, completely
- b) The bouncing of light, by a surface is called _____
- c) Tracing paper is a _____ object

III Say true or False

3 × 1 = 3

1. Transparent objects forms a shadow ()
2. Pin-hole camera works on the principle that light travels in a straight line - ()
3. The image formed by the plane mirror is of the same colour as the object - ()

IV Give reasons

2 × 2 = 4

1. Pin-hole camera forms an inverted image.
2. Image in the mirror will not be seen in a dark room.

V write the difference:-

3 × 1 = 3

1. Between, Image and shadows

VI Answer the following questions:- 2 + 3 + 3

- 1) How is shadow formed?
- 2) write a note on pin-hole camera?
- 3) what are transparent, translucent and opaque materials? Give examples for each.

Blue PRINT

5-10	5	8	40	6
10-15	2	13	26	8
15-20	4	18	72	12
20-25	23	23	529	35
Total	35		670	

✓ median class

$$\text{Mean} = \frac{\sum f_i x_i}{N} = \frac{670}{35} = 19.14$$

$$2. \text{ Median} = l + \left(\frac{\frac{N}{2} - F}{f_m} \right) \times i$$

$$= 20 + \frac{17.5 - 12}{23} \times 5$$

$$= 20 + 0.23 \times 5$$

$$= 20 + 1.19 = 21.19 //$$

$$3. \text{ Mode} = 3 \times \text{median} - 2 \times \text{Mean}$$

$$= 3 \times 21.19 - 2 \times 19.14$$

$$= 63.57 - 38.28$$

$$= 25$$

X Evaluation record

• Continuous Assessment of learners was facilitated by the usage of various tools by the teacher. Questioning and problem solving were used for continuous assessment of learners. Questions of lower order, higher order and application level were used throughout the unit. Learning resources were used wherever necessary to involve the students in teaching learning process.

At the end of every lesson assignment was given to make the students reflect on their learning. It helped the students to get better understanding of the concepts which has been taught in the class. Many assignment questions were of applications based. Students who could not get clear with the concept were given individual attention during remedial class.

Problem solving was done in all the classes to check the understanding and make the class more interesting. Appropriate feedback and instruction were given throughout the unit. A unit test was conducted on the completion of the unit.

• I wanted students to completely sink into the chapters, to make sure that they practice daily, I had told them at the beginning that, Notes carries 5 marks, Oral questioning of formulae carries 5 marks, and 15 marks for MCQ's. i.e

- Notes = 5 marks
 - Oral Questioning = 5 marks
of formulae
 - MCQ's test = 15 marks
-
- Total = 25 marks

• Although I had planned to conduct test for 25 marks, due to ^{announcement of holidays} ~~suddenly~~ because of Covid I had to ~~be~~ happy that not happen. So I am analysing the one, which I ^{was able to conduct}

Sol:- $4180 \times 2 = 300 + 15x$

$$960 = 300 + 15x$$

$$15x = 660$$

$$x = 44 \text{ cm}$$

hence the other parallel side is 44 cm.

8. Area of a rhombus = $\frac{1}{2} \times \text{diagonal 1} \times \text{diagonal 2}$

$$240 = \frac{1}{2} \times 16 \times x$$

$$3x = 240$$

$$x = 30 \text{ cm}$$

hence the other diagonal is 30 cm.

9. A cuboid has 3 pairs of identical faces.

10. All six faces of a cube are identical.

11. A cylindrical box has one curved surface and two circular faces which are identical.

12. Total surface area = $2(lb + bh + hl)$
 $= 2(20 \times 15 + 15 \times 10 + 10 \times 20)$
 $= 2(300 + 150 + 200)$
 $= 1300 \text{ cm}^2$

13. Given, $r = 7 \text{ cm}$

$$\text{TSA of a cylinder} = 968 \text{ cm}^2$$

$$\text{we know that, TSA of a cylinder} = 2\pi r(r+h)$$

$$= 968 = 2 \times \frac{22}{7} \times 7(r+h)$$

$$= 22 \times 2 = 44(r+h)$$

$$\text{height} = 15 \text{ cm}$$

14. volume = height \times base area $\Rightarrow 275 = h \times 25$, $h = 11 \text{ cm}$ //

15. volume of a cube = $a^3 = \text{side} \times \text{side} \times \text{side} = (2a)^3 = 8a^3$

Chapter:- Mensuration

• Total duration:- 30 min

• Total marks:- 15 marks

Multiple choice questions (1 x 15 = 15 marks).

1. The Area of a parallelogram with length (p) and breadth (q) is:

- A. $\frac{1}{2}pq$ B. $2pq$ C. pq d. $(pq)^2$

2. Area of a semicircle with radius 'r' is:

- A. πr^2 B. $\frac{1}{2}\pi r^2$ C. $2\pi r^2$ d. $4\pi r^2$

3. Surface area of cube of edge 'a' is:

- A. $4a^2$ B. $6a^2$ C. $3a^2$ D. a^2

4. 1 liter is equal to how many cubic centimeters?

- A. 10 cu.cm B. 100 cu.cm C. 1000 cu.cm D. 10000 cu.cm

5. The Perimeter of a rectangle with length (l) and width (w) is:

- A. $l+w$ B. $2(l+w)$ C. $(l+w)^2$ D. lw

6. The area of a rhombus whose diagonals are of length 10 cm and 8.2 cm is

- A. 41cm^2 B. 82cm^2 C. 410cm^2 D. 820cm^2

7. The area of a trapezium is 480cm^2 , the distance between two parallel sides is 15 cm and one of the parallel sides is 20 cm

The other parallel side is:

- A. 20 cm B. 34 cm C. 44 cm d. 50 cm

Find the other diagonal.
a) 16cm b) 20cm c) 30cm d) 36cm.

9. A cuboid has _____ faces of identical faces.
A. 2 B. 3 C. 4 d) 5

10. All six faces of a cube are:
A. Identical B. Different C. Circular D. Rectangular

11. A cylindrical box has _____ curved surface and _____ circular faces, which are identical.
A. 1, 1 B. 1, 2 C. 2, 1 D. 2, 2

12. If a cuboidal box has height, length and width as 80cm, 15cm & 10cm respectively. Then its total surface area is:
A. 1100cm² B. 1200cm² C. 1300cm² D. 1400cm²

13. The height of a cylinder whose radius is 7cm and total surface area is 968cm² is
A. 15cm B. 17cm C. 19cm D. 21cm.

14. The height of a cuboid whose volume is 275cm³ and base area is 25cm² is.
A. 10cm B) 11cm C) 12cm D) 13cm.

15. Find the volume of a cube whose ^{each} side length is $\frac{2}{3}a$
A. $\frac{8}{27}a^3$ B. $\frac{4}{9}a^3$ C. $\frac{4}{7}a^3$ D. $\frac{6}{9}a$

Total marks: - 15 marks

- Answer key

I Multiple choice questions (1x15 = 15 marks)

1. We know that Area of parallelogram = base \times height
= length \times breadth

Here length is p units and breadth is q units hence,

$$A = pq$$

2. Area of a circle = $\frac{1}{2} \pi r^2$

Here radius is given as r units hence, $A_{\text{circle}} = \frac{1}{2} \pi r^2$

3. Surface area = Total surface area of cube = $6 \times (\text{side})^2$

$$TSA = 6a^2$$

4. 1 liter = 1000 cc

5. Perimeter of a rectangle = $2(\text{length} + \text{breadth})$
= $2(l + w)$

6. Area of a rhombus = $\frac{1}{2} \times (\text{diagonal 1} \times \text{diagonal 2})$
= $\frac{1}{2} \times 10 \times 8.2$
= 41 cm^2

7. Area of a Trapezium = $\frac{1}{2} \times h \times (\text{sum of parallel sides})$

$$A = \frac{1}{2} \times h \times (a + b)$$

Here $A = 420$

$h = 15 \text{ cm}$

$a = 20 \text{ cm}$

$b = ?$

$$420 = \frac{1}{2} \times 15 \times (20 + x)$$

15	Problematic habits		always thinking
16	Mention if any other than the above		

VI) SYMPTOMS OF MALADJUSTMENT:

(Identification, Regression, Introversion, Projection etc.)

1) Is any responsibility given to the pupil in the school? No

2) How far the pupil is successful in disposing responsibilities? *Not so good.*

3) What are the weaknesses found with the pupil?

Not expensive.

can't cry in said situation

Problem of the student	diagnosis by trainee	advice and guidance given	result
<p>I have observed that this student always prefer to sit alone and always fail to answer the question</p>	<p>I diagnosed the problems by observation made during the teaching learning process and assessing the performance of the students</p>	<p>- Gave him;</p> <ul style="list-style-type: none"> ◦ reinforcement during classes ◦ Exercise problems ◦ opportunities to solve problems on board / participate in activity ◦ more worksheet ◦ Taught him to maintain a checklist 	<p>Expected result could not be obtained but there was observable change in form of response in the classroom</p>

ABOUT THE SCHOOL.....

Karnataka

V. [Signature]
08/08/20

Name of the School: Vijaya Vittala Vidhyashala

Place : Saraswathipuram, Mysore
Karnataka - 570009

Type : Govt-aided Private School

Medium : English

Board : Karnataka State Board

Vijaya Vittala Vidhyasha, an English medium co-educational school, situated at a serene locality was established in the year 1985. The school meets the persistent demands of

the people in the locality catering to the all round development of the pupils.

Education is a suitable instrument which moulds the future generations into responsible citizens and good human beings. The school upholds the mission to impart an ideal sense of culture, values and deep knowledge to our students, so that each one is looked upon as a role model by the present and following generations.

The school has class from LKG, UKG 1st to 10th where each class has approximately 30-55 students along with that the total number of teachers are 40. The classes are divided into four sections from A, B, C, D.

Infrastructure of the School and Available facilities

The school consists of grades of L.K.G U.K.G and 1st to 10th consisting of Primary, middle and high school

The school has single building in L shape and has around 40 classroom for instructional activities

All the classroom are clean and have sufficient furniture for students with blackboard and a smartboard

All the classes from 1st to 10th have facilities of digital classes, supported by TATA class edge

The school has separate room for head mistress and three different staff rooms at every floor

The school has small playground in front of the main building

The school has an open auditorium, activity room, yoga room, chess room

An excellent state of art infrastructure like library, well equipped laboratory, multimedia theatre and digital classes are provided by the school.

It also conducts personality development programmes for teachers, parents and students.

AVAILABILITY OF FACILITIES AND RESOURCES CATERING TO CURRICULUM TRANSACTION

LIBRARY

The school has a library with well furnished library houses and there are around more than 6000 books catering to all curricular and co-curricular subjects, also include value oriented books, moral stories and auto-biographies.

New books are added every year, many useful magazines, periodicals, science journals and newspaper are being subscribed.

COMPUTER LABORATORY

Two well equipped computer laboratories
cater the needs of students from class
1st to 10th

MULTIMEDIA THEATRE

An I.T room with multi
media projector, camera,
computers with internet
connection, educational CDs,
television set, with TATA Sky
network, V.C.D player, green
magnet boards, OHPs to the
classes from VIII to XII make
the learning atmosphere more
effective and interesting

SCIENCE LABORATORY

The school has 2 well equipped science laboratories the required facilities with all the necessary equipments to conduct experiments in any field of science.

Sophisticated microscopes, models, charts, maps, preserved biological specimens, slides, samples of rocks and minerals facilitate learning by providing hands on learning experience.
